

CONTENTS.

BOOK I.

GENERAL MORPHOLOGY.

CHAPTER I.

Morphology of the Cell.

	PAGE
Sect. 1. Preliminary Inquiry into the Nature of the Cell	1
" 2. Difference in the Forms of Cells	5
" 3. Formation of Cells	7
" 4. The Cell-Wall	19
" 5. Protoplasm and Nucleus	37
" 6. The Chlorophyll-Bodies and similar Protoplasmic Structures	45
" 7. Crystalloids	49
" 8. Grains of Aleurone (Proteine-grains)	51
" 9. Starch Grains	56
" 10. The Cell-sap	62
" 11. Crystals in the Cells of Plants	64

CHAPTER II.

Morphology of Tissues.

Sect. 12. Definition	68
" 13. Formation of the Common Wall of Cells combined into a Tissue	70
" 14. Forms and Systems of Tissues	77
" 15. The Epidermal Tissue	79
" 16. The Fibro-vascular Bundles	92
" 17. The Fundamental Tissue	102
" 18. Laticiferous and Vesicular Vessels; Sap-conducting Intercellular Spaces; Glands	109
" 19. The Primary Meristem and the Apical Cell	117

CHAPTER III.

Morphology of the External Conformation of Plants.

	PAGE
Sect. 20. Difference between Members and Organs. Metamorphosis	128
„ 21. Leaves and Leaf-forming Axes	131
„ 22. Hairs (Trichomes)	138
„ 23. The Root	140
„ 24. Various Origin of Equivalent Members	148
„ 25. Different Capacity for Development of the Members of one Branch-system	155
„ 26. The Relative Positions of Lateral Members on a Common Axis	166
„ 27. Directions of Growth	182
„ 28. Characteristic Forms of Leaves and Shoots	190
„ 29. Alternation of Generations	202

BOOK II.

SPECIAL MORPHOLOGY

AND OUTLINES OF CLASSIFICATION.

Group I. Thallophytes	207
Class 1. Algæ	208
„ 2. Fungi	238
Group II. Characeæ	278
Class 3. Characeæ	278
Group III. Muscineæ	292
Class 4. Hepaticæ	296
„ 5. Mosses	311
Group IV. Vascular Cryptogams	335
Class 6. Ferns	340
„ 7. Equisetaceæ	362
„ 8. Ophioglossaceæ	378
„ 9. Rhizocarpeæ	383
„ 10. Lycopodiaceæ	400
Group V. Phanerogams	421
Class 11. Gymnosperms	433
Sub-group. Angiosperms	466
Class 12. Monocotyledons	541
„ 13. Dicotyledons	556

BOOK III.

PHYSIOLOGY.

CHAPTER I.

Molecular Forces in the Plant.

	PAGE
Sect. 1. The Condition of Aggregation of Organised Structures	587
" 2. Movement of Water in Plants	598
" 3. Movements of Gases in Plants	614

CHAPTER II.

Chemical Processes in the Plant.

Sect. 4. The Elementary Constituents of the Food of Plants	618
" 5. Assimilation and Metastasis	626
" 6. The Respiration of Plants	644

CHAPTER III.

General Conditions of Plant-life.

Sect. 7. The Influence of Temperature on Vegetation	647
" 8. Action of Light on Vegetation	659
" 9. Electricity	687
" 10. Action of Gravitation on the Processes of Vegetation	690

CHAPTER IV.

The Mechanical Laws of Growth.

Sect. 11. Definition	692
" 12. Various Causes of Growth	695
" 13. General Properties of the Growing Parts of Plants	697
" 14. Causes of the Condition of Tension in Plants	708
" 15. Phenomena due to the Tension of Tissues in the Growing Parts of Plants .	715
" 16. Modification of Growth caused by Pressure and Traction	729
" 17. Cause of the Growth in Length under constant External Conditions . .	735
" 18. Periodicity of Growth in Length caused by the alternation of Day and Night	743

Sect. 19. Effect of Temperature on Growth	74
„ 20. Action of Light on Growth,—Heliotropism	75
„ 21. Influence of Gravitation on Growth.—Geotropism	75
„ 22. Unequal Growth	76
„ 23. Torsion	77
„ 24. The Twining of Climbing Plants	77
„ 25. The Twining of Tendrils	77

CHAPTER V.

**Periodic Movements of the Mature Parts of Plants and Movements
dependent on Irritation.**

Sect. 26. Definition	782
„ 27. Review of the Phenomena connected with Periodically Motile and Irritable Parts of Plants	783
„ 28. Mobile and Immobile Condition of the Motile Parts of Plants	788
„ 29. Mechanism of the Movements	792

CHAPTER VI.

The Phenomena of Sexual Reproduction.

Sect. 30. The Essential Element in the process of Sexual Reproduction	801
„ 31. Influence of the origin of the Reproductive Cells on the product of Fertilisation	807
„ 32. Hybridisation	816

CHAPTER VII.

The Origin of Species.

Sect. 33. Origin of Varieties	822
„ 34. Accumulation of new characters in the Reproduction of Varieties	826
„ 35. Causes of the Progressive Development of Varieties	830
„ 36. Relationship of the Morphological Nature of the Organ to its adaptation to the Conditions of Plant-life	835
„ 37. The Theory of Descent	842
APPENDIX	847
INDEX	849
