
Table of Contents

Chapter 1

General Overview	1
Definition	1
Classification	2
Occurrence and Distribution	2
Structure of Thallus	3
Unicells and Unicell Colonial Algae	3
Filamentous Algae	5
Siphonous Algae	5
Parenchymatous and Pseudoparenchymatous Algae	6
Nutrition	7
Reproduction	7
Vegetative and Asexual Reproduction	8
Binary Fission or Cellular Bisection	8
Zoospore, Aplanospore, and Autospore	9
Autocolony Formation	9
Fragmentation	10
Resting Stages	10
Sexual Reproduction	11
Haplontic or Zygotic Life Cycle	14
Diplontic or Gametic Life Cycle	14
Diplohaplontic or Sporic Life Cycles	14
Summaries of the Ten Algal Divisions	15
Cyanophyta and Prochlorophyta	16
Glaucophyta	19
Rhodophyta	20
Heterokontophyta	20
Haptophyta	21
Cryptophyta	23
Dinophyta	24
Euglenophyta	26
Chlorarachniophyta	26
Chlorophyta	27
Endosymbiosis and Origin of Eukaryotic Algae	29
Suggested Reading	33

Chapter 2

Anatomy	35
Cytomorphology and Ultrastructure	35
Outside the Cell	35
Type 1: Simple Cell Membrane	35
Type 2: Cell Surface with Additional Extracellular Material	36
Mucilages and Sheaths	36

Scales	37
Frustule.	41
Cell Wall	44
Lorica.	47
Skeleton	48
Type 3: Cell Surface with Additional Intracellular Material in Vesicles	48
Type 4: Cell Surface with Additional Extracellular and Intracellular Material	50
First Level	53
Second Level	54
Third Level	54
Flagella and Associated Structures	55
Flagellar Shape and Surface Features	58
Flagellar Scales	58
Flagellar Hairs.	60
Flagellar Spines.	63
Internal Features	63
Axoneme	63
Paraxial (Paraxonemal) Rod.	64
Other Intraflagellar Accessory Structures	65
Transition Zone.	67
Basal Bodies	70
Root System	73
Glaucophyta	74
Heterokontophyta	74
Haptophyta	76
Cryptophyta	76
Dinophyta	77
Euglenophyta	78
Chlorarachniophyta	80
Chlorophyta	81
How Algae Move	85
Swimming	85
Movements Other Than Swimming	90
Buoyancy Control	92
How a Flagellum Is Built: The Intraflagellar Transport (IFT).	93
How a Flagellar Motor Works	93
Internal Flagellar Structure.	94
How a Paraflagellum Rod Works	94
Photoreceptor Apparata	95
Type I	96
Type II	98
Type III	100
Photosensory Proteins and Methods for Their Investigation	100
Rhodopsin-Like Proteins	101
Flavoproteins	101
Action Spectroscopy	102
Absorption and Fluorescence Microspectroscopy	102
Biochemical and Spectroscopic Study of Extracted Visual Pigments	103
Electrophysiology	103
Molecular Biology Investigations	103

How Algae Use Light Information	104
Photocycling Proteins	104
Sensitivity	105
Noise	106
Direction	107
Guiding	107
Trajectory Control	107
Signal Transmission	108
An Example: Photoreceptor and Photoreception in <i>Euglena</i>	108
Chloroplasts	111
Cyanophyta and Prochlorophyta	112
Glaucophyta	114
Rhodophyta	114
Heterokontophyta	114
Haptophyta	116
Cryptophyta	116
Dinophyta	117
Euglenophyta	117
Chlorarachniophyta	118
Chlorophyta	119
Nucleus, Nuclear Division, and Cytokinesis	119
Rhodophyta	120
Cryptophyta	120
Dinophyta	121
Euglenophyta	121
Chlorophyta	123
Ejectile Organelles and Feeding Apparata	124
Heterokontophyta	124
Haptophyta	124
Cryptophyta	124
Dinophyta	125
Euglenophyta	129
Chlorarachniophyta	130
Chlorophyta	130
Suggested Reading	130

Chapter 3

Photosynthesis	135
Light	135
Photosynthesis	137
Light Dependent Reactions	137
PSII and PSI: Structure, Function and Organization	141
ATP-Synthase	143
ETC Components	144
Electron Transport: The Z-Scheme	146
Proton Transport: Mechanism of Photosynthetic Phosphorylation	148
Pigment Distribution in PSII and PSI Super-Complexes of Algal Division	149
Light-Independent Reactions	149
RuBisCO	150

Calvin Benson Bassham Cycle	153
Carboxylation	153
Reduction	154
Regeneration	155
Photorespiration	155
Energy Relationships in Photosynthesis: The Balance Sheet	156
Suggested Reading	157

Chapter 4

Biogeochemical Role of Algae	159
Roles of Algae in Biogeochemistry	159
Limiting Nutrients	160
Algae and the Phosphorus Cycle	162
Algae and the Nitrogen Cycle	164
Algae and the Silicon Cycle	168
Algae and the Sulfur Cycle	171
Algae and the Oxygen/Carbon Cycles	174
Suggested Reading	177

Chapter 5

Working with Light	181
What is Light?	181
How Light Behaves	182
Scattering	182
Absorption: Lambert–Beer Law	183
Interference	184
Reflection	184
Refraction: Snell's Law	187
Dispersion	187
Diffraction	188
Field Instruments: Use and Application	189
Radiometry	190
Measurement Geometries, Solid Angles	190
Radiant Energy	191
Spectral Radiant Energy	191
Radiant Flux (Radiant Power)	191
Spectral Radiant Flux (Spectral Radiant Power)	192
Radiant Flux Density (Irradiance and Radiant Exitance)	192
Spectral Radiant Flux Density	192
Radiance	193
Spectral Radiance	193
Radiant Intensity	193
Spectral Radiant Intensity	194
Photometry	194
Luminous Flux (Luminous Power)	195
Luminous Intensity	195
Luminous Energy	197
Luminous Flux Density (Illuminance and Luminous Exitance)	197
Luminance	198

Lambertian Surfaces	198
Units Conversion	199
Radiant and Luminous Flux (Radiant and Luminous Power)	199
Irradiance (Flux Density)	200
Radiance	200
Radiant Intensity	200
Luminous Intensity	200
Luminance	200
Geometries	200
PAR Detectors	200
Photosynthesis–Irradiance Response Curve (<i>P</i> versus <i>E</i> curve)	202
Photoacclimation	205
Suggested Reading	206

Chapter 6

Algal Culturing	209
Collection, Storage, and Preservation	209
Culture Types	211
Culture Parameters	213
Temperature	213
Light	213
pH	213
Salinity	214
Mixing	214
Culture Vessels	214
Media Choice and Preparation	215
Freshwater Media	216
Marine Media	225
Seawater Base	225
Nutrients, Trace Metals, and Chelators	226
Vitamins	227
Soil Extract	227
Buffers	228
Sterilization of Culture Materials	235
Culture Methods	236
Batch Cultures	237
Continuous Cultures	239
Semi-Continuous Cultures	241
Commercial-Scale Cultures	241
Outdoor Ponds	241
Photobioreactors	243
Culture of Sessile Microalgae	244
Quantitative Determinations of Algal Density and Growth	244
Growth Rate and Generation Time Determinations	249
Suggested Reading	249

Chapter 7

Algae and Men	251
Introduction	251
Sources and Uses of Commercial Algae	252
