Introduction: Read Me First 1

A Brief Overview of the Second Edition 2

*Time-Limited Copy of the PAUP*4.0 Program 3*

Learn More about the Principles 4

Computer Programs Discussed and Where to Obtain Them 4

ClustalX 5

TreeView 5

PAUP* 5

PHYLIP (PHYLogeny Inference Package) 6

Tree-Puzzle 6

MrBayes 7

CodonAlign 7

Other Programs 7

*Files and Utilities on the "Phylogenetics Made Easy"
Website and CD 7*

Some Conventions Used in This Book 8

Chapter 1 Tutorial: Create a Tree! 9

Why Create Phylogenetic Trees? 9

Obtaining Related Sequences by a BLAST Search 10

Step 1: Go to the BLAST Website 11

Step 2: Use BLAST to Search for Sequences Related to Your
Sequence 13

Step 3: Decide Which Related Sequences to Include on Your Tree 14

Downloading the Selected Sequences 20

Creating the Multiple Alignment 23

Creating the Input File 24

Getting the Data into ClustalX 26

Some General Comments about Creating Alignments 27

Setting the Alignment Parameters 27

Creating the Alignment 32

Refining and Improving the Alignment 33

Aligning New Sequences to an Existing Alignment, or Aligning
Two Existing Alignments 38

Phylogenetic Analysis 40

Exactly What Is a Phylogenetic Tree? 41

Methods for Constructing Phylogenies 41

LEARN MORE ABOUT PHYLOGENETIC TREES 42

Using ClustalX to Create a Neighbor Joining Tree 46

Drawing the Tree Using Tree View 47

Tree Formats: Different Appearances of the Same Tree 47

Bootstrapping a Tree 50

LEARN MORE ABOUT ESTIMATING THE RELIABILITY OF PHYLOGENETIC TREES 52

Placing the Root of a Tree 53

LEARN MORE ABOUT ROOTING PHYLOGENETIC TREES 56

Printing and Saving the Tree 59

Summary 60

Chapter 2 Basic Elements in Creating and Presenting Trees 61

***Selecting Homologs: What Sequences Can Be Put on a
Single Tree? 61***

Fine-Tuning Alignments 64

Major Methods for Creating Trees 68

Which Method Should You Use? 68

Distance versus Character-Based Methods 69

LEARN MORE ABOUT TREE-SEARCHING METHODS 70

LEARN MORE ABOUT DISTANCE METHODS 74

Data Files Used to Illustrate Methods 76

Using PAUP* to Create Trees 76

Opening the Input File 77

Creating Neighbor-Joining Trees Using PAUP* 80

Creating Parsimony Trees Using PAUP* 92

LEARN MORE ABOUT PARSIMONY 94

Creating a Consensus Tree Using PAUP* 100

Creating Maximum Likelihood DNA Trees Using PAUP* 102

LEARN MORE ABOUT MAXIMUM LIKELIHOOD 104

LEARN MORE ABOUT EVOLUTIONARY METHODS 110

Creating Maximum-Likelihood Protein Trees Using Tree-Puzzle 114***Creating Bayesian Trees Using MrBayes 118***

Creating the Execution File 119

LEARN MORE ABOUT BAYESIAN ANALYSIS 120

What the Statements in the Example MrBayes Block Do 123

Interpreting MrBayes Results 128

Sample Blocks for MrBayes 130

Getting Help 132

Presenting and Printing Your Trees 135

Opening Tree Files in PAUP* 135

To Root or Not to Root? 139

Choosing What Form of a Tree to Publish 147***Making a Tree Pretty: Not Just a Cosmetic Matter 148******DNA Phylogeny or Protein Phylogeny: Which Is Better? 152***

Using CodonAlign 2.0 154

**Chapter 3 Advanced Elements in Constructing
Trees 157*****Reconstructing Ancestral DNA Sequences 157***Ancestral Sequences for Parsimony and Maximum Likelihood Trees
Using PAUP* 158

Ancestral Sequences for Parsimony using PHYLIP 161

***Using Protein Structure Information to Construct Very Deep
Phylogenies 167******Analyzing Trees for Evidence of Adaptive Evolution by Detecting
Positive Selection in a Phylogeny 173***

Chapter 4 Using Alternative Software to Construct and Present Trees 179

Using PAUP* with Windows or Unix 179

Opening and Viewing Files 180

Using PAUP Blocks 182

Bootstrapping 185

Using PHYLIP 187

General Features of PHYLIP Programs 188

Parsimony Trees 189

Consensus Trees 190

Neighbor-Joining Trees 190

Maximum Likelihood Trees 191

Bootstrapping 191

Appendix I File Formats and Their Interconversion 193

Formats Used by Programs Discussed in this Book 193

The FASTA Format 193

The Clustal Format 194

The Nexus Format 195

PHYLIP 3.x 197

Other File Formats 199

The GCG/MSF Format and PileUp 199

The NBRF/PIR format 200

Interconverting Formats Using PAUP* 201

Importing Various File Formats into PAUP* 201

Exporting Various File Formats from PAUP* 202

Interconverting Interleaved and Sequential Formatted PHYLIP Files 203

Appendix II Printing Alignments 205

Printing to Assess the Quality of the Alignment 205

Printing Alignments for Publication 206

Literature Cited 207

Index to Major Programs Discussed 209

Subject Index 215
