
Contents

Preface.....	xiii
The Authors	xv

Chapter 1 Introduction	1
Monitoring Resources of High Value.....	2
Economic Value.....	2
Social, Cultural, and Educational Value	3
Economic Accountability	3
Monitoring as a Part of Resource Planning	5
Monitoring in Response to a Crisis	7
Monitoring in Response to Legal Challenges	10
Adaptive Management.....	11
An Example of Monitoring and Use of Adaptive Management.....	12
Summary	13
References	14

Chapter 2 Lessons Learned from Current Monitoring Programs	17
Federal Monitoring Programs.....	18
The Biomonitoring of Environmental Status and Trends (BEST)....	18
What Is the Goal of the Monitoring Program and	
How Is It to Be Achieved?	19
Where to Monitor?.....	19
What to Monitor?.....	19
The North American Breeding Bird Survey (BBS)	20
What Is the Goal of the Monitoring Program?.....	20
Where and How to Monitor?	21
What to Monitor?.....	21
Environmental Monitoring and Assessment Program (EMAP)	23
What Is the Goal of the Monitoring Program?.....	24
Where and How to Monitor?	24
What to Monitor?.....	25
Nongovernmental Organizations and Initiatives.....	26
Monitoring the Illegal Killing of Elephants (MIKE).....	26
What Is the Goal of the Monitoring Program?.....	27
Where and How to Monitor?	27
What to Monitor?.....	28
Learning from Citizen-Based Monitoring	30
What Is the Goal of the Monitoring Program?.....	30
Where and How to Monitor?	31

What to Monitor?.....	32
Summary	33
References	34
Chapter 3 Community-Based Monitoring	37
A Conflict Over Benefits	38
Economic.....	38
Ethical.....	39
Education and Community-Enrichment.....	40
Effectiveness.....	43
Designing and Implementing a Community-Based Monitoring Program.....	44
The Prescriptive Approach.....	45
In What Context Does It Work?	47
The Collaborative Approach	48
In What Context Does It Work?	49
Suggestions for Scientists.....	50
Resolving the Underlying Conflict	51
Participatory Action Research.....	51
Systems Thinking.....	52
Summary.....	54
References	55
Chapter 4 Goals and Objectives Now and Into the Future	59
Targeted Versus Surveillance Monitoring.....	59
Incorporating Stakeholder Objectives.....	61
Participants.....	62
Data.....	62
Analysis	62
Results	62
No Surprise Management.....	63
Identifying Information Needs.....	63
The Anatomy of an Effective Monitoring Objective	64
Scientific Objectives	64
Management Objectives	65
Sampling Objectives.....	65
What?.....	65
Where?.....	66
When?.....	66
Who?.....	66
Articulating the Scales of Population Monitoring	67
Project or Site Scale.....	67
Landscape Scale	67
Rangewide Scale.....	68

Organism-Centered Perspective	70
Data Collected to Meet the Objectives	70
Which Species Should Be Monitored?	74
Intended Users of Monitoring Plans	75
Summary	76
References	76
 Chapter 5 Designing a Monitoring Plan	79
Articulating Questions to Be Answered	80
Inventory, Monitoring, and Research	82
Are Data Already Available?	82
Types of Monitoring Designs	87
Incidental Observations	88
Inventory Designs	88
Status and Trend Monitoring Designs	90
Cause and Effect Monitoring Designs	94
Retrospective Analyses and ANOVA Designs	94
Before-After Control Versus Impact (BACI) Designs	95
EDAM: Experimental Design for Adaptive Management	97
Beginning the Monitoring Plan	97
Sample Design	98
Selection of Specific Indicators	98
Selection of Sample Sites	100
Detecting the Desired Effect Size	100
The Proposed Statistical Analyses	100
The Scope of Inference	101
Summary	101
References	101
 Chapter 6 Factors to Consider When Designing the Monitoring Plan	103
Use of Existing Data to Inform Sampling Design	103
Detectability	104
Estimating Detection Distances	105
Estimating Variance Associated with Indicators	105
Estimating Sample Size	105
Logistical Tradeoff Scenarios	106
Variance Stabilization	106
Spatial Patterns	107
Temporal Variation	109
Cost	110
Stratification of Samples	111
Adaptive Sampling	111
Peer Review	112
Summary	112

References	113
Chapter 7 Putting Monitoring to Work on the Ground.....	115
Creating a Standardized Sampling Scheme	115
Selecting Sampling Units	115
Size and Shape of Sampling Units	115
Selection of Sample Sites	117
Simple Random Sampling	117
Systematic Sampling	117
Stratified Random Sampling	118
Logistics	120
Safety Plan.....	120
Resources Needed	121
Permits.....	121
Biological Study Ethics	122
Voucher Specimens	122
Schedule and Coordination Plan	122
Qualifications for Personnel	123
Sampling Unit Marking and Monuments.....	123
Documenting Field Monitoring Plans	125
Quality Control and Quality Assurance.....	126
Critical Areas for Standardization	126
Season and Elevation.....	126
Diurnal Variability	127
Clothing Observers Wear While Monitoring.....	127
Budgets	127
Summary	128
References	129
Chapter 8 Field Techniques for Population Sampling and Estimation	131
Data Requirements	131
Occurrence and Distribution Data.....	131
Population Size and Density.....	132
Abundance Indices	133
Fitness Data	133
Research Studies.....	134
Spatial Extent	134
Frequently Used Techniques for Sampling Animals	134
Aquatic Organisms	135
Terrestrial and Semi-Aquatic Organisms.....	136
Life History and Population Characteristics	141
Amphibians and Reptiles	141
Birds	142
Mammals.....	142

Effects of Terrain and Vegetation	143
Merits and Limitations of Indices Compared to Estimators	144
Estimating Community Structure	145
Estimating Biotic Integrity	147
Standardization and Protocol Review	147
Budget Constraints	147
Summary	148
References	148
 Chapter 9 Techniques for Sampling Habitat	155
Selecting an Appropriate Scale	156
Hierarchical Selection	157
Remotely Sensed Data.....	159
Aerial Photography.....	160
Satellite Imagery.....	161
Accuracy Assessment and Ground-Truthing.....	162
Vegetation Classification Schemes	162
Consistent Documentation of Sample Sites.....	163
Ground Measurements of Habitat Elements	163
Methods for Ground-Based Sampling of Habitat Elements.....	165
Random Sampling	165
Vegetation Sampling.....	166
Measuring Density.....	166
Estimating Percent Cover	166
Estimating Tree Height.....	167
Estimating Basal Area.....	168
Sampling Dead Wood.....	169
Estimating Biomass	169
Using Estimates of Habitat Elements to Assess Habitat Availability	170
Using Estimates of Habitat Elements to Assess Habitat Suitability ...	170
Assessing the Distribution of Habitat Across the Landscape	172
Linking Inventory Data to Satellite Imagery and GIS.....	172
Measuring Landscape Structure and Change	174
Summary	175
References	176
 Chapter 10 Database Management	179
The Basics of Database Management	179
The General Structure of a Monitoring Database.....	180
Digital Databases	180
Data Forms	182
Data Storage	184
Metadata.....	184

Consider a Database Manager	186
An Example of a Database Management System: FAUNA	187
Summary	188
References	188
Chapter 11 Data Analysis in Monitoring	189
Data Visualization I: Getting to Know Your Data	190
Data Visualization II: Getting to Know Your Model	193
Independence of Data Points	193
Homogeneity of Variances	193
Normality	194
Possible Remedies if Parametric Assumptions Are Violated	195
Data Transformation	196
Nonparametric Alternatives	196
Statistical Distribution of the Data	197
Poisson Distribution	197
Negative Binomial Distribution	198
Abundance and Counts	198
Absolute Density or Population Size	198
Relative Abundance Indices	199
Generalized Linear Models and Mixed Effects	200
Analysis of Species Occurrences and Distribution	202
Possible Analysis Models for Occurrence Data	203
Species Diversity	203
Binary Analyses	203
Prediction of Species Density	204
Occupancy Modeling	204
Assumptions, Data Interpretation, and Limitations	204
Analysis of Trend Data	205
Possible Analysis Models	206
Assumptions, Data Interpretation, and Limitations	207
Analysis of Cause-and-Effect Monitoring Data	207
Possible Analysis Models	208
Assumptions, Data Interpretation, and Limitations	209
Paradigms of Inference: Saying Something with Your	
Data and Models	209
Randomization Tests	209
Information Theoretic Approaches: Akaike's Information	
Criterion	209
Bayesian Inference	210
Retrospective Power Analysis	210
Summary	212
References	212

Chapter 12	Reporting	219
	Format of a Monitoring Report	220
	Title	220
	Abstract or Executive Summary	220
	Introduction	221
	Study Area	221
	Methods	223
	Results	225
	Discussion	226
	Management Recommendations	228
	List of Preparers	229
	References	229
	Appendices	229
	Summary	230
	Summary	230
	References	230
Chapter 13	Uses of the Data: Synthesis, Risk Assessment, and	
	Decision Making	233
	Thresholds and Trigger Points	233
	Forecasting Trends	235
	Predicting Patterns Over Space and Time	236
	Geographic Range Changes	237
	Home Range Sizes	238
	Phenological Changes	238
	Habitat Structure and Composition	239
	Synthesis of Monitoring Data	239
	Risk Analysis	241
	Decision Making	242
	Summary	243
	References	243
Chapter 14	Changing the Monitoring Approach	247
	General Precautions to Changing Methodology	247
	When to Make a Change	248
	Changing the Design	248
	Changing the Variables That Are Measured	249
	Changing the Sampling Techniques	250
	Changing the Sampling Locations	251
	Changing the Precision of the Samples	252
	Changing the Frequency of Sampling	253

Logistical Issues with Altering Monitoring Programs.....	254
Economic Issues with Altering Monitoring Programs	254
Terminating the Monitoring Program.....	255
Summary	255
References	256
Chapter 15 The Future of Monitoring	257
Emerging Technologies	258
Genetic Monitoring	258
Monitoring Environmental Change with Remote Sensing	259
Advances in Community Monitoring and the Internet	260
A New Conceptual Framework for Monitoring	261
A Reflection on Ecological Thinking.....	262
Dealing with Complexity and Uncertainty	263
Summary	264
References	264
Appendix Scientific Names of Species Mentioned in the Text.....	267
Index.....	271
