Contributors vii

Preface xi

## I. INTRODUCTION 1

---

### 1. Does Cultivation Still Matter?

Karsten Zengler

3

### 2. The Human Intestinal Microbiota and Its Impact on Health

Mirjana Rajilić-Stojanović, Willem M. de Vos, and Erwin G. Zoetendal

11

## II. THE STATUS QUO: WHO IS OUT THERE? HOW TO DETERMINE MICROBIAL DIVERSITY 33

---

### 3. The Uncountables

William T. Sloan, Christopher Quince, and Thomas P. Curtis

35

### 4. The Missing Fungi: New Insights from Culture-Independent Molecular Studies of Soil

S. K. Schmidt, K. L. Wilson, A. F. Meyer, C. W. Schadt,  
T. M. Porter, and J. M. Moncalvo

55

### 5. The Diversity of Free-Living Protists Seen and Unseen, Cultured and Uncultured

David A. Caron and Rebecca J. Gast

67

**6. Microbial Biogeography: Patterns in Microbial Diversity across Space and Time**

*Noah Fierer*

95

**7. The Least Common Denominator: Species or Operational Taxonomic Units?**

*Ramon Rosselló-Mora and Arantxa López-López*

117

**8. Measuring Diversity**

*Jed A. Fuhrman*

131

**9. Metagenomics as a Tool To Study Biodiversity**

*Karen E. Nelson*

153

**III. ARE MICROORGANISMS NONCULTURABLE OR NOT YET CULTURABLE? 171**

**10. New Cultivation Strategies for Terrestrial Microorganisms**

*Peter H. Janssen*

173

**11. Cultivation of Marine Symbiotic Microorganisms**

*Todd A. Ciche*

193

**12. Methods To Study Consortia and Mixed Cultures**

*Boran Kartal and Marc Strous*

205

**IV. DO WE HAVE TO CHANGE GEAR? NEW CULTIVATION APPROACHES AND NEW MOLECULAR APPROACHES COMBINED 221**

**13. Microbial Cell Individuality**

*Simon V. Avery*

223

**14. Nanomechanical Methods To Study Single Cells**

*Ramya Desikan, Laurene Tétard, Ali Passian, Ram Datar, and Thomas Thundat*

245

**15. Single-Cell Genomics**

*Martin Keller, Christopher W. Schadt, and Anthony V. Palumbo*

267

**16. How Many Genes Does a Cell Need?**

*Hamilton O. Smith, John I. Glass, Clyde A. Hutchison III, and J. Craig Venter*

279
