

Contents

Introduction.....	vii
Editors.....	xi
Contributors	xiii
1 Engineering the Pluripotent Stem Cell Niche for Directed Mesoderm Differentiation.....	1-1
<i>Céline L. Bauwens, Kelly A. Purpura, and Peter W. Zandstra</i>	
2 Cell Mechanobiology in Regenerative Medicine: Lessons from Cancer	2-1
<i>Badriprasad Ananthanarayanan and Sanjay Kumar</i>	
3 Systems-Engineering Principles in Signal Transduction and Cell-Fate Choice.....	3-1
<i>Karin J. Jensen, Anjun K. Bose, and Kevin A. Janes</i>	
4 Biomaterial Scaffolds for Human Embryonic Stem Cell Culture and Differentiation.....	4-1
<i>Stephanie Willerth and David Schaffer</i>	
5 Stem Cells and Regenerative Medicine in the Nervous System.....	5-1
<i>Shelly Sakiyama-Elbert</i>	
6 Stem Cells and Regenerative Medicine for Treating Damaged Myocardium.....	6-1
<i>Rohini Gupta, Kunal Mehtani, Kimberly R. Kam, and Kevin E. Healy</i>	
7 Stem Cells and Hematopoiesis.....	7-1
<i>Krista M. Fridley and Krishnendu Roy</i>	
8 Synthetic Biomaterials and Stem Cells for Connective Tissue Engineering.....	8-1
<i>Ameya Phadke and Shyni Varghese</i>	
9 Derivation and Expansion of Human Pluripotent Stem Cells.....	9-1
<i>Sean P. Palecek</i>	

10	Bioreactors for Stem Cell Expansion and Differentiation	10-1
	<i>Carlos A. V. Rodrigues, Tiago G. Fernandes, Maria Margarida Diogo, Cláudia Lobato da Silva, and Joaquim M. S. Cabral</i>
