<i>Foreword by Azim Surani</i>	xxv
<i>Preface</i>	xxvii
I Basics of chromatin biology and biochemistry	1
1 Introduction to epigenomics	
Krishnarao Appasani and Raghu K. Appasani	3
2 Epigenetics and its historical perspectives	
Robin Holliday	19
3 Functional networks of human epigenetic factors	
Andrey Poleshko, Natalia Shalginskikh, and Richard A. Katz	30
4 Nucleosome positioning in promoters: significance and open questions	
Jun S. Song and David E. Fisher	47
5 Chemical reporters of protein methylation and acetylation	
Markus Grammel, Yu-Ying Yang, and Howard C. Hang	60
6 Long non-coding RNA in epigenetic gene silencing	
Takashi Nagano	73
II Epigenomic imprinting and stem cells	89
7 Active DNA demethylation: the enigma starts in the zygote	
Julia Arand, Konstantin Lepikhov, Mark Wossidlo, and Jörn Walter	91
8 Histone modifications of lineage-specific genes in human embryonic stem cells during in vitro differentiation	
Hyemin Kim, Hogyu Seo, Daeyoup Lee, and Yong-Mahn Han	104
9 Epigenetic stability of human pluripotent stem cells	
Céline Vallot and Claire Rougeulle	118
10 Impact of CpG methylation in addressing adipose-derived stem cell differentiation towards the cardiac phenotype	
Alice Pasini, Francesca Bonafè, Emanuela Fiumana, Carlo Guarnieri, Paolo G. Morselli, Carlo M. Oranges, Claudio M. Caldarera, Claudio Muscari, and Emanuele Giordano	134

11	Regulation of the stem cell epigenome by REST	
	Angela Bithell and Noel J. Buckley	146
12	MicroRNAs in embryonic stem cells	
	Shari Orlanski and Yehudit Bergman	163
13	Regulation of timing of replication	
	Rituparna Mukhopadhyay and Eric E. Bouhassira	179
III	Epigenomic assays and sequencing technology	195
14	Detection of CpG methylation patterns by affinity capture methods	
	Luis G. Acevedo, Ana Sanz, Dylan Maixner, Kornel Schuebel, Mary A. Jelinek, David Goldman, and Joseph M. Fernandez	197
15	Genome-wide ChIP-DSL profiling of promoter methylation patterns associated with cancer and stem cell differentiation	
	Jeffrey D. Falk	210
16	Quantitative, high-resolution CpG methylation assays on the pyrosequencing platform	
	Dirk Löffert, Ralf Peist, Thea Rütjes, Norbert Hochstein, Dorothee Honsel, Frank Narz, Ioanna Andreou, Richard Kroon, Andreas Missel, Andrea Linnemann-Florl, Lennart Suckau, and Gerald Schock	223
17	DNA methylation profiling using Illumina BeadArray platform	
	Marina Bibikova, Jian-Bing Fan, and Kevin L. Gunderson	235
18	Advances in capillary electrophoresis-based methods for DNA methylation analysis	
	Benjamin G. Schroeder, Victoria L. Boyd, and Gerald Zon	249
19	Genome-wide methylome analysis based on new high-throughput sequencing technology	
	Mingzhi Ye, Fei Gao, Xu Han, Guanyu Ji, Zhixiang Yan, and Honglong Wu	260
20	Three-dimensional quantitative DNA methylation imaging for chromatin texture analysis in pharmacoeugenomics and toxicoeugenomics	
	Jian Tajbakhsh and Arkadiusz Gertych	273
IV	Epigenomics in disease biology	291
21	Cancer classification by genome-wide and quantitative DNA methylation analyses	
	Atsushi Kaneda	293
22	Promoter CpG island methylation in colorectal cancer: biology and clinical applications	
	Sarah Derks and Manon van Engeland	306
23	The epigenetic profile of bladder cancer	
	Ewa Dudzic and James W. F. Catto	323
24	Genome-scale DNA methylation analyses of cancer in children	
	Nicholas C. Wong and David M. Ashley	338
25	The epigenetics of facioscapulohumeral muscular dystrophy	
	Weihua Zeng, Alexander R. Ball, Jr., and Kyoko Yokomori	347
26	Modulating histone acetylation with inhibitors and activators	
	B. Ruthrotha Selvi, D. V. Mohankrishna, and Tapas K. Kundu	362

V Epigenomics in neurodegenerative diseases	389
27 Study design considerations in epigenetic studies of neuropsychiatric disease Fatemeh Haghighi, Sephorah Zaman, and Yurong Xin	391
28 Epigenetic regulation in human neurodevelopmental disorders including autism, Rett syndrome, and epilepsy Laura B. K. Fiering	404
29 The neurobiology of chromatin-associated mechanisms in the context of psychosis and mood spectrum disorders Schahram Akbarian	420
30 Genome-wide DNA methylation analysis in patients with familial ATR-X mental retardation syndrome Gemma Carvill and Andrew Sharp	434
31 Kinases and phosphatases in the epigenetic regulation of cognitive functions Tamara B. Franklin and Isabelle M. Mansuy	447
VI Epigenetic variation, polymorphism, and epidemiological perspectives	459
32 Epigenetic effects of childhood abuse on the human brain Benoit Labonté and Gustavo Turecki	461
33 X-linked expressed single nucleotide polymorphisms and dosage compensation Lygia V. Pereira and Joana C. Moreira de Mello	483
34 Epigenomic diversity of colorectal cancer Aditi Hazra and Shuji Ogino	491
35 Epigenetic epidemiology: transgenerational responses to the environment Lars Olov Bygren	505
Index	514

The colour plates are to be found between pages 162 and 163
