

Brief Table of Contents

- 1 Community Ecology's Roots 1

PART I *The Big Picture: Patterns, Causes, and Consequences of Biodiversity*

- 2 Patterns of Biological Diversity 13
- 3 Biodiversity and Ecosystem Functioning 41

PART II *The Nitty-Gritty: Species Interactions in Simple Modules*

- 4 Population Growth and Density Dependence 65
- 5 The Fundamentals of Predator–Prey Interactions 83
- 6 Selective Predators and Responsive Prey 103
- 7 Interspecific Competition: Simple Theory 125
- 8 Competition in Nature: Empirical Patterns and Tests of Theory 149
- 9 Beneficial Interactions in Communities: Mutualism and Facilitation 175

PART III *Putting the Pieces Together: Food Webs and Ecological Networks*

- 10 Species Interactions in Ecological Networks 197
- 11 Food Chains and Food Webs: Controlling Factors and Cascading Effects 223

PART IV *Spatial Ecology: Metapopulations and Metacommunities*

- 12 Patchy Environments, Metapopulations, and Fugitive Species 251
- 13 Metacommunities and the Neutral Theory 267

PART V *Species in Changing Environments: Ecology and Evolution*

- 14 Species Coexistence in Variable Environments 289
- 15 Evolutionary Community Ecology 317
- 16 Some Concluding Remarks and a Look Ahead 339
