Introduction (T.B. Batygina)	xv

PART ONE—PLANT REPRODUCTION

Overview

Reproductive Biology (E.S. Teryokhin)	3
Ecological Embryology (E.S. Teryokhin)	7
Reproduction, Propagation and Renewal (T.B. Batygina)	15
Viviparity (T.B. Batygina, E.A. Bragina)	19
Metamorphosis (E.S. Teryokhin)	29
Life Cycles (G.B. Rodionova)	34

PART TWO—POLLINATION AND BREEDING

Pollination Systems

Anthecology (A.N. Ponomarev, E.I. Demyanova)	41
Sexual Polymorphism (A.P. Melikyan)	42
Monoecy (E.I. Demyanova)	43
Gynodioecy (E.I. Demyanova)	45
Heterostyly (N.A. Zhinkina)	48
Dichogamy (N.A. Zhinkina)	50
Population Aspects of Sex Determination (N.P. Starshova)	53
Modes of Pollen Transfer and Pollinating Agents (N.P. Melikyan)	57
Chasmogamy (E.I. Demyanova)	59
Cleistogamy (E.I. Demyanova)	59
Specific Features of Cleistogamy in Annual Species of Genus <i>Medicago</i> L. (Fabaceae) (L.V. Novosylova)	62
The Evolution of Wind Pollination (H.P. Linder)	63

Breeding Systems

Autogamy (E.I. Demyanova)	73
Allogamy (E.I. Demyanova):	75
Geitonogamy	75
Xenogamy	76

Pollen-Ovule Ratios in Different Breeding Systems (I.I. Shamrov)	78
Stigmatic and Ovular Receptivity – Facts and Hypotheses (E. Pacini, G.G. Franchi)	79
Pollination Failure in Natural Populations: Implications for the Conservation of Rare Plants (C.C. Wilcock)	85
Significance of Hybridization in the Higher Plant Evolution (N.N. Tzvelev)	95

PART THREE – SEED PROPAGATION

Amphimixis and Apomixis

Amphimixis (T.B. Batygina)	101
Apomixis (T.B. Batygina)	101
Apospory (T.N. Naumova)	105
Diplospory (T.N. Naumova)	106
Parthenogenesis (V.S. Tyrnov)	109
Apogamety (O.P. Kamelina)	116
Classification of Apomixis (N.A. Shishkinskaya, O.I. Yudakova)	117
Embryo-Endosperm Interrelations in Apomixis (V.S. Tyrnov)	127
Ultrastructural Aspects of Apomixis (T.N. Naumova)	132
Space and Time Organization of the Megaspore- and Megagametophytogenesis in Amphimictic and Apomictic Plants (M.A. Gussakovskaya, I.P. Ermakov)	134
Experimental Induction of Apomixis <i>in vivo</i> and <i>in vitro</i> (A.S. Kashin)	143
Applied Aspects of Gametophytic Apomixis (V.S. Tyrnov)	144
<i>Alchemilla</i> L. (Rosaceae) is a Classical Object for Studying Facultative Apomixis (K.P. Glazunova)	147
The Problem of Evolutionary Significance of Apomixis (K.A. Shishkinskaya, V.S. Tyrnov)	149
The Evolution of Gametophytic Apomixis (J.G. Carman)	153

Seed Propagation

Seed and Seed Propagation (T.B. Batygina)	182
Reproductive Effort (Yu. A. Zlobin)	183
Reproductive Success (Yu. A. Zlobin)	186
Potential Seed Productivity (Yu. A. Zlobin)	192
Real Seed Productivity (Yu. A. Zlobin)	193
Seed Productivity in <i>Symphytum</i> L. (Boraginaceae) (N.M. Nayda)	195
Seed Productivity in Apomicts (A.S. Kashin)	197
Aberrant Ovules and Seeds: Structure and Diagnostics (I.I. Shamrov)	201
Heterospermy (G.M. Anisimova)	206
Seed Bank (V.L. Tichonova)	209
Fruit (E.S. Teryokhin)	211
Heterocarpy (A.P. Melikyan)	217

PART FOUR – VEGETATIVE PROPAGATION

Vegetative Propagation (N.I. Shorina)	221
Sarmentation (R.P. Barykina)	223
Particulation (R.P. Barykina)	226
Bud (N.I. Shorina, O.B. Mikhalevskaya)	228
Brood Bud (T.B. Batygina, E.A. Bragina)	233
Bulb (M.V. Baranova)	239
Bulblet and Bulbil (M.V. Baranova)	242
Protocorm (E.V. Andronova, T.B. Batygina, V.E. Vasilyeva)	244
Embryoidogeny is a New Type of Vegetative Propagation (T.B. Batygina)	248
Phytomer Conception and the Higher Plant Evolution (N.N. Tzvelev)	261

PART FIVE – MOLECULAR-GENETIC ASPECTS OF REPRODUCTION

Flower Development Genetics (L.A. Lutova)	267
Genetic Analysis of Ovule Development (K. Schneitz)	279
Gametophytic Mutations (N.Kh. Enaleeva, V.S. Tyrnov)	285
Modifiable Variability of Gametophyte (L.P. Lobanova, N.Kh. Enaleeva)	290
Plant Embryogenetics (V.S. Tyrnov)	293
Genetic Control of Apomixis (O.N. Tikhodeev)	296
Genetic Heterogeneity of Seeds. Polyembryony (T.B. Batygina)	300

PART SIX – POPULATION AND ECOLOGICAL ASPECTS OF REPRODUCTION

Phytocoenosis (V.I. Vasilevich)	311
Ecological niche (V.I. Vasilevich)	312
Population (V.I. Vasilevich)	314
Life form (N.I. Shorina)	315
Diaspore (E.A. Bragina, T.B. Batygina)	319
Population and Coenotic Regulation of Reproduction (Yu. A. Zlobin)	322
Population and Coenotic Aspects of Research on Plant Reproduction in Arctic Conditions (E.A. Khodachek)	325
Multiplicity of Vegetative Propagation and Expansion in the Ranunculaceae (R.P. Barykina)	330
Ontogenesis in <i>Ferula</i> L. (Apiaceae) (U.A. Rakhmankulov)	334

PART SEVEN – EMBRYOLOGICAL BASES OF REPRODUCTIVE STRATEGIES

Adaptive Possibilities and Reproductive Strategy in Trapaceae (G.E. Titova, A.A. Zakharova)	339
Reproductive Strategy in Ceratophyllaceae (I.I. Shamrov)	346

Reproductive Strategy in Nelumbonaceae (G.E. Titova, V.E. Vasilyeva)	349
Seed Propagation and Vegetative Propagation in <i>Vaccinium myrtillus</i> L. (Ericaceae) (E.A. Maznaya, G.M. Anisimova)	356
Reproductive Strategy of Viviparous Plants (T.B. Batygina, E.A. Bragina)	362
Reproductive Strategy of Orchids in Temperate Zone (P.V. Kulikov, E.G. Philippov)	364
Problems and Perspectives of <i>In Vitro</i> Seed Propagation in Orchids of Temperate Zone (E.V. Andronova, P.V. Kulikov, E.V. Philippov, V.E. Vasilyeva, T.B. Batygina)	367
Action of Herbicides and Other Factors on Embryogenesis of <i>Striga hermonthica</i> (Scrophulariaceae) (J. Paré)	375
Effects of Environmental Pollution on Plant Reproduction (G.M. Anisimova, I.V. Lyanguzova, I.I. Shamrov)	377
Bibliography	381
Plates	499
Index	569
Insets: Contributors of the Volume	571
