
Contents

Preface.....	vii
List of Contributors.....	ix
 Chapter 1 Neuropeptide Systems—Some Basic Concepts	1
<i>Tomas Hökfelt, Zhi-Qing David Xu, Tiejun Shi, Csaba Adori, Kang Zheng, Swapnali Barde, and Mingdong Zhang</i>	
 Chapter 2 Neuropeptide Biosynthesis.....	19
<i>Margery C. Beinfeld</i>	
 Chapter 3 Neuropeptide Degradation Related to the Expression of the Physiological Action of Neuropeptides	27
<i>Chikai Sakurada, Hirokazu Mizoguchi, Takaaki Komatsu, Shinobu Sakurada, and Tsukasa Sakurada</i>	
 Chapter 4 Neuropeptides, Isolation, Identification, and Quantitation	45
<i>Jolanta Kotlinska and Jerzy Silberring</i>	
 Chapter 5 Cellular and Molecular Processes of Neuronal Damage and Mechanisms in Neuroprotection and Neuroregeneration—Focus on Brain Ischemia	63
<i>Gregor Zündorf, Daniel Förster, and Georg Reiser</i>	
 Chapter 6 Dynorphins in Central Nervous System Pathology	79
<i>Kurt F. Hauser, Pamela E. Knapp, Tatiana Yakovleva, Dineke S. Verbeek, and Georgy Bakalkin</i>	
 Chapter 7 Postnatal Stress Procedures Induce Long-Term Endocrine and Metabolic Alterations Involving Different Proopiomelanocortin- Derived Peptides.....	107
<i>Alberto Loizzo, Gabriele Campana, Stefano Loizzo, and Santi Spampinato</i>	

Chapter 8	Prothymosin α —A Novel Endogenous Neuroprotective Polypeptide against Ischemic Damages	127
	<i>Hiroshi Ueda, Hayato Matsunaga, and Sebok K. Halder</i>	
Chapter 9	Influence of Anabolic Androgenic Steroids on Dynorphinergic Pathways in Rat's Brain	149
	<i>Kristina Magnusson</i>	
Chapter 10	Angiotensin II Receptors and Neuroprotection	165
	<i>Robert E. Widdop, Ulrike Muscha Steckelings, Claudia A. McCarthy, and Jennifer K. Callaway</i>	
Chapter 11	PACAP and Cellular Protection: Cellular Protection by Members of the VIP/Secretin Family with an Emphasis on Pituitary Adenylate Cyclase-Activating Polypeptide (PACAP)	179
	<i>Lee E. Eiden</i>	
Chapter 12	General Strategies of Peptide Synthesis	209
	<i>Aleksandra Misicka</i>	
Chapter 13	Addressing the Interactions between Opioid Ligands and Their Receptors: Classic and Nonclassic Cases	229
	<i>Luca Gentilucci</i>	
Chapter 14	Use of Peptides as Drug Leads—A Case Study on the Development of Dipeptides Corresponding to the Heptapeptide Substance P(1-7), with Intriguing Effects on Neuropathic Pain	253
	<i>Rebecca Fransson and Anja Sandström</i>	
Chapter 15	Cognition-Enhancing Peptides and Peptidomimetics	271
	<i>Fred J. Nyberg and Mathias Hallberg</i>	
Index		299
