1 A Century of Plant Nematology	1
Kenneth R. Barker	
1.1 Introduction	1
1.2 Early Records and References to Nematodes	2
1.3 The Early Foundations of the Science of Nematology	6
1.4 Nematology Textbooks and Education	23
1.5 Professional Societies and International Nematology Meetings	32
1.6 Milestones and Trends in Nematology Research	34
References	42
2 Perspectives on Nematology for the 21st Century	52
John M. Webster	
2.1 The Way Ahead	52
2.2 Healthy Soil and Crops	54
2.3 Agronomic Alternatives	58
2.4 Resistance in Plants	59
2.5 Technological Applications	62
2.6 Environmental Quality	64
2.7 Human Health	65
References	66
3 Developmental Biology of Nematodes — What We Learn from <i>Caenorhabditis elegans</i>	71
Marie-Anne Félix	
3.1 Introduction: the <i>Caenorhabditis elegans</i> Cell Lineage	71
3.1.1 Historical Perspective on Nematode Developmental Studies	71
3.1.2 <i>C. elegans</i> as a Model System	72
3.1.3 Invariance of the <i>C. elegans</i> Cell Lineage	72

Contents

3.1.4	Cell Interactions and Asymmetric Divisions	77
3.2	Early Development	79
3.2.1	Fertilization and Antero-posterior Axis Specification	79
3.2.2	Asymmetry of the First Division and in the Posterior Lineage	80
3.2.3	Dorsoventral Specification and Cell Interactions at the 4-Cell Stage	84
3.2.4	Left-Right Symmetry and Asymmetry	87
3.2.5	Asymmetries after the Third AB Division	89
3.3	Specification of Body Regions and Cell Types	89
3.3.1	Phases in Embryonic Development	89
3.3.2	Tissue and Organ Specification	91
3.3.3	Antero-posterior Patterning and the Homeotic Gene Cluster	92
3.4	Cell Death	96
3.4.1	Programmed Cell Death in Development	96
3.4.2	The <i>ced</i> Mutants Define Distinct Steps in Cell Death	97
3.4.3	The Molecular Pathway of Cell Death	99
3.5	Development of the Gonad	99
3.5.1	Overview of Gonad Development	99
3.5.2	The Distal Tip Cells	101
3.5.3	Ovary and Spermatheca	102
3.5.4	Anchor Cell Specification: Lateral Inhibition Through Notch	102
3.5.5	Uterus Patterning	104
3.5.6	Germ Line Development	104
3.5.7	Evolution of Gonad Development in Nematodes	108
3.6	Development of the Vulva	109
3.6.1	Formation of the Vulva	109
3.6.2	The Vulval Equivalence Group and Vulval Fate Induction by the Anchor Cell	112
3.6.3	The Vulva Mutants	114
3.6.4	The Molecular Pathways: EGF-Ras and Notch Signaling	116
3.6.5	Patterning of Vulval Cell Fates	118

3.6.6	Evolution of Vulva Development in Nematodes	119
3.7	Development of the Nervous System	121
3.7.1	Determination of Neural Cells	122
3.7.2	Axon Outgrowth and Pathfinding	126
3.7.3	Synapse Formation	129
3.8	Sex Determination and Male Development	129
3.8.1	Sex Determination	129
3.8.2	Development of the Male Reproductive System	134
3.9	Identity of Larval Stages: the Heterochronic Genes	141
3.9.1	The Heterochronic Mutants	141
3.9.2	Molecular Regulation Through 3' UTRs and Small RNAs	144
3.9.3	Developmental Heterochronies between Nematodes	145
3.10	Dauer and Longevity	147
3.10.1	The <i>C. elegans</i> Dauer	147
3.10.2	Insights into the Neuronal, Genetic and Molecular Pathways Regulating Dauer Entry	147
3.10.3	Regulation of Adult Lifespan	151
3.11	Conclusions	151
	References	152
4	Nematode Morphology, Sensory Structure and Function	175
	James G. Baldwin and Roland N. Perry	
4.1	Introduction	175
4.2	Body Wall	177
4.2.1	Hypodermis	177
4.2.2	Cuticle	179
4.2.3	Muscle	187
4.3	Digestive System	191
4.3.1	Stoma	191
4.3.2	Pharynx	197
4.3.3	Intestine	201
4.3.4	Rectum	201
4.4	Reproductive System	202
4.4.1	General Reproductive Tract	203
4.4.2	Modes of Reproduction	205

Contents

4.4.3	Females and Hermaphrodites	206
4.4.4	Males	210
4.5	Secretory-Excretory System	215
4.6	Nervous System	217
4.6.1	Basic Nerve Elements	221
4.6.2	Central Nervous System	221
4.6.3	Peripheral Nervous System	222
4.6.4	Sympathetic Nervous System	223
4.6.5	Sense Organs	224
	References	236
5	Nematode Esophageal Glands and Plant Parasitism	258
	Richard S. Hussey and Eric L. Davis	
5.1	Introduction	258
5.2	Esophageal Gland Cell Morphology	259
5.3	Nature of Stylet Secretions	264
5.4	Feeding Tubes	267
5.5	Secretions of Animal-parasitic Nematodes	272
5.6	From Protein to Gene	273
5.7	Expressed Esophageal Gland Genes	280
5.8	Conclusions and Future Research	284
	References	287
6	Surface Adhesion to Nematodes and its Consequences	295
	Alan F. Bird	
6.1	Introduction	295
6.2	The Surface Coat of Nematodes	296
6.3	The Surface of Bacteria	298
6.4	Adhesion	299
6.5	Commensalism as a Consequence of Adhesion	300
6.5.1	Plant Viruses and Their Nematode Vectors	300
6.5.2	<i>Dilophospora</i> and Its Vector Nematode	302
6.6	Mutualism as a Consequence of Adhesion	304
6.7	Parasitism as a Consequence of Adhesion	307
6.7.1	<i>Anguina</i> and <i>Rathayibacter</i>	307
6.7.2	<i>Meloidogyne</i> and <i>Pasteuria</i>	315
6.8	Conclusions	319
	References	321

7 Nematode Behavior and Migrations through Soil and Host Tissue	330
A. Forest Robinson	
7.1 Introduction	330
7.2 Basis of Behavior	331
7.2.1 How Nematodes Move	331
7.2.2 Morphological and Physiological Basis of Behavior in Nematodes	337
7.2.3 Theory and Terminology of Directed Locomotion	339
7.3 Environmental Limits	340
7.3.1 Factors Affecting Activity	340
7.3.2 Movement on Agar	344
7.3.3 Constraints of Natural Substrates	346
7.4 Research Topics on Nematode Behavior	350
7.4.1 Isolated Stimuli Affecting Migrations of Diverse Taxa	350
7.4.2 Migrations	367
7.4.3 Behavioral Interactions	377
7.5 Conclusions	381
References	382
8 Background for Nematode Ecology in the 21st Century	406
Gregor W. Yeates and Brian Boag	
8.1 Introduction	406
8.2 Nematode Substrates and Food Resources	407
8.2.1 Substrates Occupied by Nematodes	408
8.2.2 Food Resources (Sources of Nutrition) and Nematode Feeding Types	408
8.3 Temporal Distribution	409
8.4 Geographical and Spatial Distribution	411
8.5 Food Resources vs. Temperature Regimes in Determining Terrestrial Nematode Distribution	412
8.6 Impact of Substrate Dimensions	415
8.7 Diversity of Nematode Faunae in Terrestrial and Aquatic Sediments	419
8.8 Microbial and Detrital Substrates	423

Contents

8.9	Impact of Environmental Pressures on Nematode Faunae	425
8.9.1	Soil Tillage	425
8.9.2	Plant Cultivars	426
8.9.3	Global Climate Change	426
8.9.4	Elevated Carbon Dioxide	427
8.10	Nematode Population Genetics	427
8.11	Overview	428
