Preface

v

PART I: TISSUE HOMEOSTASIS AND REGENERATION DURING ADULTHOOD

1. Dynamics and Aging of Hematopoietic Stem Cells 3
Ronald van Os and Gerald de Haan
2. Cellular and Functional Aspects of Adult Neurogenesis 21
Tara Walker and Gerd Kempermann
3. Mechanisms of Wound Repair 67
Colin Jamora
4. Two Faces of Adult Blood Vessel Formation: 104
Vasculogenesis and Angiogenesis
Aernout Luttmann and Peter Carmeliet
5. Cancer Stem Cells: Lessons from AML 145
Yasmin Reyat and Dominique Bonnet
6. Skeletal Muscle Stem Cells 174
Deborah Briggs and Jennifer Morgan

PART II: APPLICATIONS IN BASIC RESEARCH, MEDICINE AND INDUSTRY

7. Visualization of Neural Stem Cells for the Investigation of 219
Neural Development and Development of Stem Cell
Therapies
Takehiko Sunabori and Hideyuki Okano
8. Biomaterials to Direct Stem Cell Fate 238
Marina Prewitz, F. Philipp Seib, Tilo Pompe and Carsten Werner
9. Stem Cell Applications for Pancreas Function 271
Insa S. Schroeder, Diana Oelschlaegel and Matthias Jung

10. Pluripotent Stem Cells from Livestock	304
<i>Björn Öback and Ben Huang</i>	
11. Stem Cell Markers	347
<i>Olaf Hardt, Ute Bissels, Andreas Bosio and Sebastian Knöbel</i>	

PART III: LEGISLATION AND ETHICS

12. Towards a European Standard for Human Embryonic Stem Cell Research	385
<i>Christiane Druml and Doris Wolfslehner</i>	
13. Democracies of Stemness: Stem Cell Technologies from Generation to Regeneration	403
<i>Giuseppe Testa</i>	
Index	431
About the Authors	433
Color Plate Section	443
