Preface.....	vii
Acknowledgments.....	ix
About the Editors.....	xi
Contributors.....	xiii

SECTION I Folding and Stability of Metalloproteins

Chapter 1	Metal Ions, Protein Folding, and Conformational States: An Introduction.....	3
	<i>Cláudio M. Gomes and Pernilla Wittung-Stafshede</i>	
Chapter 2	The Folding Mechanism of c-Type Cytochromes.....	13
	<i>Carlo Travaglini-Allocatelli, Stefano Gianni, and Maurizio Brunori</i>	
Chapter 3	The Mechanism of Cytochrome c Folding: Early Events and Kinetic Intermediates.....	37
	<i>Eefei Chen, Robert A. Goldbeck, and David S. Kliger</i>	
Chapter 4	Stability and Folding of Copper-Binding Proteins.....	61
	<i>Irina Pozdnyakova and Pernilla Wittung-Stafshede</i>	
Chapter 5	Iron-Sulfur Clusters, Protein Folds, and Ferredoxin Stability.....	81
	<i>Sónia S. Leal and Cláudio M. Gomes</i>	
Chapter 6	Folding and Stability of Myoglobins and Hemoglobins.....	97
	<i>David S. Culbertson and John S. Olson</i>	

SECTION II Mechanisms of Metal Transporters and Assembly

Chapter 7	Frataxin: An Unusual Metal-Binding Protein in Search of a Function.....	125
	<i>Annalisa Pastore</i>	

Chapter 8	Mechanism of Human Copper Transporter Wilson's Disease Protein.....	145
	<i>Amanda Barry, Zara Akram, and Svetlana Lutsenko</i>	

SECTION III Metal Ions, Protein Conformation, and Disease

Chapter 9	α -Synuclein and Metals	169
	<i>Aaron Santner and Vladimir N. Uversky</i>	
Chapter 10	Zinc and p53 Misfolding	193
	<i>James S. Butler and Stewart N. Loh</i>	
Chapter 11	The Octarepeat Domain of the Prion Protein and Its Role in Metal Ion Coordination and Disease	209
	<i>Glenn L. Millhauser</i>	

SECTION IV Metalloprotein Design, Simulation, and Models

Chapter 12	Metallopeptides as Tools to Understand Metalloprotein Folding and Stability	227
	<i>Brian R. Gibney</i>	
Chapter 13	The Folding Landscapes of Metalloproteins.....	247
	<i>Patrick Weinkam and Peter G. Wolynes</i>	
Appendix		275
Index		287
