

Contents

Preface	xi
Acknowledgments	xiii
Introduction	xv
What Are Wetlands?	xv
Why Are Wetlands Important?	xvii
1 ♦ Geography of Wetlands	1
The Water Cycle	1
<i>Evaporation and Precipitation</i>	2
<i>Transpiration and Evapotranspiration</i>	3
Climate and the Global Distribution of Wetlands	4
<i>Albedo</i>	6
The Oceans and Climate	9
<i>The Oceanic Conveyor Belt</i>	10
Factors Affecting Wetland Types	12
Succession: Wetland Changes in Time	14
Conclusions	16
2 ♦ Geology and Chemistry of Wetlands	17
The Rock Cycle	17
The Nature of Water	19
<i>Acidity and pH</i>	20
Geology and Rock Weathering	21
<i>Particle Size</i>	21
Erosion and Leaching	22
Hydrology of Wetland Catchments	23
Hydrology of Peat	24
<i>Darcy's Law</i>	26
Geology of Wetland Catchments	27
Lake Sediments and Their Origins	29
Peat Deposits: Origins and Contents	31
Wetland Stratigraphy	32
Stratigraphy and Climate	34
<i>The Younger Dryas Event</i>	34

Stratigraphy and Wetland Catchments	35
Stratigraphy and Archaeology	37
<i>Radiocarbon Dating</i>	38
Microscopic Stratigraphy: Diatoms	39
Microscopic Stratigraphy: Pollen	40
<i>Pollen Grains</i>	41
Conclusions	43
3 ♦ The Wetland Ecosystem	45
What Is an Ecosystem?	45
<i>Energy</i>	46
How Do Wetland Ecosystems Work?	47
Primary Productivity of Wetlands	48
<i>Resource Allocation</i>	50
Food Webs of Wetlands	50
Decomposition and Peat Growth	54
<i>Limits to Peat Growth</i>	56
Element Cycling in Wetlands	56
Rainfall Chemistry	60
<i>Acid Rain</i>	60
Eutrophication	61
Vegetation and Water Cleansing	63
Soil Chemistry in Wetlands	65
Nutrient Cycling in Saline Wetlands	67
Sediment Chemistry and Historical Monitoring	69
Wetlands and the Atmosphere	71
<i>Global Carbon Cycle</i>	72
Wetlands and the Carbon Cycle	73
Wetlands and Methane	77
Conclusions	79
4 ♦ Different Kinds of Wetlands	81
Shallow Freshwater Wetlands	81
Temperate Reed Beds and Marshes	83
Tropical Marshes	86
Fens	87
Aapa Mires and String Bogs	89
Spring Mires	91
Montane Wetlands	92
Valley Mires	95
Temperate Swamps	97
Tropical Swamps	98
Pothole Mires	100
Quaking Bogs	102
Temperate Raised Bogs	103
Tropical Raised Mires	106
Blanket Bogs	107

Palsa Mires	112
Arctic Polygon Mires	114
Inland Saline Wetlands	116
Salt Marshes	118
Mangrove Swamps	123
North American Wetlands	126
Conclusions	128

5 ♦ Biology and Biodiversity of Wetlands 129

The Meaning of Biodiversity	129
Species Replacement in Succession	130
<i>Ecological Niche</i>	131
Living in the Wet	132
Microbes in Wetlands	133
<i>Cyanobacteria</i>	134
Submerged Plant Life	134
<i>Aquatic Photosynthesis</i>	136
Animal Life in Water	137
<i>Hippopotamus</i>	138
Animal Life above the Water	139
Aquatic Birds: Dabblers and Divers	141
Aquatic Birds: Fishers in the Reeds	143
<i>Bitterns</i>	144
Animals of the Forested Wetlands	145
Plant Life in Bogs: Bog Mosses and Lichens	147
<i>Lichens</i>	148
Plants in Bogs: Carnivorous Plants	151
<i>Plant Movements</i>	153
Plants in Bogs: Dwarf Shrubs and Drought	154
<i>Why Be an Evergreen?</i>	155
Bog Invertebrates	156
<i>Bog Spiders</i>	157
Vertebrates of the Bog	157
Wetlands and Bird Migration	159
Plant Dispersal in Wetlands	162
The Biology of Inland Saline Wetlands	164
The Biology of Coastal Wetlands	166
Wetlands in Drought	168
Drought and Fire in Peatlands	170
Conclusions	171

6 ♦ Wetlands in History 174

Coal-Forming Mires	174
Vegetation of the Coal Swamps	175
Wetlands in the Pleistocene	178
Wetlands in Prehistory	180
Wetland Bronze and Iron Age Settlements	182
Wetlands—Barriers or Highways?	184

Wetland Exploration—Africa and the Nile	185
Livingstone, Stanley, and the Congo	187
Wetland Exploration—South America	188
Wetland Exploration—North America	189
Wetland Exploration—Southern Europe	191
Wetlands in Literature—Idyllic Images and Moving Waters	192
The Horror of the Swamp Thing	194
Bogs and That Sinking Feeling	196
Wetlands and Disease	197
<i>Mosquitoes and Malaria</i>	198
Conclusions	199
7 ♦ The Value of Wetlands	201
Valuation of Natural Ecosystems	201
Food from Wetlands	202
Water Conservation and Flood Control	204
Peatland Drainage and Agriculture	205
Tropical Wetland Agriculture	207
Wetland Forestry	208
Wetlands and Recreation	209
Peat as an Energy Resource	211
Peat for Horticulture	213
Conclusions	214
8 ♦ The Future of Wetlands	216
Climate Change and Wetlands	216
Sea Levels and Wetlands	217
Wetland Drainage and Destruction	221
The Everglades	222
Wetland Pollution by Pesticides	224
<i>Wetlands as Pesticide Accumulators</i>	225
Wetland Pollution by Organics and Metals	225
Peat Erosion	227
Wetland Conservation	228
Marsh and Fen Restoration	229
Bog Rehabilitation	232
Restoration of Saline Wetlands	234
Do Wetlands Have a Future?	235
Conclusions	237
9 ♦ General Conclusions	238
Glossary	240
Further Reading	249
Web Sites	253
Index	255
