Chapter 1 Evolution of Microwave Irradiation and Its Introduction to the Biosciences		1
1.1 Microwave Radiation		1
1.2 History and Evolution of the Magnetron		2
1.3 Microwaves as a Catalysis Tool in Organic and Inorganic Chemistry		3
1.4 Microwave-Assisted Staining of SDS-PAGE and PVDF Membrane-Embedded Proteins		3
1.5 Microwave-Assisted Peptide Synthesis		6
1.6 Microwave-Assisted Antigen Retrieval		6
1.7 Microwave-Assisted Analysis of Neuropeptides		7
1.8 Microwave-Assisted Akabori Reaction		7
References		8
Chapter 2 Microwave Instrumentation in the Biosciences		10
2.1 Background		10
2.2 Microwave Design		11
2.2.1 Monomode vs. Multimode Systems		11
2.2.2 Continuous Flow Systems		13
2.2.3 High-Throughput Formats		16

Microwave-Assisted Proteomics

Published by the Royal Society of Chemistry, www.rsc.org

2.3	Methods for Measuring Reaction Temperatures	16
2.4	Commercially Available Instrumentation	17
	References	19
Chapter 3	Mechanisms of Microwave-Assisted Action	21
3.1	Dipolar Polarization Mechanisms	21
3.2	Conduction Mechanism	23
3.3	Superheating Theory	25
3.4	Mechanisms of Action Specific for Proteomic and Protein Chemistry Analyses	25
	References	27
Chapter 4	Microwave-Assisted Enzymatic Digestions	28
4.1	Introduction to Proteomic Work Flows	28
4.2	Microwave-Assisted Tryptic Digestions	30
4.3	Microwave-Assisted Proteolysis with Other Proteolytic Enzymes	34
4.4	Effect of Solvents on Microwave-Assisted Proteolysis	36
4.5	Microwave-Assisted Protein Preparation and Enzymatic Digestion (MAPED) in Proteomics	37
4.6	Microwave-Assisted Tryptic Digestion on Immobilized Surfaces	37
4.7	Theory of Microwave-Assisted Proteolytic Digestions	39
	References	40
Chapter 5	Microwave-Assisted Chemical Digestion of Proteins	43
5.1	Traditional Protocols for the Chemical Digestion of Proteins	43
5.2	Acid-Mediated Microwave-Assisted Digestion of Proteins	45
5.2.1	TFA-Mediated Microwave-Assisted Proteolysis	46
5.2.2	Asp-Specific Microwave-Assisted Proteolysis	48
5.3	Other Microwave-Assisted Chemical Proteolysis Reactions	53
	References	54
Chapter 6	Microwave-Assisted Acid Hydrolysis	56
6.1	Protein Quantitation by Amino Acid Analysis	56
6.2	Microwave-Assisted Acid Hydrolysis for Protein Quantitation	57

6.3	Traditional Methods for N- and C-Terminal Sequencing	59
6.4	N- and C-terminal Sequencing using Microwave-Assisted Acid Hydrolysis	61
6.5	Microwave-Assisted Acid Hydrolysis for Analysis of N-terminally Blocked Proteins	68
	References	70

Chapter 7	Microwave-Assisted Discovery and Characterization of Posttranslational Modifications	71
------------------	---	-----------

7.1	Posttranslational Modifications	71
7.2	Microwave-Assisted Characterization of Glycopeptides and Glycoproteins	72
7.3	Microwave-Assisted Enzyme-Mediated N-linked Deglycosylation	76
7.4	Microwave-Assisted O-linked Deglycosylation	81
7.5	Microwave-Assisted Methods for Phosphorylation Mapping	81
7.5.1	Microwave-Assisted β -Elimination and Michael Addition	81
7.5.2	Enrichment of Phosphopeptides using Microwave-Assisted IMAC Probes	85
7.6	Microwave-Assisted Enzymatic Removal of N-terminal Pyroglutamyl	85
7.7	Other Microwave-Assisted Methods for the Characterization of PTMs	89
	References	89

Chapter 8	Recent Microwave-Assisted Applications in the Life Sciences	92
------------------	--	-----------

8.1	Microwave-Assisted Protein Quantitation Protocols	93
8.1.1	Microwave-Assisted ICAT TM and iTRAQ TM Reactions for Parallel Proteomic Quantitation	93
8.1.2	Microwave-Assisted Fluorescence and Chemiluminescence Protein Quantitation	97
8.2	Microwave-Assisted Molecular Biology Tools	99
8.2.1	Microwave-Assisted Polymerase Chain Reaction	100
8.2.2	Microwave-Assisted Rolling Circle Amplification	101
8.3	Microwave-Assisted Characterization of Metal-Catalyzed Reaction Sites on Proteins	101

8.4	Microwave-Assisted Characterization of Lipase Selectivities	102
8.5	Dissociation of Protein Complexes	104
	References	108
Chapter 9	Epilogue: To Microwave or Not To Microwave?	110
Chapter 10	Microwave-Assisted Proteomic Protocols	112
	Safety Considerations	112
	Protocol I. Microwave Fixing, Staining and Destaining of SDS-PAGE Gels	113
	Reagents	113
	Protocol	113
	Protocol II. Microwave-Assisted Antigen Retrieval	114
	Protocol	114
	Protocol III. Microwave-Assisted In-Solution Tryptic Digestion	114
	Reagents	114
	Protocol	114
	Protocol IV. Microwave-Assisted In-Gel Tryptic Digestion	115
	Reagents	115
	Protocol	115
	Protocol V: Microwave-Assisted Protein Hydrolysis for Amino Acid Analysis	115
	Reagents	116
	General Considerations	116
	Protocol	116
	Protocol VI: TFA Cleavage for Bottom-Up Characterization	116
	Reagents	116
	Protocol	117
	Protocol VII: Aspartic Acid Specific Cleavage for Formic Acid Catalysis	117
	Reagents	117
	Protocol 1 – In Solution	117
	Protocol 2 – In gel	117
	Protocol VIII: N-linked Protein Deglycosylation	118
	Reagents	118
	Protocol	118
	Subject Index	119
