

Contents

<i>Preface</i>	v
<i>General Introduction</i>	
1. General Introduction	1
2. Mathematical Models and Design Specifications in Synthetic Gene Networks	9
3. Robust Synthetic Biology Designs based on System Dynamic Models	18
4. Robust Synthetic Biology Designs based on Network Evolutionary Methods	38
5. Construction of Promoter and Promoter-RBS Libraries for Synthesis of Gene Networks	62
6. Robust Synthetic Gene Network Designs based on Library-search Method	84
7. Robust Design of Synthetic Biological Filter and Transistor based on Promoter-RBS Libraries	117
8. Communication and Synchronization of a Population of Coupled Synthetic Gene Networks	155
<i>Index</i>	187
<i>Color Plate Section</i>	189
