

Contents

<i>Introduction</i>	<i>ix</i>
I Touching Life at Many Points	1
1. Disseminators Aloft?	3
2. <i>Pantoea</i> and the Locust	8
3. The Microbiology of Art	13
4. Why Do They Do It?	17
5. Out of the Blue	22
6. Reflections on Cellulolysis	26
7. Jelly From Space?	30
8. Botox and Dairy Cows	34
9. Fiction, Fact, and Reality	39
10. Microbiology for Gastronomes	43
11. The Double Life of <i>Escherichia coli</i>	48
12. Not All Cigars and Caviar	53
13. Microbial Versatility in Berlin	57
14. Whither Psychoneuroimmunology?	61

II The Ecological Context	67
15. Communal Diversity in Biofilms	69
16. Biofilm Life	74
17. Our Most Abundant Coterrestrials	79
18. <i>Helicobacter</i> from the Seas?	83
19. Selective Agencies	87
20. Natural Disaster Microbiology	91
21. Foot-and-Mouth Folly?	96
22. Ecology Lessons	100
23. Biocides in the Kitchen	105
24. Conjectures and Realities	110
25. Exterminating Pathogens	114
26. Learning from Denmark	118
27. Protozoa and Lurking Pathogens	122
28. What Is Virulence?	126
III The Human Context	131
29. Questionable Experiments	133
30. Lyme Disease: the Public Dimension	138
31. Blatant Opportunism	142
32. Bioscience Embattled	147
33. "Playing God"	151
34. Microbes in the Media	156
35. A Little Learning . . .	161
36. Spotlight on Acetaldehyde	166
37. Measles, Polio, and Conscience	171
38. Myxomatosis: Grim Questions	175
39. Rationalizing Vaccination	179
40. A European Furor	184
41. Bioremediation and Greenery	189
42. The Citation Game	194

IV Personalia	199
43. Antony van Leeuwenhoek, Clifford Dobell, and Robert Hooke	201
44. Robert Koch and His Postulates	206
45. Hideyo Noguchi, Max Theiler, and Yellowjack	210
46. René Dubos's Mirage of Health	215
47. Ferdinand Cohn, Neglected Visionary	220
48. Johannes Fibiger, a Dane to Remember	224
49. Frederick Twort, Codiscoverer of Phages	228
50. Alick Isaacs and Interferon	233
51. Dissenters: Max von Pettenkofer and Friedrich Wolter	238
52. Gerhard Domagk and the Origins of Sulfa	242
53. Cecil Hoare's Eponymous Organism	246
54. Ants and Fred Hoyle's Challenge to Darwinism	250
55. Pioneers of American Microbiology	254
 V Doing Microbiology	 263
56. At the Level of Cowpats	265
57. Fishy Business	270
58. Science à la Mode?	275
59. "Wherever They Are Found..."	279
60. There's More To Do	284
61. Self-Frustration	288
62. Genomics and Innovation in Antibiotics	292
63. The Relevance of Taxonomy	296
64. Yeasts Are Complex...	300
65. ... And Yeasts Are Versatile	305
66. Resounding Banalities	309
67. Microbiology Present and Future	314
68. Looking Back	318
69. A Global Challenge	322
