Preface

viii

1	The State of Tropical Bird Biodiversity	1
1.1	Imperiled bird biodiversity	1
1.2	Drivers of endangerment	4
1.3	The enigmatic	24
2	Effects of Habitat Fragmentation on Tropical Birds	27
2.1	Introduction	27
2.2	Theoretical premises of fragmentation	28
2.3	Area effects in tropical birds	29
2.4	Edge effects	31
2.5	Fragment isolation and the importance of connectivity	36
2.6	Temporal change in forest fragments	41
2.7	Conclusion	43
3	Tropical Bird Extinctions	45
3.1	Extinctions over time	45
3.2	Extinction debt	48
3.3	Are birds the most endangered taxa?	49
3.4	Case studies of recent bird extinctions	50
3.5	Drivers of extinctions	54
3.6	Extinction vulnerability	56
3.7	Ecosystem resonance of bird extinctions	63
3.8	Extinction resistance	64

4	Ecological Functions of Birds in the Tropics	68
4.1	Birds as mobile links	72
4.2	Seed dispersal	72
4.3	Pollination	84
4.4	Predation and pest control – insectivores	90
4.5	Predation and pest control – raptors	95
4.6	Scavenging	99
4.7	Nutrient deposition	104
4.8	Ecosystem engineers and other ecological actors	106
4.9	Birds and humanity	108
5	Fire and the Conservation of Tropical Birds	109
5.1	Introduction	109
5.2	Direct effects of fire	111
5.3	Indirect effects of fire and altered fire regimes	111
5.4	Altered fire regimes in fire-dependent ecosystems	113
5.5	Altered fire regimes in fire-sensitive ecosystems	116
5.6	Interaction between fires and other threats to tropical birds	120
5.7	Managing fire for bird conservation	122
5.8	Birds and post-fire regeneration	124
5.9	Conclusion	125
6	Biotic Invasions and Tropical Birds	126
6.1	Effects of invasive species on tropical birds	126
6.2	Avian invasions	136
6.3	Pathology of avian invasions	138
6.4	Tropical avian invaders	141
6.5	Management of avian invaders	147
7	Harvesting of Tropical Birds	152
7.1	The volume of bird extraction	152
7.2	Utilization of birds	156
7.3	Effects of harvesting on birds	164
7.4	Sustainable harvesting	167
7.5	Curtailling the bird harvesting and trade	170
8	Climate Change Effects on Tropical Birds	173
8.1	Future projections and models	174
8.2	Where will climate change hit?	177
8.3	Protected areas	182
8.4	Effects of life history	182
8.5	Mobility and migration	185

8.6	Evolution	186
8.7	Interspecific interactions and indirect effects	187
8.8	Deadly synergies	189
8.9	Seasonality in tropics	191
8.10	Lack of knowledge	193
8.11	Conclusion	194
9	Conservation of Migratory Birds in the Tropics	195
9.1	Migration – an imperiled phenomenon	195
9.2	The natural history of migratory birds	199
9.3	Conservation problems faced by migratory birds in the tropics	206
9.4	Towards a comprehensive strategy for migratory bird conservation	211
10	Conservation Prospects for Tropical Birds	213
10.1	Protection and triage	214
10.2	Bird conservation in human-dominated landscapes	220
10.3	Population augmentation	221
10.4	Livelihoods and bird conservation	222
10.5	Education and capacity building	224
10.6	Enhancing knowledge of tropical birds	226
	<i>References</i>	227
	<i>Index</i>	287

Color plates appear in between pages 166 and 167
