Preface	vii
Acknowledgments	ix
Editor	xi
Contributors	xiii
Summary of Chapters	xvii
 Chapter 1 Introduction to Gene Expression Profiling with DNA Microarray Technology	1
<i>Michael D. Kane</i>	
 Chapter 2 Introduction to Large-Scale Gene Expression Data Analysis	11
<i>Anbarasu Lourdasamy, Massimo Ubaldi, Laura Soverchia, Gary Hardiman, and Roberto Ciccocioppo</i>	
 Chapter 3 The Statistical Design and Analysis of Gene Expression Data	25
<i>Sonia Jain</i>	
 Chapter 4 Laboratory Automation for Microarray Experimentation	33
<i>Douglas N. Gurevitch</i>	
 Chapter 5 How to Evaluate a Microarray Scanner	41
<i>Yaping Zong, Shanshan Zhang, Youxiang Wang, and Yaxian Shi</i>	
 Chapter 6 The Role of Substrates in Microarray Experimentation and How to Choose the Correct Coating for Microarraying	53
<i>Ruediger Dietrich, Daniel Haines, Rajendra Redkar, and Alistair Rees</i>	
 Chapter 7 Toward Highly Efficient Automated Hybridizations	71
<i>Kris Pappaert, Johan Vanderhoeven, Gert Desmet, and Paul Van Hummelen</i>	
 Chapter 8 Characterization of Microarray Hybridization Stoichiometry	87
<i>Richard J.D. Rouse and Gary Hardiman</i>	
 Chapter 9 Data Normalization Selection	97
<i>Phillip Stafford</i>	

Chapter 10	Methods for Assessing Microarray Performance	119
	<i>Steffen G. Oeser, Shawn C. Baker, Eugene Chudin, Kenneth Kuhn, and Timothy K. McDaniel</i>	
Chapter 11	Comparison of Different Normalization Methods for Applied Biosystems Expression Array System	127
	<i>Catalin Barbacioru, Yulei Wang, Roger Canales, Yongming Sun, David Keys, Frances Chan, Kathryn Hunkapiller, Karen Poulter, and Raymond R. Samaha</i>	
Chapter 12	A Systematic Comparison of Gene Expression Measurements across Different Hybridization-Based Technologies	145
	<i>Winston Patrick Kuo, Fang Liu, Tor-Kristian Jensen, Shari L. Benson, Connie L. Cepko, Eivind Hovig, and Lucila Ohno-Machado</i>	
Chapter 13	DNA Methylation Arrays: Methods and Analysis	175
	<i>Natalie P. Thorne, John Carlo Marioni, Vardhman K. Rakyan, Ashraf E.K. Ibrahim, Charles E. Massie, C. Curtis, James D. Brenton, Adele Murrell, and Simon Tavaré</i>	
Chapter 14	Electronic Microarrays: Progress toward DNA Diagnostics	207
	<i>Howard Reese, Dan Smolko, Paul Swanson, and Dalibor Hodko</i>	
Chapter 15	New Applications for Microarrays	225
	<i>Mark Andersen, Steve Warrick, and Christopher Adams</i>	
Chapter 16	Development of an Oligonucleotide Microarray for Mutational Analysis Using Single or Multiple Sample Hybridization	243
	<i>Il-Jin Kim, Hio Chung Kang, and Jae-Gahb Park</i>	
Chapter 17	Development of an Integrated Molecular Diagnostic Test to Identify Respiratory Viruses	259
	<i>Frédéric Raymond, Whei-Kuo Wu, and Jacques Corbeil</i>	
Chapter 18	Microarrays in Neuroscience	271
	<i>Massimo Ubaldi, Wolfgang Sommer, Laura Soverchia, Anbarasu Lourdasamy, Barbara Ruggeri, Roberto Ciccocioppo, and Gary Hardiman</i>	
Chapter 19	Optimization of Protein Array Fabrication for Establishing High-Throughput Ultra-Sensitive Microarray Assays for Cancer Research	289
	<i>Gary Hardiman, C. Ramana Bhasker, and Richard J.D. Rouse</i>	
Index		301
