
Table of Contents

Chapter 1	Introduction	1
	<i>Kenneth H. Lundstrom</i>	
Chapter 2	Bioinformatics in Membrane Protein Analysis	5
	<i>Bengt Persson</i>	
Chapter 3	Prokaryotic Membrane Transport Proteins: Amplified Expression and Purification	21
	<i>Joanne Clough, Massoud Saidijam, Kim Bettaney, Gerda Szakonyi, Simon Patching, Johan Meuller, Shun'ichi Suzuki, Keigo Shibayama, Mark Bacon, Emma Barksby, Marie Groves, Richard Herbert, Mary Phillips-Jones, Alison Ward, Frank Gunn-Moore, John O'Reilly, Nick Rutherford, Roslyn Bill, and Peter Henderson</i>	
Chapter 4	Membrane Protein Production Strategies for Structural Genomics	43
	<i>Said Eshaghi and Pär Nordlund</i>	
Chapter 5	Refolding of Membrane Proteins for Large-Scale Production	57
	<i>Hans Kiefer, Thomas Ostermann, and Monika Böhner</i>	
Chapter 6	Crystallization of Membrane Proteins	73
	<i>Alastair T. Gardiner, June Southall, and Richard J. Cogdell</i>	
Chapter 7	Signaling through Membrane Proteins	89
	<i>J. Robert Bostwick and Deborah S. Hartman</i>	
Chapter 8	Expression of Membrane Proteins in Yeasts	115
	<i>Christoph Reinhart and Christoph Krettler</i>	
Chapter 9	Expression of Functional Membrane Proteins in the Baculovirus–Insect Cell System: Challenges and Developments	153
	<i>Giel J.C.G.M. Bosman and Willem J. de Grip</i>	

Chapter 10	Expression of Membrane Proteins in Mammalian Cells	169
	<i>Kenneth H. Lundstrom</i>	
Chapter 11	Solubilization and Purification of Membrane Proteins	179
	<i>Bernadette Byrne and Mika Jormakka</i>	
Chapter 12	Fluorescent Labelling of Membrane Proteins in Living Cells.....	199
	<i>Ruud Hovius, Bruno H. Meyer, Emmanuel G. Guignet, and Horst Vogel</i>	
Chapter 13	Membrane Protein NMR	211
	<i>Xiang-Qun (Sean) Xie</i>	
Chapter 14	Miniaturization of Structural Biology Technologies — From Expression to Biophysical Analyses	261
	<i>Enrique Abola, Peter Kuhn, and Raymond C. Stevens</i>	
Chapter 15	Electron Microscopy and Atomic Force Microscopy of Reconstituted Membrane Proteins	299
	<i>Andreas Engel</i>	
Chapter 16	Structural Genomics Networks for Membrane Proteins	321
	<i>Kenneth H. Lundstrom</i>	
Chapter 17	Molecular Modelling of Membrane Proteins	331
	<i>Slawomir Filipek and Anna Modzelewska</i>	
Chapter 18	Toward Structural Bases for GPCR Ligand Binding: A Path for Drug Discovery	349
	<i>Sabrina A. Beretta, Alla Korepanova, Mulugeta Mamo, Geoffrey F. Stamper, and Mark L. Chiu</i>
