Volume 1

Introduction: Surface Properties and their Functions in Biological Systems	3
Stanislav Gorb	

Part I Protection and Defence

1 Biological Properties of Fruit and Seed Slime Envelope: How to Live, Fly, and Not Die	11
Agnieszka Kreitschitz	
2 Easily Damaged Integument of Some Sawflies (Hymenoptera) is Part of a Defence Strategy Against Predators	31
Jean-Luc Boevé	

Part II Anti-wetting

3 Water Repellence in Gecko Skin: How Do Geckos Keep Clean?	47
Uwe N. Hiller	
4 Anti-Wetting Surfaces in Heteroptera (Insecta): Hairy Solutions to Any Problem	55
Pablo Perez-Goodwyn	
5 Water Repellent Properties of Spiders: Topographical Variations and Functional Correlates	77
Gail E. Stratton and Robert B. Suter	

- 6 Dry in the Water: The Superhydrophobic Water Fern
Salvinia – a Model for Biomimetic Surfaces** 97
Zdenek Cerman, Boris F. Striffler, and Wilhelm Barthlott
- 7 Brochosomal Coatings of the Integument of Leafhoppers
(Hemiptera, Cicadellidae)** 113
Roman A. Rakitov

Part III Transport

- 8 Pull, Push and Evaporate: The Role of Surfaces in Plant Water
Transport** 141
Anita Roth-Nebelsick

Part IV Aerodynamics

- 9 Molding and Carving Cell Surfaces: The Joke of a Fold and the
Origin and Evolution of Feathers** 163
Lorenzo Alibardi

Part V Acoustics

- 10 Surface Structure of Sound Emission Organs in *Urania* Moths** 189
Alejandro Barro, Marianne Vater, Martha Pérez and Frank Coro

Part VI Sensory Systems

- 11 Functional Coupling of Cercal Filiform Hairs and Campaniform
Sensilla in Crickets** 203
Ralph Heußlein, Heribert Gras, and Werner Gnatzy

Part VII Optics

- 12 Advanced Photonic Systems on the Wing-Scales of Lepidoptera** 237
Peter Vukusic
- 13 Sub-micron Structures Causing Reflection and Antireflection in
Animals** 259
Andrew R. Parker

14 Surface Colors of Insects: Wings and Eyes	285
Dockele G. Stavenga	
15 Butterfly Photonics: Form and Function	307
Abigail L. Ingram	
Color Plates	337
Index	371
