

Contents

Series Preface.....	xi
Preface.....	xv
Editors.....	xvii
Contributors.....	xix

Chapter 1	Intracellular Signaling Molecules as Targets of Selected Dietary Chemopreventive Agents.....	1
------------------	--	---

Joydeb Kumar Kundu, Hye-Kyung Na, and Young-Joon Surh

Chapter 2	Modulation of Cell Signal Transduction by Tea and Ginger.....	45
------------------	---	----

Ann M. Bode and Zigang Dong

Chapter 3	Modulation of MAPK Pathways by Food Phytochemicals: Risks and Benefits	75
------------------	--	----

Akira Murakami, Yasutaka Ikeda, and Hajime Ohigashi

Chapter 4	Turmeric as Cure-Cumin: Promises, Problems, and Solutions.....	91
------------------	--	----

Shishir Shishodia, Krishna Misra, and Bharat B. Aggarwal

Chapter 5	Flavanols and NF- κ B Activation: Relevance for Inflammation and Associated Diseases	137
------------------	---	-----

Cesar G. Fraga and Patricia I. Oteiza

Chapter 6	Regulation of Inflammation, Redox, and Glucocorticoid Signaling by Dietary Polyphenols	153
------------------	--	-----

Irfan Rahman and Saibal K. Biswas

Chapter 7	Dietary Factors in Food: Induction of Nrf2-Mediated Defense Genes in Normal Cells versus Inhibition of Cell Growth Genes in Tumor Cells	189
------------------	---	-----

Auemduan Prawan and Ah-Ng Tony Kong

Chapter 8	The Isothiocyanate Sulforaphane Induces the Phase 2 Response by Signaling of the Keap1–Nrf2–ARE Pathway: Implications for Dietary Protection against Cancer	205
	<i>Albena T. Dinkova-Kostova</i>	
Chapter 9	Nutritional Redox Homeostasis and Cellular Stress Response: Differential Role of Homocysteine and Acetylcarnitine	229
	<i>Vittorio Calabrese, Riccardo Ientile, Carolin Cornelius, Marina Scalia, Maria T. Cambria, Bernardo Ventimiglia, Giovanni Pennisi, Cesare Mancuso, and D. Allan Butterfield</i>	
Chapter 10	Dietary Factors in the Regulation of Selenoprotein Biosynthesis	251
	<i>Regina Brigelius-Flohé and Antje Banning</i>	
Chapter 11	Regulation of Signaling Pathways by Selenium in Cancer	273
	<i>Junxuan Lü, Hongbo Hu, and Cheng Jiang</i>	
Chapter 12	Modulation of Gene Expression by Dietary Carotenoids and Retinoids: Role in Cancer Prevention	315
	<i>John S. Bertram</i>	
Chapter 13	Targeting the Epigenome with Dietary Agents	337
	<i>Barbara Delage and Roderick H. Dashwood</i>	
Chapter 14	Effects of Astaxanthin on Microarray Profiling of Gene Expression Patterns of Glomerular Cells in Diabetic Mice	371
	<i>Yuji Naito, Satomi Akagiri, and Toshikazu Yoshikawa</i>	
Chapter 15	Insulin Resistance and Inflammatory Signaling Pathways Modulated by High-Fat Diet	385
	<i>Taesun Park and Seung-Jin Kim</i>	
Chapter 16	Molecular Effect of Complex Food Matrices on Endothelial Functions—A Complex Issue to Study: The Case of Wine	417
	<i>Raffaella Canali and Fabio Virgili</i>	

Chapter 17	Role of Oxidative Stress in β -Thalassemia and the Antioxidative Effect of Fermented Papaya Preparation	431
	<i>Eitan Fibach, Ada Goldfarb, and Johnny Amer</i>	
Chapter 18	<i>Ginkgo Biloba</i> Leaf Extract (EGb 761) Modulates Cell Signaling Associated with Amyloid Beta Oligomers in Alzheimer's Disease	445
	<i>Yuan Luo</i>	
Index		465
