<i>Preface to the English Edition</i>	v
<i>Introduction</i>	ix
1. Generating Operator of Protein Synthesis	1
Quantum Genetics—is a quantum science indeed	1
Genome of Aedes DNV virus	3
Irreducible representation of icosahedron group A5, group of generating operator of protein synthesis G96	10
Transformation of genetic information	16
2. Quantized Fields of Genetic Code	29
Groups A5 and G96	34
Matrix ' α '	37
Yang-Mills fields	41
Reduplication of field M(41)	45
Reduplication of conformal field	48
3. Informational Structure of DNA, RNA and Protein	56
Irreversible transformations of set	56
Informational structure of DNA	57
Supercompression of DNA	60
Informational structure of protein	67
Methylation of DNA	67
4. Quantification of Conformal Field	74
Alanine A $\{12^+ 5^-\}$	76
Phenylalanine F $\{8^+ 8^-\}$	78
Glycine G $\{16^+ 5^-\}$	79
Terminator $\{16^+ 5^-\}$	80
Histidine H $\{11^+ 2^-\}$	81
Proline P $\{12^+ 6^-\}$	83
Arginine R $\{11^+ 4^-\}$	84

Serine S {12 ⁺ 8 ⁻ }	85
Tryptophan W {10 ⁺ 6 ⁻ }	86
Field Basis ϕ {30 ⁺ 0 ⁻ }	88
Tyrosine Y {12 ⁺ 7 ⁻ }	89
Cysteine, Threonine, Valine C, T, V {20 ⁺ 14 ⁻ }	90
Aspartic Acid, Asparagine D, N {19 ⁺ 13 ⁻ }	92
Glutamic Acid, Glutamine E, Q {18 ⁺ 11 ⁻ }	93
Leucine, Isoleucine L, I {19 ⁺ 14 ⁻ }	96
Lysine, Methionine K, M {19 ⁺ 13 ⁻ }	98
Concordance of Amino Acid Conformal Field (CFAA) Metric	100
Auto-dual CFAA Bundle	106
20-Parametric Lie Group of CFAA Duplication	107
Representation of information in a conformal field	121
Representation of entropy Ω^+	124
5. Equivalent Charge Configurations	127
Dominant configurations of nucleotides in DNA and RNA	127
Dominant charge configurations of DNA and RNA nucleotides	141
Euclidean space of informational nucleotides	143
C, N – Protein states	144
Cap-structure of matrix RNA	147
Function Ψ_U of tRNA	150
Mark OH_4 of field ϕ	151
Literature Cited	152
Index	155
