

Contents in Brief

1	Levels of Gene Control	1
2	Structure of Chromatin	29
3	Role of Chromatin Structure in Gene Control	55
4	The Process of Transcription	95
5	Transcription Factors and Transcriptional Control	133
6	Post-transcriptional Processes	175
7	Post-transcriptional Regulation	201
8	Gene Control and Cellular Signaling Pathways	243
9	Gene Control in Embryonic Development	273
10	Control of Cell-type-specific Gene Expression	303
11	Gene Regulation and Cancer	333
12	Gene Regulation and Human Disease	363
13	Conclusions and Future Prospects	383
