<i>Acknowledgements</i>	11
1 INTRODUCTION	15
2 SPECIES ACCOUNTS	28
Technical diagnoses	29
Red-bearded Bee-eater <i>Nyctyornis amicta</i>	33
Blue-bearded Bee-eater <i>N. athertoni</i>	36
Celebes Bee-eater <i>Meropogon forsteni</i>	40
Black-headed Bee-eater <i>Merops breweri</i>	43
Blue-headed Bee-eater <i>M. muelleri</i>	46
Black Bee-eater <i>M. gularis</i>	50
Little Bee-eater <i>M. pusillus</i>	54
Blue-breasted Bee-eater <i>M. variegatus</i>	60
Cinnamon-chested Bee-eater <i>M. oreobates</i>	64
Swallow-tailed Bee-eater <i>M. hirundineus</i>	67
Red-throated Bee-eater <i>M. bullocki</i>	72
White-fronted Bee-eater <i>M. bullockoides</i>	81
Somali Bee-eater <i>M. revoilii</i>	87
White-throated Bee-eater <i>M. albicollis</i>	90
Little Green Bee-eater <i>M. orientalis</i>	98
Boehm's Bee-eater <i>M. boehmi</i>	106
Blue-throated Bee-eater <i>M. viridis</i>	110
Blue-cheeked Bee-eater <i>M. persicus</i>	116
Madagascar and Blue-tailed Bee-eaters <i>M. superciliosus</i>	127
Rainbowbird <i>M. ornatus</i>	133
Bay-headed Bee-eater <i>M. leschenaulti</i>	141
European Bee-eater <i>M. apiaster</i>	147
Rosy Bee-eater <i>M. malimbicus</i>	174
Carmine Bee-eater <i>M. nubicus</i>	179
3 THE ORIGIN OF SPECIES	194
Geographical differentiation among the bee-eaters—The fact of evolution—Monotypic and polytypic species—Patterns in allopatry: subspeciation—Patterns in allopatry: speciation—Superspecies—Evolving sympatry: the species-group—Rate of evolution—Two problem bee-eaters—The Family's roots	

6 Contents

4	FOOD AND FORAGING	205
	Flying insects—Opportunism and selectivity—Other predators of ants and wasps—Other predators of bees—A taste for honeybees—Devenoming behaviour—Venom immunity—Learning the trade—Hawking strategies—Further specializations—Grounded prey—Fishing and bathing	
5	BEE-EATERS AND APICULTURE	224
6	SOCIAL AND REPRODUCTIVE LIFE	230
	Hole nesting—Choosing a site—The 'milieu intérieur'—Nest hygiene—Brood parasitism—Social organization—The clan—Clan territory—Helpers—Aid-giving behaviour—Nidification—The clutch—Nestlings—How helpers benefit nestlings—How helpers benefit parents	
7	EVOLVING SPECIFIC DIFFERENCES	244
	Livery—Sexual dimorphism—The mask—Size—Wing shape—Beak shape—Ecological variation—Migration—Social and behavioural variation—Coloniality—Cooperative breeding	
	<i>Appendices</i>	
1	Glossary of evolutionary and other terms	261
2	Systematic names of birds and mammals in text	262
3	European Bee-eater breeding localities in southern Africa	263
4	Carmine Bee-eater breeding colony localities	265
5	Diet of the Little Bee-eater	269
6	Diet of the Red-throated Bee-eater	271
7	Diet of the White-throated Bee-eater	272
8	Diet of the European Bee-eater	274
9	Aberrant plumages	277
	<i>References</i>	278
	<i>Index</i>	299
