
Table of Contents

Introduction	xiii
1 Effects of Radiofrequency and Extremely Low-Frequency Electromagnetic Field Radiation on Cells of the Immune System	1
<i>Tatjana Paunesku and Gayle E. Woloschak</i>	
2 Evaluation of the Toxicity and Potential Oncogenicity of Extremely Low-Frequency Magnetic Fields in Experimental Animal Model Systems	21
<i>David L. McCormick</i>	
3 Interaction of Nonmodulated and Pulse-Modulated Radio Frequency Fields with Living Matter: Experimental Results	53
<i>Sol M. Michaelson, Edward C. Elson, and Larry E. Anderson</i>	
4 Behavioral and Cognitive Effects of Electromagnetic Field Exposures	149
<i>Sheila A. Johnston and John A. D'Andrea</i>	
5 Thermoregulation in the Presence of Radio Frequency Fields	215
<i>David Black</i>	
6 Epidemiologic Studies of Extremely Low-Frequency Electromagnetic Fields	227
<i>Leeka Kheifets and Riti Shimkhada</i>	
7 Epidemiological Studies of Radio Frequency Fields	265
<i>Maria Feychting</i>	
8 EMF Standards for Human Health	277
<i>Emilie van Deventer, Dina Simunic, and Michael Repacholi</i>	
9 Electroporation	293
<i>James C. Weaver and Yuri Chizmadzhev</i>	
10 Electrical Shock Trauma	333
<i>Raphael C. Lee, Elena N. Bodnar, Pravin Betala, and Sigrid Blom-Eberwein</i>	
11 Mechanisms and Therapeutic Applications of Time-Varying and Static Magnetic Fields	351
<i>Arthur A. Pilla</i>	
12 Therapeutic Heating Applications of Radio Frequency Energy	413
<i>C-K. Chou</i>	
Index	429
