

Contents

Chapter 1 The Study of Behavioral Endocrinology 1

Historical Roots of Behavioral Endocrinology 2

BOX 1.1 THE HIJRAS OF INDIA 4

Berthold's Experiment 5

What Are Hormones? 8

BOX 1.2 FRANK A. BEACH AND THE ORIGINS OF
THE MODERN ERA OF BEHAVIORAL
ENDOCRINOLOGY 8

BOX 1.3 NEURAL TRANSMISSION VERSUS
HORMONAL COMMUNICATION 10

The Study of Behavior 12

Problems of Behavioral Research 12

How Is Behavior Described? 13

The Simple System Approach 13

Levels of Analysis 14

How Might Hormones Affect Behavior? 17

How Might Behavior Affect Hormones? 18

Classes of Evidence for Determining Hormone–Behavior Interactions 20

Common Techniques in Behavioral Endocrinology 21

Ablation and Replacement 21

Bioassays 22

Immunoassays 24

Immunocytochemistry 26

Autoradiography 27

Blot Tests 28

*Autoradiography Using In Situ
Hybridization* 29

Stimulation and Recording 29

Pharmacological Techniques 30

Microdialysis 30

Brain Imaging 31

Genetic Manipulations 32

Gene Arrays 36

*A Case Study: Effects of Leptin on
Behavior* 36

Summary 39

Questions for Discussion 40

Suggested Readings 40

Chapter 2 The Endocrine System 41

Chemical Communication 42

General Features of the Endocrine System 44

The Endocrine Glands 47

The Hypothalamus 49

BOX 2.1 INVERTEBRATE ENDOCRINOLOGY 50

The Pituitary Gland 52

The Thyroid Gland 54

The Pancreas 56

The Gastrointestinal Tract 57

The Adrenal Glands 57

The Pineal Gland 59

The Gonads 59

The Placenta 64

Cellular and Molecular Mechanisms of Hormone Action 64

Hormone Receptor Types 64

Transcription, Translation, and Post-Translational Events 70

The Major Vertebrate Hormones 71

Protein and Peptide Hormones 72

BOX 2.2 THE DISCOVERY OF SECRETIN 85

The Steroid Hormones 89

The Monoamine Hormones 98

The Lipid-Based Hormones 99

How Hormones Are Regulated 101

The Evolution of Hormones 103

Summary 105

Questions for Discussion 107

Suggested Readings 107

Chapter 3

Sex Differences in Behavior: Sex Determination and Differentiation 109

Sex Determination and Differentiation 112

Ultimate Causes of Sex Differences 113

BOX 3.1 BEHAVIORAL SEX ROLE REVERSALS 114

Proximate Causes of Sex Differences 116

Mammalian Sexual Differentiation 117

Anomalous Mammalian Sexual Differentiation 123

Avian Sexual Differentiation 130

Alternative Reproductive Tactics and Male Polymorphism 132

Environmental Sex Determination in Reptiles and Fishes 135

The Effects of Hormones on Sexually Dimorphic Behaviors 140

The Organizational/Activational Hypothesis 140

BOX 3.2 WILLIAM C. YOUNG 142

Sexual Differentiation and Behavior 151

The Role of Steroid Receptors 153

Conclusions 155

Environmental Influences on Mammalian Sexual Differentiation of the Nervous System 156

BOX 3.3 EPIGENETIC EFFECTS ON SEXUAL DIMORPHISM: DIRECT MATERNAL PROVISIONING OF STEROIDS TO OFFSPRING 158

Summary 164

Questions for Discussion 167

Suggested Readings 168

Chapter 4

Sex Differences in Behavior: Animal Models and Humans 169

Neural Bases of Mammalian Sex Differences 171

BOX 4.1 THE ORGANIZATION OF AVIAN COPULATORY BEHAVIOR 172

Molecular Sex Differences in the Brain 179

Animal Models for Sexually Dimorphic Behaviors 183

Bird Song 184

Courtship Behavior of the Plainfin Midshipman Fish 190

Urinary Posture in Canines 192

Courtship Behavior of Electric Fishes 195

Rough-and-Tumble Play in Primates 197

Sex Differences in Human Behavior 200

BOX 4.2 AMBIGUOUS GENITALIA: WHICH COURSE OF TREATMENT? 202

Gender Role 205

Gender Identity 208

Sexual Orientation/Sexual Preference 209

Sex Differences in Cognitive Abilities 212

BOX 4.3 HORMONAL INFLUENCES ON MATE CHOICE 212

BOX 4.4 THE SPINAL NUCLEUS OF THE BULBOCAVERNOSUS MUSCLE 214

Perception and Sensory Abilities 216

Lateralization of Cognitive Function 221

Verbal Skills 222

Mathematical Reasoning and Visuospatial Abilities 224

BOX 4.5 HORMONES, SEX DIFFERENCES, AND ART 228

Conclusions 229

Summary 230

Questions for Discussion 232

Suggested Readings 233

Chapter 5**Male Reproductive Behavior 235**

The Proximate Bases of Male Sexual Behavior 237

BOX 5.1 BATTLE OF THE "SEXES" 237

Historical Origins of Research on Male Sexual Behavior 240

Male Sexual Behavior in Rodents 245

Mating Behavior: A Description 245*Hormonal Correlates of Male Mating Behavior* 249

BOX 5.2 ANATOMY OF THE PENIS 255

Brain Mechanisms of Male Mating Behavior 257

BOX 5.3 ERECTILE DYSFUNCTION, NITRIC OXIDE, AND VIAGRA 274

Conclusions 277

Social Influences on Male Mating Behavior 277*Individual Differences in Male Mating Behavior* 281

Male Sexual Behavior in Primates 285

The Strength of the Sex Drive in Human Males 285*Human Male Sexual Behavior: A Description* 287*Nonhuman Primate Male Sexual Behavior: A Description* 289*Hormonal Correlates of Primate Male Sexual Behavior* 291*Brain Mechanisms of Primate Male Sexual Behavior* 296*Social Influences on Primate Male Sexual Behavior* 300*Individual Variation and Aging* 301*Peptide Hormones and Male Sexual Behavior* 302

BOX 5.4 SODEFRIN, A FEMALE-ATTRACTING PHEROMONE IN NEWTS 303

Male Reproductive Behavior in Birds 304

Male Reproductive Behavior in Reptiles 309

Conclusions 313

Summary 314

Questions for Discussion 316

Suggested Readings 316

Chapter 6**Female Reproductive Behavior 319**

Early Discoveries about Female Sexual Behavior 322

The Development of the Vaginal Cytological Assay 322*Research in the "Modern Era"* 327

Mammalian Female Mating Behavior:

A Description 329

Rodents 329

Canines 331

Primates 332

Are Females Active Participants in Sexual Behavior? 333

Components of Female Sexual Behavior 335

Attractivity 338

BOX 6.1 CHEMOSIGNALS AND COURTSHIP IN THE RED-SIDED GARTER SNAKE 340

Proceptivity 343*Receptivity* 344

Female Reproductive Cycles 351

Types of Reproductive Cycles 352

The Ecology of Reproductive Cycles 353

Social and Environmental Effects on Reproductive Cycles 357

BOX 6.2 HUMAN PHEROMONES 359

BOX 6.3 ILLNESS SUPPRESSES FEMALE SEXUAL BEHAVIOR 360

Experimental Analyses of Female Sexual Behavior 361

Hormonal Correlates of Female Reproductive Cycles 362

Neural Mechanisms Mediating Female Sexual Behavior 367

Gene Knockout Studies 375

A Neural Model of Lordosis 376

Neural Models of Proceptive Behaviors 378

BOX 6.4 NONGENOMIC BEHAVIORAL EFFECTS OF STEROID HORMONES 380

Summary 382

Questions for Discussion 385

Suggested Readings 385

Chapter 7

Parental Behavior 387

What Is Parental Behavior? 389

BOX 7.1 PARENTAL CARE AMONG INSECTS 392

Sex Differences in Parental Behavior 394

Parental Behavior in Birds 395

Avian Parental Behavior: A Description 395

Endocrine Correlates of Avian Parental Behavior 398

BOX 7.2 DANIEL S. LEHRMAN 400

Parental Behavior in Mammals 405

Mammalian Maternal Behavior 405

Mammalian Paternal Behavior 411

Endocrine Correlates of Mammalian Parental Behavior 413

The Onset of Maternal Behavior 417

Maternal Aggression 422

BOX 7.3 MATERNAL BEHAVIOR IN SHEEP 423

Maintenance and Termination of Maternal Behavior 425

BOX 7.4 OFFSPRING BEHAVIOR AND THE MAINTENANCE OF MATERNAL BEHAVIOR 428

Endocrine Correlates of Primate Maternal Behavior 431

Endocrine Correlates of Paternal Behavior 437

Neural Changes Associated with Parental Behavior 440

Conclusions 450

Summary 451

Questions for Discussion 453

Suggested Readings 454

Chapter 8

Hormones and Social Behavior 455

Affiliation 456

Imaging Studies of Humans 456

Adaptive Function of Affiliation 457

Hormones and Affiliation 458

Aggression 467

Seasonal Changes in Social Behavior 473

Aggression and the Breeding Cycle: Red Deer 473

Signals of Social Rank: Harris's Sparrows 475

Aggression and Winter Survival: Rodents 478

Testosterone and the Energetic Costs of Aggression: Lizards 481

Do Seasonal Hormonal Changes in Primates Correlate with Aggression? 482

Increases in Aggression at Puberty 483

Social Influences on the Development of Aggressive Behavior 484

Is It Adaptive for Rodents To Be Aggressive at Puberty? 485

The Timing of Puberty: Birds 486

Dispersal Strategies and Social Status in Primates 487

Sex Differences in Social Behavior 488

The Organization and Activation of Aggression: Mice 489

Sex Differences in Dispersal: Ground Squirrels 490

<i>Hormones and Dominance Status: Canines</i>	492
<i>Sex Differences in Play Behavior: Primates</i>	494
<i>Sex Role Reversals</i>	495
Individual Differences in Aggression	498
Social Experience Feeds Back to Influence Hormone Concentrations	499
<i>The Challenge Hypothesis: Birds</i>	500
<i>Conditioned Social Defeat</i>	507
<i>Hormones, Competition, and Violent Behavior: Humans</i>	508
Physiological Mechanisms Mediating Hormonal Effects on Aggressive Behavior	512
<i>Brain Regions Associated with Aggression</i>	512
<i>Brain Steroid Hormone Receptors</i>	513
<i>Brain Neurotransmitter Receptors</i>	515
BOX 8.1 NITRIC OXIDE AND AGGRESSION	516
Conclusions	518
Summary	518
Questions for Discussion	520
Suggested Readings	520

Chapter 9

Homeostasis and Behavior 523

Basic Concepts in Homeostasis	526
Fluid Balance	529
BOX 9.1 VERTEBRATE RENAL FUNCTION	530
<i>Endocrine Regulation of Fluid Balance and Thirst</i>	536
<i>Sodium Balance</i>	540
<i>How Do Hormones Regulate Drinking Behavior?</i>	544
Energy Balance	546
<i>Metabolism during the Well-Fed State</i>	547
<i>Metabolism during the Fasting State</i>	549
<i>Disordered Energy Metabolism</i>	551
<i>Maintaining a Normal Energy Balance</i>	552
Control of Food Intake	553
<i>Peripheral Signals</i>	554

<i>Central Signals: The Role of the Hypothalamus</i>	556
<i>Central Anabolic Effectors: Peptides that Promote Food Intake (Orexigenic)</i>	559
<i>Central Catabolic Effectors: Peptides that Inhibit Food Intake (Anorexigenic)</i>	562
<i>Hindbrain and Brain Stem</i>	563
<i>Protein Hormones that Stop Food Intake</i>	563
BOX 9.2 COMFORT FOOD	569
<i>Protein Hormones that Promote Food Intake</i>	570
<i>The Role of the Liver</i>	571
<i>Specific Hungers</i>	572
Food Intake and Body Mass	574
<i>Estrogens and Progestins</i>	574
<i>Androgens</i>	578
<i>Seasonal Body Mass Cycles</i>	579
<i>Inhibition of Reproduction to Maintain Energy Balance</i>	580
Final Thoughts	582
Summary	583
Questions for Discussion	584
Suggested Readings	585

Chapter 10

Biological Rhythms 587

Exogenous versus Endogenous Control of Biological Clocks	590
Types of Biological Clocks and Rhythms	591
BOX 10.1 JET LAG	598
<i>Examples of Biological Rhythms in Behavior</i>	601
<i>Usefulness of Biological Clocks</i>	606
Circadian Clocks	608
<i>Localization and Characterization of Circadian Clocks</i>	608
<i>Molecular Mechanisms of Circadian Clocks</i>	610
<i>The SCN as Master Circadian Clock</i>	613
<i>SCN Inputs and Outputs</i>	617

**BOX 10.2 EFFECTS OF LIGHT ON GENE
TRANSCRIPTION 621**

- Effects of Hormones on the SCN* 626
- Effects of the SCN on Hormones* 628
- Circadian Regulation of Food Intake* 634

- Circannual and Seasonal Rhythms 636**
 - Ultimate and Proximate Factors Underlying Seasonality* 637
 - Neuroendocrine Mechanisms Underlying Seasonality* 640
 - Timing Mechanisms* 641
 - Neural Mechanisms of Endogenous and Exogenous Seasonal Timekeeping* 646
 - Activational Mechanisms* 650

- Conclusions 664**
- Summary 665**
- Questions for Discussion 666**
- Suggested Readings 667**

Chapter 11 Stress 669

- Stress and Its Consequences 670**
 - The Stress Response* 672

**BOX 11.1 STRESS AND SOCIAL DOMINANCE IN
NONHUMAN PRIMATES 673**

- General Adaptation Syndrome* 678
- What Is "Stress"?* 679

BOX 11.2 ALLOSTATIC LOAD 680

- Physiological Effects of the Stress Response 681**
- Pathological Effects of the Stress Response 685**
- Factors that Affect Stress Responsiveness 689**
 - Perinatal Stress* 689
 - Reproductive Dysfunction* 700
- Stress and Social Behavior 707**
- Seasonal Fluctuations in Stress Responses 710**
- Psychological Factors in Stress and Coping 714**
 - Control, Predictability, and Outlets for Frustration* 715

- Stress and Drug Abuse 717**
- Summary 718**
- Questions for Discussion 719**
- Suggested Readings 720**

Chapter 12 Learning and Memory 721

- Components of Learning and Memory 722**
 - Non-Associative Learning* 722
 - Associative Learning* 723
 - Memory* 726
- The Effects of Stress Hormones on Learning and Memory 729**
 - Epinephrine* 729
 - Glucocorticoids* 740
- Sex Differences in Learning and Memory 749**
 - Effects of Estrogens* 752
 - Effects of Androgens* 756
- The Effects of Peptide Hormones in Learning and Memory 758**
 - Adrenocorticotrophic Hormone (ACTH)* 758
 - Vasopressin and Oxytocin* 761
 - Opioids* 763
 - Cholecystokinin* 767
- Summary 768**
- Questions for Discussion 770**
- Suggested Readings 770**

Chapter 13 Hormones and Affective Disorders 773

- Perimenstrual Syndrome 774**
 - The Social Context of PMS* 774
 - What Is PMS?* 776
- BOX 13.1 DIAGNOSTIC CRITERIA FOR LATE
LUTEAL PHASE DYSPHORIC DISORDER 778**
- Hormonal Correlates of PMS* 780
- Cognitive Features of PMS* 786
- Hormones and Depression 787**
 - Endocrine Correlates of Depression* 788
 - Postpartum Depression* 792

<i>Seasonal Affective Disorder</i>	794
Hormones and Eating Disorders	803
<i>Anorexia Nervosa</i>	803
<i>Bulimia</i>	806
Androgens and Affective Disorders	806
BOX 13.2 ANABOLIC STEROIDS: AN EDGE THAT CUTS TWO WAYS	808
Summary	813
Questions for Discussion	815
Suggested Readings	816

Appendix: Hormones 817**Glossary G-1****Illustration Credits IC-1****References R-1****Index I-1**
