

TABLE OF CONTENTS.

PART I. GENERAL.

CHAPTER I.

HISTORICAL SKETCH. Pp. 1—11.

Fossil plants and the Flood. Sternberg and Brongniart. The internal structure of fossil plants. English Palaeobotanists. Difficulties of identification.

CHAPTER II.

RELATION OF PALAEOBOTANY TO BOTANY AND GEOLOGY. Pp. 12—21.

Neglect of fossils by Botanists. Fossil plants and distribution. Fossil plants and climate. Fossil plants and phylogeny.

CHAPTER III.

GEOLOGICAL HISTORY. Pp. 22—53.

Rock-building. Calcareous rocks. Geological sections. Inversion of strata. Table of Strata :

I. Archæan, 34—36. II. Cambrian, 36—37. III. Ordovician, 37—38. IV. Silurian, 38. V. Devonian, 39. VI. Carboniferous, 39—45. VII. Permian, 45—47. VIII. Trias, 47—48. IX. Jurassic, 48—49. X. Cretaceous, 50—51. XI. Tertiary, 51—53. Geological Evolution.

CHAPTER IV

THE PRESERVATION OF PLANTS AS FOSSILS.

Pp. 54—92.

Old surface-soils. Fossil wood. Conditions of fossilisation. Drifting of trees. Meaning of the term 'Fossil.' Incrustations. Casts of trees. Fossil casts. Plants and coal. Fossils in half-relief. Petrified trees. Petrified wood. Preservation of tissues. Coal-balls. Fossil nuclei. Fossil plants in volcanic ash. Conditions of preservation.

CHAPTER V.

DIFFICULTIES AND SOURCES OF ERROR IN THE DETERMINATION OF FOSSIL PLANTS. Pp. 93—109.

External resemblance. Venation characters. Decorticated stems. Imperfect casts. Mineral deposits simulating plants. Traces of wood-borers in petrified tissue. Photography and illustration.

CHAPTER VI.

NOMENCLATURE. Pp. 110—115.

Rules for nomenclature. The rule of priority. Terminology and convenience.

PART II. SYSTEMATIC.

CHAPTER VII.

THALLOPHYTA. Pp. 116—228.

	PAGE
I. PERIDINIALES	117-118
II. COCCOSPHERES AND RHABDOSPHERES	118-121
III. SCHIZOPHYTA	121-138
1. SCHIZOPHYCEAE (CYANOPHYCEAE)	122-132
<i>Girvanella</i> 124-126. Borings in shells 127-129.	
<i>Zonatrichites</i> 129-130.	
2. SCHIZOMYCETES (BACTERIA)	132-138
<i>Bacillus Permicus</i> 135-136. <i>B. Tieghemi</i> and <i>Micro-</i>	
<i>coccus Guignardi</i> 136. Fossil Bacteria 137-138.	
IV. ALGAE	138-205
Scarcity of fossil algae. Fossils simulating Algae. Re-	
cognition of fossil algae. <i>Algites</i> &c.	
A. DIATOMACEAE	150-156
Recent Diatoms. Fossil Diatoms. <i>Bactryllium</i> &c.	
B. CHLOROPHYCEAE	156-178
a. SIPHONEAE	157-177
a. Caulerpaceae	157-159
β. Codiaceae	159-164
<i>Codium</i> 159-160. <i>Sphaerocodium</i> 160. <i>Peni-</i>	
<i>cillus</i> 161. <i>Ovulites</i> 161-164. <i>Halimeda</i>	
164.	
γ. Dasycladaceae	164-177
<i>Acetabularia</i> 165-166. <i>Acicularia</i> 166-169.	
<i>Cymopolia</i> 169-171. <i>Vermiporella</i> 172-	
173. <i>Sycidium</i> 173. <i>Diplopore</i> 174-175.	
<i>Gyroporella</i> 175. <i>Dactylopora</i> , Palaeozoic	
and Mesozoic Siphoneae 175-177.	
b. CONFERVOIDEAE	177-178
INCERTAE SEDIS	178-183
Boghead 'Coal.' <i>Reinschia</i> 180-181. <i>Pila</i> 181-182.	
C. RHODOPHYCEAE	183-190
CORALLINACEAE	183-190
<i>Lithothamnion</i> 185-189. <i>Solenopora</i> 189-190.	

	PAGE
D. PHAEOPHYCEAE	191-202
<i>Nematophycus</i>	192-202
<i>Pachytheca</i>	202-204
<i>Algites</i>	204-205
V. MYXOMYCETES (MYCETOZOA)	205-206
<i>Myxomycetes Mangini</i> 206.	
VI. FUNGI	207-222
ASCOMYCETES. BASIDIOMYCETES.	
Pathology of fossil tissues. <i>Oochytrium Lepido-</i>	
<i>dendri</i> 216-217. <i>Peronosporites antiquarius</i>	
217-220. <i>Cladosporites bipartitus</i> 220. <i>Hap-</i>	
<i>tographites cateniger</i> 220. <i>Zygosporites</i> 220-221.	
<i>Polyporus vaporarius</i> 221.	
VII. CHAROPHYTA	222-228
CHAREAE	223-228
<i>Chara</i> 225-228. <i>C. Bleicheri</i> 226. <i>C. Knowltoni</i>	
226-227. <i>C. Wrighti</i> 227.	

CHAPTER VIII.

BRYOPHYTA. Pp. 229-241.

HEPATICAEE	230-236
<i>Marchantites</i> 233-235. <i>M. Sezannensis</i> 234-235.	
MUSCI	236-241
<i>Muscites</i> 238-241. <i>M. polytrichaceus</i> 239-240. Palaeo-	
zoic Mosses. <i>Muscites ferrugineus</i> 241.	

CHAPTER IX.

PTERIDOPHYTA (VASCULAR CRYPTOGRAMS).

Pp. 242-294.

EQUISETALES (RECENT)	244-254
EQUISETACEAE	244-254
<i>Equisetum</i> 246-254.	

	PAGE
FOSSIL EUISETALES	254-294
<i>Equisetites</i> 257-281.	
<i>Equisetites Hemingwayi</i> 263-264. <i>E. spatulatus</i>	
264-266. <i>E. zaeformis</i> 266. <i>E. arenaceus</i> 268-269.	
<i>E. columnaris</i> 269-270. <i>E. Beani</i> 270-275. <i>E.</i>	
<i>lateralis</i> 275-279. <i>E. Burchardti</i> 279-280.	
<i>Phyllothea</i> 281-291.	
<i>Phyllothea deliquescens</i> 283-284. <i>P. Brongniarti</i>	
286-287. <i>P. indica</i> and <i>P. australis</i> 287-289.	
<i>Schizoneura</i> 291-294.	
<i>S. gondwanensis</i> 292-293.	

CHAPTER X.

EUISETALES (continued). Pp. 295-388.

<i>Calamites</i>	295-383
I. Historical sketch	295-302
II. Description of the anatomy of <i>Calamites</i>	302-364
a. Stems	304-329
<i>Arthropitys</i> , <i>Arthrodendron</i> , and <i>Calamodendron</i> .	
b. Leaves	329-342
a. <i>Calamocladus</i> (<i>Asterophyllites</i>) 332-336. <i>C.</i>	
<i>equisetiformis</i> 335-336.	
b. <i>Annularia</i> 336-342. <i>A. stellata</i> 338-340. <i>A.</i>	
<i>sphenophylloides</i> 341-342.	
c. Roots	342-349
d. Cones	349-365
<i>Calamostachys Binneyana</i> 351-355. <i>C. Casheana</i>	
355-357. <i>Palaeostachya vera</i> 358-360. <i>Calamostachys</i> ,	
<i>Palaeostachya</i> and <i>Macrostachya</i>	
361-364.	
III. Pith-casts of <i>Calamites</i>	365-380
<i>Calamitina</i> 367-374. <i>Calamites</i> (<i>Calamitina</i>)	
<i>Göpperti</i> 372-374. <i>Stylocalamites</i> 374-376. <i>C.</i>	
(<i>Stylocalamites</i>) <i>Suckowi</i> 374-376. <i>Eucalamites</i>	
376-379. <i>C. (Eucalamites) cruciatus</i> 378-379.	
IV. Conclusion	381-383
<i>Archaeocalamites</i>	383-388
<i>A. scrobiculatus</i> 386-387.	

CHAPTER XI.

SPHENOPHYLLALES. Pp. 389—414.

	PAGE
<i>Sphenophyllum</i>	389-414
I. The anatomy of <i>Sphenophyllum</i>	392-406
a. Stems	392-398
<i>Sphenophyllum insigne</i> and <i>S. plurifoliatum</i> 397-398.	
b. Roots	399
c. Leaves	399
d. Cones	401-406
<i>Sphenophyllostachys Dawsoni</i> 402-405. <i>S. Römeri</i> 405-406.	
II. Types of vegetative Branches of <i>Sphenophyllum</i>	407-412
<i>Sphenophyllum emarginatum</i> 407-408. <i>S. trichoma-</i> <i>tosum</i> 408-409. <i>S. Thoni</i> 410-411. <i>S. speciosum</i> 411-412.	
III. Affinities, Range and Habit of <i>Sphenophyllum</i>	412-414
