Foreword [xvii]

Alan K. Whitfield

Preface [xxi]

Acknowledgements [xxv]

1 South Africa's first World Heritage Site [1]

Roger N. Porter

- 1.1 Introduction [1]
- 1.2 Early efforts to protect Lake St Lucia: 1895–1947 [2]
- 1.3 Lake St Lucia under divided management: 1947–2001 [6]
- 1.4 The controversial 'St Lucia' dune mining proposal [10]
- 1.5 Decision of the South African Cabinet [12]
- 1.6 Towards World Heritage Site listing [13]
- 1.7 Outstanding universal values [14]
- 1.8 Strengthening conservation measures [16]
- 1.9 Future management imperatives [18]
- 1.10 Conclusions [18]

2 Management history [21]

Ricky H. Taylor

- 2.1 Introduction [21]
- 2.2 1850s to 1950s: drainage of the Mfolozi floodplain [21]
- 2.3 1951–1960: closure of the combined Mfolozi–St Lucia Mouth [28]
- 2.4 1960–1968: stabilization of the St Lucia Mouth [30]
- 2.5 1968–1972: severe drought and the canal in the Mkhuze Swamps [33]
- 2.6 1973–1984: hydrological model and the Mfolozi Link Canal [35]
- 2.7 1984–2000: Cyclone Domoina and its aftermath [38]
- 2.8 2000 to present: the current drought [40]
- 2.9 Future management [42]
- 2.10 Assessment and lessons [44]

3 Geological history [47]

Greg A. Botha, Sylvi Haldorsen and Naomi Porat

- 3.1 Introduction [47]
- 3.2 Synthesis of the geological evolution of the St Lucia basin [48]
- 3.3 The late Pleistocene and Holocene evolution of the St Lucia basin [51]
- 3.4 Evaluation of St Lucia sedimentation [57]
- 3.5 Conclusions [61]

4 The marine environment [63]

Allan D. Connell and Sean N. Porter

- 4.1 Introduction [63]
- 4.2 The Agulhas Current [63]
- 4.3 Inshore waters and currents [65]
- 4.4 The Central Shelf [67]
- 4.5 Marine influences on St Lucia Mouth condition [67]
- 4.6 Coastal productivity, nutrients, zooplankton and fish [68]
- 4.7 Adult fish migrations offshore in relation to St Lucia Estuary [70]
- 4.8 Offshore canyons and their potential impact on St Lucia Estuary [72]
- 4.9 Coastal biogeography [73]

5 Catchment hydrology [77]

Derek D. Stretch and Andrew Z. Maro

- 5.1 Introduction [77]
- 5.2 Hydrological context [78]
- 5.3 Annual average runoff and sediment yields [83]
- 5.4 Modelling the impact of land-use changes in the Mfolozi catchment [83]
- 5.5 Management implications [92]
- 5.6 Conclusions [92]

6 The wetlands [95]

William N. Ellery, Suzanne E. Grenfell, Michael C. Grenfell, Marc S. Humphries and Kirsten B. Barnes

- 6.1 Introduction [95]
- 6.2 Connectivity of coastal plain wetlands and Lake St Lucia [95]
- 6.3 Diversity and hydrogeomorphology of freshwater wetlands on the coastal plain [96]
- 6.4 Floodplains of the coastal plain and their relationship with Lake St Lucia [97]

- 6.5 Valley-bottom wetlands: blocked valley lakes and wetlands [104]
- 6.6 Depression wetlands on the coastal plain [109]
- 6.7 Connectivity revisited: a framework for examining artificial impacts to wetlands [109]
- 6.8 Future landscape development [111]
- 6.9 Conclusion [111]

7 Estuary and lake hydrodynamics [113]

Derek D. Stretch, Clinton P. Chrystal, Robynne A. Chrystal, Christopher M. Maine and Justin J. Pringle

- 7.1 Introduction [113]
- 7.2 The water and salt budgets in different management scenarios [116]
- 7.3 Wind-driven flows, waves and mixing [126]
- 7.4 Tidal inlet hydrodynamics and morphodynamics [130]
- 7.5 Sediment dynamics in the St Lucia/Mfolozi complex [135]
- 7.6 Modelling the outcomes of management interventions [140]
- 7.7 Links between physical and biological functioning [143]
- 7.8 Summary and conclusions [148]

8 Groundwater hydrology [151]

Bruce E. Kelbe, Ricky H. Taylor and Sylvi Haldorsen

- 8.1 Introduction [151]
- 8.2 Hydrogeological setting [151]
- 8.3 Groundwater distribution and utilization [153]
- 8.4 Groundwater characteristics [155]
- 8.5 Groundwater recharge [158]
- 8.6 Groundwater discharge [160]
- 8.7 Groundwater seepage [162]
- 8.8 Evaporation and land use [164]
- 8.9 The dependence of Lake St Lucia on groundwater [164]
- 8.10 Mplate River catchment [166]
- 8.11 Lessons learnt about groundwater which can be applied to other systems [167]

9 Physico-chemical environment [169]

Renzo Perissinotto, Nicola K. Carrasco and Ricky H. Taylor

- 9.1 Introduction [169]
- 9.2 Water depths and system partitioning [170]
- 9.3 Salinity [172]
- 9.4 Temperature [175]

- 9.5 Turbidity [176]
- 9.6 Irradiance [177]
- 9.7 pH [177]
- 9.8 Dissolved oxygen [178]
- 9.9 Nutrient concentration [179]
- 9.10 Sediment composition and size structure [182]
- 9.11 Temporal variability and states of the St Lucia system [183]

10 Microalgae [187]

Renzo Perissinotto, Guy C. Bate and David G. Muir

- 10.1 Introduction [187]
- 10.2 Diversity and community structure [188]
- 10.3 Biomass [200]
- 10.4 Productivity [203]
- 10.5 Exceptional blooms [205]

11 Macrophytes [209]

Janine B. Adams, Sibulele Nondoda and Ricky H. Taylor

- 11.1 Introduction [209]
- 11.2 Distribution of macrophytes [209]
- 11.3 Abiotic factors and macrophyte response [213]
- 11.4 Recent studies on response to drought and mouth closure [217]
- 11.5 Summary of changes in macrophyte habitats [220]
- 11.6 Conservation and management [223]
- 11.7 Future research [224]

12 Benthic invertebrates [227]

Deena Pillay, Sarah J. Bownes and Holly A. Nel

- 12.1 Introduction [227]
- 12.2 Benthic macrofauna [227]
- 12.3 Meiofauna [240]
- 12.4 Ecological importance of benthic fauna [242]
- 12.5 Conclusion [244]

13 Zooplankton [247]

Nicola K. Carrasco, Renzo Perissinotto and Hendrik L. Jerling

- 13.1 Introduction [247]
- 13.2 Diversity and community structure [248]

- 13.3 Abundance and biomass [255]
- 13.4 Mfolozi–St Lucia link [256]
- 13.5 Opportunistic species [258]
- 13.6 Trophic interactions [261]
- 13.7 System threats [263]

14 Penaeid prawns [269]

Anthony T. Forbes and Nicolette T. Forbes

- 14.1 Introduction [269]
- 14.2 Penaeid diversity and distribution [270]
- 14.3 Prawns in South Africa: species, distribution, life cycles and biology [271]
- 14.4 Immigration and emigration: movement, dispersal and origin of South African prawns [274]
- 14.5 Population dynamics [277]
- 14.6 The estuarine bait fisheries [278]
- 14.7 Ecological significance of prawns in the St Lucia system [286]
- 14.8 Status and threats to the major nursery grounds and the offshore habitat: the future of South African prawn stocks [288]

15 Fish and fisheries [291]

Digby P. Cyrus

- 15.1 Introduction [291]
- 15.2 Fish fauna of St Lucia [291]
- 15.3 Species distribution related to physical factors [300]
- 15.4 Reproduction [305]
- 15.5 Nursery function of St Lucia for fish [305]
- 15.6 Predation on the fish fauna [306]
- 15.7 Effect of episodic events on the fish fauna [306]
- 15.8 Extensive closure and effect on the meta-system [310]
- 15.9 Fisheries [311]
- 15.10 Importance of St Lucia for fish [314]

16 Birds [317]

Jane Turpie, Ricky H. Taylor, Meyrick B. Bowker and Caroline Fox

- 16.1 Introduction [317]
- 16.2 Bird abundance and diversity [318]
- 16.3 Avian ecology and seasonal patterns of use [319]
- 16.4 Spatial distribution of birds [323]
- 16.5 Interannual variation in abundance and community composition [323]

- 16.6 The role of the estuary in a regional context [327]
- 16.7 Health status of the avifaunal community [328]
- 16.8 Conserving St Lucia birdlife [329]

17 Crocodiles [333]

Xander Combrink, Jonathan K. Warner and Colleen T. Downs

- 17.1 Introduction [333]
- 17.2 The St Lucia estuarine system's physical environment [334]
- 17.3 Population size and distribution [334]
- 17.4 Nesting [340]
- 17.5 Diet and feeding behaviour [342]
- 17.6 Movements [343]
- 17.7 Threats [349]
- 17.8 Conclusions [350]

18 Hippopotamuses [355]

Ricky H. Taylor

- 18.1 Introduction [355]
- 18.2 Hippo distribution patterns [355]
- 18.3 Distribution maps [357]
- 18.4 St Lucia hippo population size and trends [359]
- 18.5 Hippo impacts on the environment [361]
- 18.6 Management of the St Lucia hippo population [364]
- 18.7 Research [365]
- 18.8 Conservation of hippos in Africa [365]

19 Alien and invasive species [367]

Nelson A. F. Miranda and Janine B. Adams

- 19.1 Introduction [367]
- 19.2 Biodiversity and invasibility [368]
- 19.3 Perceived threats [369]
- 19.4 Management challenges [379]

20 Food webs and ecosystem functioning [381]

Ursula M. Scharler and C. Fiona MacKay

- 20.1 Introduction [381]
- 20.2 Food webs [383]
- 20.3 Ecosystem states in the St Lucia estuarine system [395]

21 Climate change impacts [397]

Andrew A. Mather, Derek D. Stretch and Andrew Z. Maro

21.1 Introduction [397]

21.2 Ocean-based processes [397]

21.3 Terrestrial-based processes [402]

21.4 Processes at the land-ocean interface [404]

21.5 Synthesis of key climate change effects [409]

21.6 Summary and conclusions [412]
