

CONTENTS

Contributors	•	vii
Preface	•	xi

1. The Archaea: an Invitation to Evolution	•	1
<i>Carl R. Woese</i>		

2. General Characteristics and Important Model Organisms	•	14
<i>Arnulf Kletzin</i>		

3. DNA Replication and Cell Cycle	•	93
<i>Si-houy Lao-Sirieix, Victoria L. Marsh, and Stephen D. Bell</i>		

4. DNA-Binding Proteins and Chromatin	•	110
<i>Rachel Samson and John N. Reeve</i>		

5. Mechanisms of Genome Stability and Evolution	•	120
<i>Dennis W. Grogan</i>		

6. Transcription: Mechanism and Regulation	•	139
<i>Michael Thomm</i>		

7. RNA Processing	•	158
<i>Gabriele Klug, Elena Evguenieva-Hackenberg, Arina D. Omer, Patrick P. Dennis, and Anita Marchfelder</i>		

8. Translation	•	175
<i>Paola Londei</i>		

9. Features of Aminoacyl-tRNA Synthesis Unique to Archaea	•	198
<i>Carla Polycarpo, Kelly Sheppard, Lennart Randau, Alexandre Ambrogelly, Alexander Machado Cardoso, Shuya Fukai, Stephanie Herring, Michael Hohn, Yuko Nakamura, Hiroyuki Oshikane, Sotiria Palioura, Juan Carlos Salazar, Jing Yuan, Osamu Nureki, and Dieter Söll</i>		

10. Protein-Folding Systems	•	209
<i>Frank T. Robb, Ryo Izuka, and Masafumi Yohda</i>		

11. Sensing, Signal Transduction, and Posttranslational Modification	•	224
<i>Peter J. Kennelly</i>		

12. Central Metabolism	•	260
<i>Michael J. Danson, Henry J. Lamble, and David W. Hough</i>		

13. Methanogenesis	•	288
<i>James G. Ferry and Kyle A. Kestead</i>		

14. Proteinaceous Surface Layers of Archaea: Ultrastructure and Biochemistry	•	315
<i>Helmut König, Reinhard Rachel, and Harald Claus</i>		

15. Lipids: Biosynthesis, Function, and Evolution	•	341
<i>Yan Boucher</i>		

16. Solute Transport	•	354
<i>Sonja V. Albers, Wil N. Konings, and Arnold J. M. Driessen</i>		

17. Protein Translocation into and across Archaeal Cytoplasmic Membranes	•	369
<i>Mechthild Pohlschröder and Kieran C. Dilks</i>		

18.	Flagellation and Chemotaxis •	385	21.	Molecular Genetics of <i>Archaea</i> •	463
<i>Ken F. Jarrell, Sandy Y. M. Ng, and Bonnie Chaban</i>			<i>Kevin Sowers and Kimberly Anderson</i>		
19.	Structure and Evolution of Genomes •	411	22.	Biotechnology •	478
<i>Patrick Forterre, Yvan Zivanovic, and Simonetta Gribaldo</i>			<i>Marco Moracci, Beatrice Cobucci-Ponzano, Giuseppe Perugini, and Mosè Rossi</i>		
20.	Functional Genomics •	434	23.	Archaeosome Vaccines •	496
<i>Francis E. Jenney, Jr., Sabrina Tachdjian, Chung-Jung Chou, Robert M. Kelly, and Michael W. W. Adams</i>			<i>G. Dennis Sprott and Lakshmi Krishnan</i>		
Index •			511
