PART ONE

Fundamentals of Microbiology

CHAPTER 1

The Microbial World and You 2

Microbes in Our Lives 2

Naming and Classifying Microorganisms 3

Nomenclature 3

Types of Microorganisms 3

APPLICATIONS OF MICROBIOLOGY *What Makes Sourdough Bread Different?* 5

Classification of Microorganisms 7

A Brief History of Microbiology 7

The First Observations 7

The Debate Over Spontaneous Generation 7

The Golden Age of Microbiology 9

The Birth of Modern Chemotherapy:
Dreams of a "Magic Bullet" 12

Modern Developments in Microbiology 13

Microbes and Human Welfare 17

Recycling Vital Elements 17

Sewage Treatment: Using Microbes to Recycle Water 17

Bioremediation: Using Microbes
to Clean Up Pollutants 17

Insect Pest Control by Microorganisms 18

Modern Biotechnology and Genetic Engineering 18

Microbes and Human Disease 19

Normal Microbiota 19

Infectious Diseases 19

Emerging Infectious Diseases 20

Study Outline 22

Study Questions 24

Learning with Technology 26

CHAPTER 2

Chemical Principles 27

The Structure of Atoms 28

Chemical Elements 28

Electronic Configurations 28

How Atoms Form Molecules: Chemical Bonds 29

Ionic Bonds 29

Covalent Bonds 31

Hydrogen Bonds 32

Molecular Weight and Moles 33

Chemical Reactions 33

Energy in Chemical Reactions 33

Synthesis Reactions 33

Decomposition Reactions 34

Exchange Reactions 34

The Reversibility of Chemical Reactions 34

How Chemical Reactions Occur 34

APPLICATIONS OF MICROBIOLOGY *Bioremediation—
Bacterial Banqueters Attend Oil Spill* 35

Important Biological Molecules 36

Inorganic Compounds 37

Water 37

Acids, Bases, and Salts 38

Acid–Base Balance 38

Organic Compounds 40

Structure and Chemistry 40

Carbohydrates 41

Lipids 43

Proteins 45

Nucleic Acids 48

Adenosine Triphosphate (ATP) 51

Study Outline 52

Study Questions 54

Learning with Technology 55

CHAPTER 3

Observing Microorganisms Through a Microscope 56

Units of Measurement 56

Microscopy: The Instruments 57

Light Microscopy 57

APPLICATIONS OF MICROBIOLOGY *Can Bacteria
Make Food Safe?* 60

Electron Microscopy 66

Scanned-Probe Microscopy 68

Preparation of Specimens for Light Microscopy 69

Preparing Smears for Staining 69

Simple Stains 69

Differential Stains 69

Special Stains 71

Study Outline 73

Study Questions 75

Learning with Technology 76

CHAPTER 4

Functional Anatomy of Prokaryotic and Eukaryotic Cells 77

**Comparing Prokaryotic and Eukaryotic Cells:
An Overview 77**

The Prokaryotic Cell 78

**The Size, Shape, and Arrangement
of Bacterial Cells 78**

Structures External to the Cell Wall 80

MICROBIOLOGY IN THE NEWS *Are Bacteria Multicellular?* 81

Glycocalyx 82

Flagella 82

Axial Filaments 84

Fimbriae and Pili 84

The Cell Wall 85

Composition and Characteristics 86

Cell Walls and the Gram Stain Mechanism 88

Atypical Cell Walls 88

Damage to the Cell Wall 88

Structures Internal to the Cell Wall 90

The Plasma (Cytoplasmic) Membrane 90

Cytoplasm 95

The Nuclear Area 95

Ribosomes 95

Inclusions 96

Endospores 97

The Eukaryotic Cell 99

Flagella and Cilia 99

The Cell Wall and Glycocalyx 101

The Plasma (Cytoplasmic) Membrane 102

Cytoplasm 102

Organelles 102

The Nucleus 103

Endoplasmic Reticulum 103

Ribosomes 104

Golgi Complex 105

Lysosomes 105

Vacuoles 105

Mitochondria 106

Chloroplasts 106

Peroxisomes 107

Centrosome 107

The Evolution of Eukaryotes 108

Study Outline 108

Study Questions 110

Learning with Technology 112

CHAPTER 5

Microbial Metabolism 113

Catabolic and Anabolic Reactions 113

Enzymes 114

Naming Enzymes 115

Enzyme Components 115

- The Mechanism of Enzymatic Action 116
- Factors Influencing Enzymatic Activity 118
- Feedback Inhibition 120
- Ribozymes 121

Energy Production 121

- Oxidation-Reduction Reactions 121
- The Generation of ATP 122
- Metabolic Pathways of Energy Production 123

Carbohydrate Catabolism 123

- Glycolysis 125
- Alternatives to Glycolysis 125
- Cellular Respiration 125
- Fermentation 133

APPLICATIONS OF MICROBIOLOGY *What is Fermentation?* 133

Lipid and Protein Catabolism 135

Biochemical Tests and Bacterial Identification 137

Photosynthesis 137

- The Light Reactions: Photophosphorylation 139
- The Dark Reactions: The Calvin-Benson Cycle 139

A Summary of Energy Production Mechanisms 139

Metabolic Diversity Among Organisms 140

- Photoautotrophs 142
- Photoheterotrophs 142
- Chemoautotrophs 142

APPLICATIONS OF MICROBIOLOGY *Bacteria Make a Faster, Smarter Computer* 144

- Chemoheterotrophs 145

Metabolic Pathways of Energy Use 145

- Polysaccharide Biosynthesis 145
- Lipid Biosynthesis 146
- Amino Acid and Protein Biosynthesis 146
- Purine and Pyrimidine Biosynthesis 147

The Integration of Metabolism 147

Study Outline 150

Study Questions 152

Learning with Technology 155

CHAPTER 6

Microbial Growth 156

The Requirements for Growth 156

- Physical Requirements 156
- Chemical Requirements 161

APPLICATIONS OF MICROBIOLOGY *Studying Hydrothermal Bacteria* 160

Culture Media 164

- Chemically Defined Media 165
- Complex Media 165
- Anaerobic Growth Media and Methods 165
- Special Culture Techniques 166
- Selective and Differential Media 167
- Enrichment Culture 169

Obtaining Pure Cultures 170

Preserving Bacterial Cultures 170

The Growth of Bacterial Cultures 170

- Bacterial Division 171
- Generation Time 171
- Logarithmic Representation of Bacterial Populations 172
- Phases of Growth 173
- Direct Measurement of Microbial Growth 174
- Estimating Bacterial Numbers by Indirect Methods 178

Study Outline 180

Study Questions 181

Learning with Technology 183

CHAPTER 7

The Control of Microbial Growth 184

The Terminology of Microbial Control 184

The Rate of Microbial Death 186

Actions of Microbial Control Agents 187

- Alteration of Membrane Permeability 187
- Damage to Proteins and Nucleic Acids 187

Physical Methods of Microbial Control 187

- Heat 187
- Filtration 191
- Low Temperatures 191
- Desiccation 192
- Osmotic Pressure 192
- Radiation 192

Chemical Methods of Microbial Control 193

- Principles of Effective Disinfection 193
- Evaluating a Disinfectant 195
- Types of Disinfectants 195

CLINICAL PROBLEM SOLVING *A Hospital-Acquired Infection* 201

Microbial Characteristics and Microbial Control 202

Study Outline 205

Study Questions 207

Learning with Technology 209

CHAPTER 8**Microbial Genetics 210****Structure and Function of the Genetic Material 211**

- Genotype and Phenotype 211
- DNA and Chromosomes 212
- The Flow of Genetic Information 212
- DNA Replication 212
- RNA and Protein Synthesis 215

The Regulation of Bacterial Gene Expression 220

- Repression and Induction 222
- The Operon Model of Gene Expression 223

Mutation: Change in the Genetic Material 226

- Types of Mutations 227
- Mutagens 228
- The Frequency of Mutation 230
- Identifying Mutants 231
- Identifying Chemical Carcinogens 231

Genetic Transfer and Recombination 233**MICROBIOLOGY IN THE NEWS** *The Role of Bacteria in Cancer 234*

- Transformation in Bacteria 235
- Conjugation in Bacteria 237
- Transduction in Bacteria 239
- Plasmids and Transposons 240

Genes and Evolution 242**Study Outline 243****Study Questions 245****Learning with Technology 247****CHAPTER 9****Biotechnology and Recombinant DNA 248****Introduction to Biotechnology 248**

- Recombinant DNA Technology 249
- An Overview of Recombinant DNA Procedures 249

Tools of Biotechnology 249

- Selection 249

APPLICATIONS OF MICROBIOLOGY *Designer Jeans 251*

- Mutation 251
- Restriction Enzymes 252
- Vectors 252
- Polymerase Chain Reaction 254

Techniques of Genetic Engineering 254

- Inserting Foreign DNA into Cells 254
- Obtaining DNA 237
- Selecting a Clone 259
- Making a Gene Product 260

Applications of Genetic Engineering 262

- Therapeutic Applications 262
- Scientific Applications 264
- Agricultural Applications 266

Safety Issues and the Ethics of Genetic Engineering 268**Study Outline 270****Study Questions 271****Learning with Technology 273****PART TWO****A Survey of the Microbial World****CHAPTER 10****Classification of Microorganisms 276****The Study of Phylogenetic Relationships 277**

- The Three Domains 277
- A Phylogenetic Hierarchy 280

Classification of Organisms 280

- Scientific Nomenclature 281
- The Taxonomic Hierarchy 282
- Classification of Prokaryotes 282
- Classification of Eukaryotes 284
- Classification of Viruses 285

Methods of Classifying and Identifying Microorganisms 285

Morphological Characteristics 286

Differential Staining 286

Biochemical Tests 286

Serology 289

Phage Typing 290

MICROBIOLOGY IN THE NEWS *Mass Deaths of Marine Mammals Spur Veterinary Microbiology* 292

Fatty Acid Profiles 292

Flow Cytometry 292

DNA Base Composition 293

DNA Fingerprinting 294

Ribosomal RNA Sequencing 295

The Polymerase Chain Reaction 295

Nucleic Acid Hybridization 295

Putting Classification Methods Together 297

Study Outline 298

Study Questions 299

Learning with Technology 302

CHAPTER 11

The Prokaryotes: Domains Bacteria and Archaea 303

Prokaryotic Groups 304

Domain Bacteria 304

The Proteobacteria 304

The α (alpha) Proteobacteria 304

The β (beta) Proteobacteria 308

The γ (gamma) Proteobacteria 310

Purple and Green Photosynthetic Bacteria 314

The δ (delta) Proteobacteria 315

The ϵ (epsilon) Proteobacteria 315

The Nonproteobacteria Gram-Negative Bacteria 316

Cyanobacteria 316

Planctomycetes 318

Bacteroides 318

Fusobacteria 318

Sphingobacteria 320

The Gram-Positive Bacteria 320

Low G + C Gram-Positive Bacteria 320

High G + C Gram-Positive Bacteria 324

Domain Archaea 326

Microbial Diversity 327

APPLICATIONS OF MICROBIOLOGY *From Plant Disease to Shampoo and Salad Dressing* 328

Study Outline 328

Study Questions 329

Learning with Technology 330

CHAPTER 12

The Eukaryotes: Fungi, Algae, Protozoa, and Helminths 331

Fungi 331

Characteristics of Fungi 332

Medically Important Phyla of Fungi 335

Fungal Diseases 339

Economic Effects of Fungi 341

Lichens 341

Algae 343

Characteristics of Algae 343

Selected Phyla of Algae 344

Roles of Algae in Nature 347

MMWR *Fish Killer Emerges as Human Pathogen* 348

Protozoa 349

Characteristics of Protozoa 349

Medically Important Phyla of Protozoa 350

Slime Molds 354

Helminths 356

Characteristics of Helminths 357

Platyhelminths 358

Nematodes 361

Arthropods as Vectors 363

Study Outline 366

Study Questions 368

Learning with Technology 370

CHAPTER 13

Viruses, Viroids, and Prions 371

General Characteristics of Viruses 372

Host Range 372

Viral Size 373

Viral Structure 373

Nucleic Acid 374

Capsid and Envelope 374

General Morphology 375

Taxonomy of Viruses 376**The Isolation, Cultivation, and Identification of Viruses 376**

Growing Bacteriophages in the Laboratory 379

Growing Animal Viruses in the Laboratory 379

Viral Identification 381

Viral Multiplication 381

Multiplication of Bacteriophages 381

Multiplication of Animal Viruses 386

Viruses and Cancer 394*MMWR AIDS: The Risk to Health Care Workers 395*

The Transformation of Normal Cells into Tumor Cells 396

DNA Oncogenic Viruses 396

RNA Oncogenic Viruses 396

Latent Viral Infections 397**Persistent Viral Infections 397****Prions 398****Plant Viruses and Viroids 398****Study Outline 400****Study Questions 402****Learning with Technology 403****PART THREE****Interaction Between Microbe and Host****CHAPTER 14*****Principles of Disease and Epidemiology 406*****Pathology, Infection, and Disease 407****Normal Microbiota 407**

Relationships Between the Normal Microbiota and the Host 407

Opportunistic Microorganisms 409

Cooperation Among Microorganisms 410

The Etiology of Infectious Diseases 410

Koch's Postulates 410

Exceptions to Koch's Postulates 411

Classifying Infectious Diseases 412

The Occurrence of a Disease 412

The Severity or Duration of a Disease 412

The Extent of Host Involvement 413

PART FOUR

Microorganisms and Human Disease

CHAPTER 21

**Microbial Diseases
of the Skin and Eyes 578****Structure and Function of the Skin 578**

Mucous Membranes 579

Normal Microbiota of the Skin 579**Microbial Diseases of the Skin 580**

Bacterial Diseases of the Skin 582

**CLINICAL PROBLEM SOLVING An Emerging
Neurotizing Disease 584**

Viral Diseases of the Skin 587

Fungal Diseases of the Skin 593

Parasitic Infestation of the Skin 595

Microbial Diseases of the Eye 595

Inflammation of the Eye Membranes: Conjunctivitis 595

Bacterial Diseases of the Eye 596

Other Infectious Diseases of the Eye 596

Study Outline 598**Study Questions 600****Learning with Technology 601**

CHAPTER 22

**Microbial Diseases
of the Nervous System 602****Structure and Function of the Nervous System 602****Bacterial Diseases of the Nervous System 603**

Bacterial Meningitis 603

Tetanus 607

Botulism 608

Leprosy 610

Viral Diseases of the Nervous System 611

Poliomyelitis 611

Rabies 613

Arboviral Encephalitis 615

Fungal Disease of the Nervous System 616*Cryptococcus neoformans* Meningitis (Cryptococcosis) 616**Protozoan Diseases of the Nervous System 616****CLINICAL PROBLEM SOLVING A Neurological Disease 617**

African Trypanosomiasis 617

Naegleria Meningoencephalitis 618**Nervous System Diseases Caused by Prions 618****Study Outline 621****Study Questions 623****Learning with Technology 624**

CHAPTER 23

**Microbial Diseases
of the Cardiovascular
and Lymphatic Systems 625****Structure and Function of the Cardiovascular
and Lymphatic Systems 625****Bacterial Diseases of the Cardiovascular
and Lymphatic Systems 626**

Septicemia, Sepsis, and Septic Shock 626

Puerperal Sepsis 627

Bacterial Infections of the Heart 628

Rheumatic Fever 629

Tularemia 629

Brucellosis (Undulant Fever) 630

Anthrax 631

Gangrene 631

Systemic Diseases Caused by Bites and Scratches 632

Vector-Transmitted Diseases 633

**Viral Diseases of the Cardiovascular
and Lymphatic Systems 639**

Burkitt's Lymphoma 639

Infectious Mononucleosis 639

Classic Viral Hemorrhagic Fevers 640

Emerging Viral Hemorrhagic Fevers 641

**Protozoan Diseases of the Cardiovascular
and Lymphatic Systems 641**

American Trypanosomiasis (Chagas' Disease) 641

Toxoplasmosis 642

Malaria 642

Leishmaniasis 645

CLINICAL PROBLEM SOLVING *A Vectorborne Disease— Or Is It?* 646

Babesiosis 647

Helminthic Diseases of the Cardiovascular and Lymphatic Systems 647

Schistosomiasis 647

Swimmer's Itch 649

Study Outline 651

Study Questions 654

Learning with Technology 655

CHAPTER 24

Microbial Diseases of the Respiratory System 656

Structure and Function of the Respiratory System 656

Normal Microbiota of the Respiratory System 657

Microbial Diseases of the Upper
Respiratory System 658

Bacterial Diseases of the Upper
Respiratory System 659

Streptococcal Pharyngitis (Strep Throat) 659

Scarlet Fever 659

Diphtheria 660

Otitis Media 661

Viral Disease of the Upper Respiratory System 662

The Common Cold 662

Microbial Diseases of the Lower
Respiratory System 662

Bacterial Diseases of the Lower
Respiratory System 663

Pertussis (Whooping Cough) 663

Tuberculosis 663

Bacterial Pneumonias 667

CLINICAL PROBLEM SOLVING *A Respiratory Infection* 668

Viral Diseases of the Lower Respiratory System 672

Viral Pneumonia 672

Influenza (Flu) 672

Fungal Diseases of the Lower Respiratory System 674

Histoplasmosis 674

Coccidiomycosis 675

Pneumocystis Pneumonia 676

Blastomycosis (North American Blastomycosis) 678

Other Fungi Involved in Respiratory Disease 678

Study Outline 679

Study Questions 682

Industrial Products 782

Alternative Energy Sources Using Microorganisms 785

MICROBIOLOGY IN THE NEWS *Biosensors:
Bacteria That Detect Pollutants and Pathogens* 786

Study Outline 787

Study Questions 788

Learning with Technology 790

APPENDIX A

**Classification of Bacteria
According to *Bergey's Manual*** 791

APPENDIX B

Methods for Taking Clinical Samples 803

APPENDIX C

Metabolic Pathways 805

APPENDIX D

**Exponents, Exponential Logarithms,
and Generation Time** 811

APPENDIX E

Pronunciation of Scientific Names 813

APPENDIX F

Taxonomic Guide to Diseases 817

APPENDIX G

Instructions for Using Bacteria ID 821

Glossary 826

Credits 846
