Chapter 1 Introduction	1
PART I A GLOBAL GLIMPSE OF THE ANCIENT MURRELET	5
Chapter 2 A History of the Ancient Murrelet	7
What they look like	7
Who found the Ancient Murrelet?	9
... How it got its name	12
The genus <i>Synthliboramphus</i>	13
... And other relatives	14
How they appeared to early ornithologists	14
Discovering the distribution of the Ancient Murrelet	15
... And how they live	17
Conclusions	19
Chapter 3 Distribution, Status and Breeding Habitat	20
Distribution and status in Asia	22
The Aleutian Islands and the Bering Sea	25
The Alaskan Peninsula and the Gulf of Alaska	29
The Queen Charlotte Islands	30
Other areas south of Alaska	37
Breeding habitat	37
The other <i>Synthliboramphus</i> murrelets	39
Summary	42
Chapter 4 The Ancient Murrelet's Year	43
Chapter 5 The Ancient Murrelet at Sea	52
Diet	52
Morphology and feeding adaptations	55
Feeding behaviour	57
Non-breeding range	59
Marine habitat	62
PART II STUDIES AT REEF ISLAND	65
Chapter 6 Introduction	67
The Pacific Northwest	67
Geography of the Queen Charlotte Islands	69
Marine environments of the Queen Charlotte Islands	71

Terrestrial environments	74
Recent ecological changes in the islands	78
Role of the Ancient Murrelet in the ecology of the Queen Charlotte Islands	82
Diversity, stability and productivity	83
Chapter 7 The Island and the Work	85
How the study developed	85
The geography and vegetation of Reef Island	87
The fauna of Reef Island	89
The birds of Reef Island	91
... And adjacent waters	92
Methods	95
Measurements	101
Chapter 8 Attendance and Behaviour at the Colony	104
Voice	104
Pre-laying	107
Egg-laying	115
Incubation	117
Departure of family parties	119
How the chicks find their way to the sea	124
... And how they find their parents again	126
The first days at sea	128
Fledging and independence of the chicks	131
Chapter 9 The Behaviour of Non-Breeders	132
Timing of attendance	133
Singing and calling	134
Prospecting of burrows	136
What we think the non-breeders are doing	140
Chapter 10 Behaviour on the Gathering Ground	142
The location of the gathering grounds	142
What birds attend the gathering ground?	143
Behaviour on the gathering ground	150
What are the gathering aggregations for?	151
Chapter 11 Breeding Habitat and Burrows	154
The nest-site	154
The nest-chamber and cup	157
Measures taken to conceal the burrow entrance	158
Population on Reef Island	159
Variation in burrow density	161
Burrow occupancy	166
Continuity of occupation	167
Conclusions	169

Chapter 12 Eggs and Chicks	170
The eggs: size, colour and composition	170
Clutch size and the interval between layings	173
Egg recognition	175
Incubation and hatching	176
The effects of chilling on hatching and incubation	179
Time spent in the burrow by the chicks	180
Some adaptations of the chicks	180
Chapter 13 Timing of Breeding and its Effects	186
Timing and spread of laying	187
Year-to-year variation	189
Possible causes of inter-year variation	192
Individual variation	193
Summary	196
Chapter 14 Population Dynamics	198
At what age do birds begin to visit the colony, and how old are they when they begin to breed?	199
Movements within the colony	202
Annual survival	202
Reproductive success	205
Predation by deer mice	206
Brood size after leaving the colony	207
Age structure of the population	208
Movements among colonies	209
Summary	210
Chapter 15 Why Ancient Murrelet Chicks are Precocial	211
Chick rearing in seabirds	212
Chick departure strategies in the auks and their relatives	212
Previous explanations for chick departure strategies in auks	213
How do these ideas fit the evidence for Ancient Murrelets?	215
Some speculations on the origins of precociality	218
Chapter 16 Conservation	221
Some thoughts on conservation biology	221
Conservation of Ancient Murrelets	222
Epilogue	225
Rhyme of the Ancient Murrelet	226
Appendix 1 Scientific names of animals and plants mentioned in the text	227
Appendix 2 Census details for Reef Island, 1989	229
References	230
Index	245
