

Contents

<i>About the Editors</i>	v
<i>Preface</i>	vii
1. Arbuscular Mycorrhiza and Soil Microbes <i>Mohammad Miransari</i>	1
2. Ectomycorrhizae and Forest Plants Fitness <i>L. Montecchio and L. Scattolin</i>	15
3. Role of VAM in Nutrient Uptake of Crop Plants <i>V. Davamani, A.C. Lourduraj, R.P. Yogalakshmi and M. Velmurugan</i>	33
4. Advances in Mass Production Technology of Arbuscular Mycorrhiza <i>A. Khaliq, D.J. Bagyaraj and M. Alam</i>	43
5. Biomass Production, Arbuscular Mycorrhizae and Soil Plant- available P under Water Stress in Native Perennial Grasses <i>C.A. Busso and A.I. Bolletta</i>	56
6. Induced Resistance in Plants and the Role of Arbuscular Mycorrhizal Fungi <i>Y. Ismail and M. Hijri</i>	77
7. Influence of VAM in Bioremediation of Environmental Pollutants <i>V. Davamani, A.C. Lourduraj and M. Velmurugan</i>	100
8. Rhizosphere Management Practices in Sustaining Mycorrhizae <i>C. Harisudan, M. Velmurugan and P. Hemalatha</i>	116
9. Importance of Mycorrhizae for Horticultural Crops <i>P. Hemalatha, M. Velmurugan, C. Harisudan and V. Davamani</i>	128
10. Mycobization as a Biotechnological Tool: A Challenge <i>M.S. Velázquez and M.N. Cabello</i>	140
11. Phytoremediation: Biotechnological Procedures involving Plants and Arbuscular Mycorrhizal Fungi <i>S.E. Hassan, M. St-Arnaud, M. Labreque and M. Hijri</i>	152

12. Molecular Characterization of Genetic Diversity among Arbuscular Mycorrhizal Fungi <i>M. Velmurugan, P. Hemalatha, C. Harisudan and D. Thangadurai</i>	178
13. Molecular Tools for Biodiversity and Phylogenetic Studies in Mycorrhizas: The Use of Primers to Detect Arbuscular Mycorrhizal Fungi <i>Fernanda Covacevich</i>	186
14. The Impact of Climate Changes on Belowground: How the CO ₂ Increment Affects Arbuscular Mycorrhiza <i>Fernanda Covacevich and Ricardo Luis Louro Berbara</i>	203

<i>Index</i>	213
