

Contents

Preface, vii

Symmetry Breaking in Biology, 1

Rong Li and Bruce Bowerman

Cytoskeletal Mechanisms for Breaking Cellular Symmetry, 7

R. Dyche Mullins

Widely Conserved Signaling Pathways in the Establishment of Cell Polarity, 23

Luke Martin McCaffrey and Ian G. Macara

Membrane Organization and Dynamics in Cell Polarity, 41

Kelly Orlando and Wei Guo

Physical Model of Cellular Symmetry Breaking, 59

Jasper van der Gucht and Cécile Sykes

Cellular Polarity in Prokaryotic Organisms, 71

Jonathan Dworkin

Shaping Fission Yeast with Microtubules, 85

Fred Chang and Sophie G. Martin

Symmetry Breaking in the Life Cycle of the Budding Yeast, 99

Brian D. Slaughter, Sarah E. Smith, and Rong Li

Cellular Symmetry Breaking During *Caenorhabditis elegans* Development, 117

Edwin Munro and Bruce Bowerman

Polarization of *Drosophila* Neuroblasts During Asymmetric Division, 137

Kenneth E. Prehoda

Polarity in Stem Cell Division: Asymmetric Stem Cell Division in Tissue Homeostasis, 149

Yukiko M. Yamashita, Hebao Yuan, Jun Cheng, and Alan J. Hunt

Symmetry Breaking in Plants: Molecular Mechanisms Regulating Asymmetric Cell Divisions in *Arabidopsis*, 163

Jalean J. Petricka, Jaimie M. Van Norman, and Philip N. Benfey

Contents

The Signaling Mechanisms Underlying Cell Polarity and Chemotaxis, 181

Fei Wang

Remodeling Epithelial Cell Organization: Transitions Between Front–Rear and Apical–Basal Polarity, 197

W. James Nelson

Neuronal Polarity, 217

Sabina Tahirovic and Frank Bradke

Planar Cell Polarity Signaling: The Developing Cell's Compass, 235

Eszter K. Vladar, Dragana Antic, and Jeffrey D. Axelrod

Symmetry Breaking During *Drosophila* Oogenesis, 255

Siegfried Roth and Jeremy A. Lynch

Left–Right Determination: Involvement of Molecular Motor KIF3, Cilia, and Nodal Flow, 277

Nobutaka Hirokawa, Yosuke Tanaka, and Yasushi Okada

Index, 293
