## Section 1

### Fish Cytogenetics in Systematics and Evolution

|                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------|-----|
| 1.1 Chromosomal Differentiation in Bitterlings<br>(Pisces, Cyprinidae)                                                       | 3   |
| <i>Takayoshi Ueda</i>                                                                                                        |     |
| 1.2 Chromosome Variability in Gymnotiformes<br>(Teleostei: Ostariophysi)                                                     | 17  |
| <i>Lurdes Foresti de Almeida-Toledo, Maria de Fatima Zambelli<br/>Daniel-Silva, Cinthia Bachir Moysés and Fausto Foresti</i> |     |
| 1.3 The Evolutionary Role of Hybridization and<br>Polyploidy in an Iberian Cyprinid Fish—<br>A Cytogenetic Review            | 41  |
| <i>Marta Gromicho and Maria João Collares-Pereira</i>                                                                        |     |
| 1.4 Chromosomal Changes and Stasis in<br>Marine Fish Groups                                                                  | 69  |
| <i>Wagner Franco Molina</i>                                                                                                  |     |
| 1.5 Karyotypic Evolution in Neotropical Fishes                                                                               | 111 |
| <i>Claudio Oliveira, Lurdes Foresti de Almeida-Toledo and<br/>Fausto Foresti</i>                                             |     |

- 1.6 Chromosomal Evolution in Mugilidae,  
Mugilomorpha: An Overview 165  
*Luciana Sola, Ekaterina Gornung,  
Maria Elena Mannarelli and Anna Rita Rossi*
- 1.7 Chromosome Evolution in the Neotropical  
Erythrinidae Fish Family: An Overview 195  
*Luiz Antonio Carlos Bertollo*

## **Section 2**

### **Fish Cytogenetics and Biodiversity Conservation**

- 2.1 Cytogenetics as a Tool in Fish Conservation:  
The Present Situation in Europe 215  
*Petr Ráb, Jörg Bohlen, Marie Rábová,  
Martin Flajšhans and Lukáš Kalous*
- 2.2 Cytogenetic Studies and Reproductive  
Strategies of an Invasive Fish Species, the  
Silver Crucian Carp (*Carassius auratus gibelio* Bloch) 241  
*Eszter Patakiné Várkonyi and Balázs Tóth*

## **Section 3**

### **Fish Cytogenetics in Stock Assessment and Aquaculture**

- 3.1 Chromosomal Analysis in Population  
Structuring and Stock Identification:  
Robertsonian Polymorphism in the White  
Sea Herring (*Clupea pallasii marisalbi*) 261  
*Dmitry L. Iajus*
- 3.2 Cytogenetic Characteristics of Interspecific  
Hybrids and Chromosome Set Manipulated Finfish 289  
*Konrad Ocalewicz, Malgorzata Jankun, and Miraslau Luczynski*
- 3.3 NOR Markers in the Identification and  
Management of Cultured Fish Species:  
The Case of Rainbow Trout Stocks Reared in Brazil 333  
*Fábio Porto-Foresti, Claudio Oliveira, Yara Aiko Tabata,  
Marcos Guilherme Rigolino and Fausto Foresti*

## Section 4

### Fish Cytogenetics and Genomics

|                                                                                                                                                                                     |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 4.1 FISH Analysis of Fish Transposable Elements:<br>Tracking Down Mobile DNA in Teleost Genomes                                                                                     | 361 |
| <i>Agnès Dettai, Laurence Bouneau, Cécile Fischer, Christina Schultheis, Cornelia Schmidt, Qingchun Zhou, Jean-Pierre Coutanceau, Catherine Ozouf-Costaz and Jean-Nicolas Volff</i> |     |
| 4.2 Polyploidy in Acipenseriformes:<br>Cytogenetic and Molecular Approaches                                                                                                         | 385 |
| <i>Francesco Fontana, Lorenzo Zane, Anastasia Pepe and Leonardo Congiu</i>                                                                                                          |     |
| 4.3 Diversity in Isochore Structure and<br>Chromosome Banding in Fish                                                                                                               | 405 |
| <i>Gloria G. Fortes, Carmen Bouza, Ana Viñas, Paulino Martínez and Laura Sánchez</i>                                                                                                |     |
| 4.4 Chromosomes and Repetitive DNAs: A<br>Contribution to the Knowledge of the Fish Genome                                                                                          | 421 |
| <i>Cesar Martins</i>                                                                                                                                                                |     |
| 4.5 Application of Fluorescence <i>in situ</i><br>Hybridization (FISH) to Genome Mapping in Fishes                                                                                  | 455 |
| <i>Ruth B. Phillips</i>                                                                                                                                                             |     |
| 4.6 Molecular Markers in Cartilaginous Fish Cytogenetics                                                                                                                            | 473 |
| <i>Lucia Rocco</i>                                                                                                                                                                  |     |
| Index                                                                                                                                                                               | 491 |
