
Contents

SECTION I Introduction and Basic Concepts

Chapter 1 An Introduction to Affinity Chromatography 3

David S. Hage and Peggy F. Ruhn

Chapter 2 Support Materials for Affinity Chromatography 15

Per-Erik Gustavsson and Per-Olof Larsson

Chapter 3 Immobilization Methods for Affinity Chromatography 35

Hee Seung Kim and David S. Hage

Chapter 4 Application and Elution in Affinity Chromatography 79

David S. Hage, Hai Xuan, and Mary Anne Nelson

SECTION II General Affinity Ligands and Methods

Chapter 5 Bioaffinity Chromatography 101

*David S. Hage, Min Bian, Raychelle Burks,
Elizabeth Karle, Corey Ohnmacht,
and Chunling Wa*

Chapter 6 Immunoaffinity Chromatography 127

David S. Hage and Terry M. Phillips

Chapter 7 DNA Affinity Chromatography 173

Robert A. Moxley, Shilpa Oak, Himanshu Gadgil, and Harry W. Jarrett

Chapter 8 Boronate Affinity Chromatography 215

Xiao-Chuan Liu and William H. Scouten

Chapter 9 Dye-Ligand and Biomimetic Affinity Chromatography	231
--	-----

N.E. Labrou, K. Mazitsos, and Y.D. Clonis

Chapter 10 Immobilized Metal-Ion Affinity Chromatography	257
---	-----

Daniela Todorova and Mookambeswaran A. Vijayalakshmi

SECTION III Preparative Applications

Chapter 11 General Considerations in Preparative Affinity Chromatography	287
---	-----

Anuradha Subramanian

Chapter 12 Affinity Chromatography of Enzymes	313
--	-----

Felix Friedberg and Allen R. Rhoads

Chapter 13 Isolation of Recombinant Proteins by Affinity Chromatography	347
---	-----

Anuradha Subramanian

Chapter 14 Affinity Chromatography in Antibody and Antigen Purification	367
---	-----

Terry M. Phillips

Chapter 15 Affinity Chromatography of Regulatory and Signal-Transducing Proteins	399
--	-----

Allen R. Rhoads and Felix Friedberg

Chapter 16 Receptor-Affinity Chromatography	435
--	-----

*Pascal Bailon, Michele Nachman-Clewner,
Cheryl L. Spence, and George K. Ehrlich*

SECTION IV Analytical and Semipreparative Applications

Chapter 17 Affinity Methods in Clinical and Pharmaceutical Analysis	461
--	-----

Carrie A.C. Wolfe, William Clarke, and David S. Hage

Chapter 18 Affinity Chromatography in Biotechnology	487
--	-----

Neil Jordan and Ira S. Krull

Chapter 19 Environmental Analysis by Affinity Chromatography	517
---	-----

Mary Anne Nelson and David S. Hage

Chapter 20 Affinity Chromatography in Molecular Biology	547
--	-----

*Luis A. Jurado, Shilpa Oak, Himanshu Gadgil,
Robert A. Moxley, and Harry W. Jarrett*

Chapter 21	Affinity-Based Chiral Stationary Phases	571
<i>Sharvil Patel, Irving W. Wainer, and W. John Lough</i>		
SECTION V Biophysical Applications		
Chapter 22	Quantitative Affinity Chromatography: Practical Aspects	595
<i>David S. Hage and Jianzhong Chen</i>		
Chapter 23	Quantitative Affinity Chromatography: Recent Theoretical Developments	629
<i>Donald J. Winzor</i>		
Chapter 24	Chromatographic Studies of Molecular Recognition and Solute Binding to Enzymes and Plasma Proteins	663
<i>Sharvil Patel, Irving W. Wainer, and W. John Lough</i>		
Chapter 25	Affinity-Based Optical Biosensors	685
<i>Sheree D. Long and David G. Myszka</i>		
SECTION VI Recent Developments		
Chapter 26	Affinity Ligands in Capillary Electrophoresis	699
<i>Niels H. H. Heegaard and Christian Schou</i>		
Chapter 27	Affinity Mass Spectrometry	737
<i>Chad J. Briscoe, William Clarke, and David S. Hage</i>		
Chapter 28	Microanalytical Methods Based on Affinity Chromatography	763
<i>Terry M. Phillips</i>		
Chapter 29	Chromatographic Immunoassays	789
<i>Annette C. Moser and David S. Hage</i>		
Chapter 30	Molecularly Imprinted Polymers: Artificial Receptors for Affinity Separations	837
<i>Karsten Haupt</i>		
Index		857
