	<i>Acknowledgments</i>	xv
	Introduction	1
	Klaus Rohde	
	Part I Nonequilibrium and Equilibrium in Populations and Metapopulations	5
1	Reef fishes: density dependence and equilibrium in populations?	7
	Graham E. Forrester and Mark A. Steele	
2	Population dynamics of ectoparasites of terrestrial hosts	21
	Boris R. Krasnov and Annapaola Rizzoli	
3	Metapopulation dynamics in marine parasites	35
	Ana Pérez-del-Olmo, Aneta Kostadinova and Serge Morand	
	Part II Nonequilibrium and Equilibrium in Communities	49
4	The paradox of the plankton	51
	Klaus Rohde	
5	A burning issue: community stability and alternative stable states in relation to fire	63
	Peter J. Clarke and Michael J. Lawes	
6	Community stability and instability in ectoparasites of marine and freshwater fish	75
	Andrea Šimková and Klaus Rohde	
7	Ectoparasites of small mammals: interactive saturated and unsaturated communities	89
	Boris R. Krasnov	
8	A macroecological approach to the equilibrial vs. nonequilibrial debate using bird populations and communities	103
	Brian McGill	

Part III	Equilibrium and Nonequilibrium on Geographical Scales	119
9	Island flora and fauna: equilibrium and nonequilibrium Lloyd W. Morrison	121
10	The dynamic past and future of arctic vascular plants: climate change, spatial variation and genetic diversity Christian Brochmann, Mary E. Edwards and Inger G. Alsos	133
Part IV	Latitudinal Gradients	153
11	Latitudinal diversity gradients: equilibrium and nonequilibrium explanations Klaus Rohde	155
12	Effective evolutionary time and the latitudinal diversity gradient Len N. Gillman and Shane D. Wright	169
Part V	Effects Due to Invading Species, Habitat Loss and Climate Change	181
13	The physics of climate: equilibrium, disequilibrium and chaos Michael Box	183
14	Episodic processes, invasion and faunal mosaics in evolutionary and ecological time Eric P. Hoberg and Daniel R. Brooks	199
15	The emerging infectious diseases crisis and pathogen pollution Daniel R. Brooks and Eric P. Hoberg	215
16	Establishment or vanishing: fate of an invasive species based on mathematical models Yihong Du	231
17	Anthropogenic footprints on biodiversity Camilo Mora and Fernando A. Zapata	239
18	Worldwide decline and extinction of amphibians Harold Heatwole	259
19	Climatic change and reptiles Harvey B. Lillywhite	279
20	Equilibrium and nonequilibrium in Australian bird communities – the impact of natural and anthropogenic effects Hugh A. Ford	295
21	Population dynamics of insects: impacts of a changing climate Nigel R. Andrew	311
22	The futures of coral reefs Peter F. Sale	325

Part VI Autecological Studies	335
23 Autecology and the balance of nature – ecological laws and human-induced invasions	337
G. H. Walter	
24 The intricacy of structural and ecological adaptations: micromorphology and ecology of some Aspidogastrea	357
Klaus Rohde	
Part VII An Overall View	369
25 The importance of interspecific competition in regulating communities, equilibrium vs. nonequilibrium	371
Klaus Rohde	
26 Evolutionarily stable strategies: how common are they?	385
Klaus Rohde	
27 How to conserve biodiversity in a nonequilibrium world	393
Klaus Rohde, Hugh Ford, Nigel R. Andrew and Harold Heatwole	
<i>Index</i>	407
