

Contents

<i>Preface</i>	vi
1 An Introduction to Invasion Ecology	1
2 Transport Vectors and Pathways	18
3 Trends in Numbers of Invaders	38
4 Propagules	59
5 Disturbance	76
6 Establishment Success: The Influence of Biotic Interactions	107
7 Modeling the Geographical Spread of Invasive Species	132
8 Ecological Processes and the Spread of Non-Native Species	158
9 Ecological Impacts of Invasive Species	184
10 Impact Synthesis	206
11 Evolution of Invaders	223
12 Prediction, Risk Assessment, and Management of Species Invasions	241
<i>Literature Cited</i>	269
<i>Index</i>	299
