

CONTENTS

<i>Foreword</i>	v
<i>Acknowledgements</i>	ix
1. Maturation: erythroblast to erythrocyte	1
2. Erythrocyte precursors: quantitative representation in hemopoietic bone marrow	14
3. Cytoskeleton	23
4. Vascular system and architecture of hemopoietic bone marrow	32
5. Relationship of bone marrow sinuses and erythropoiesis	35
6. Erythropoiesis during embryogenesis: general plan	41
7. Yolk sac erythropoiesis: early phase	42
8. Germ disc: earliest commitment to erythroblast formation	50
9. Ultrastructure of early yolk sac erythropoiesis	54
10. Yolk sac erythropoiesis: later phase	65
11. Hemopoietic stem cell and quail-chick chimera	74
12. Intraembryonic hemopoietic stem cell: origin and distribution	82
13. Hepatic and splenic erythropoiesis during embryogenesis	94
14. Medullary erythropoiesis during embryogenesis	97
15. Circulating erythrocytes and marrow erythroblasts in the domestic chicken embryo and hatchling: quantitative aspects	100
16. Embryonic erythropoiesis: an altricial passeriforme versus a precocial galliforme	107
17. Hepatic erythropoiesis in the adult	109
18. Thymic erythropoiesis	110
19. Erythrocyte counts, hemoglobin levels and hematocrits	113
20. Red cell indices (MCV, MCH, MCHC)	126
21. Configuration of the erythrocyte	135
22. Erythrocyte-based values and gender relationships	143

xii *The Avian Erythrocyte: Its Phylogenetic Odyssey*

23. Erythrocyte size and variations other than gender-related	168
24. Erythroid parameters and relationships with age and other conditions	177
25. Erythroid profile and migratory behavior of the avian	201
26. Erythrocytic picture and altitude of habitat	203
27. Season and erythroid picture	211
28. Interaction of erythropoiesis, egg laying, and iron metabolism	215
29. Breeding cycle of a pelagic seabird	218
30. Avian hemoglobins: adult and embryonic	221
31. Blood volume	227
32. Life span of the erythrocyte	238
33. Apoptosis	243
34. Erythroplastids (denucleated erythrocytes)	245
35. Staining and cytochemistry	249
36. Osmotic fragility	254
37. Erythroid reservoir function of the spleen in fowl	268
38. Telomeres	269
39. Anemia	275
40. Polycythemia	282
41. Erythroid response to hemorrhage	283
42. Phenylhydrazine-induced anemia and Heinz bodies	289
43. Assessment of erythropoietic status of bone marrow	301
44. Avian C-value	303
45. Metals and erythropoiesis	307
46. Parasitization of the erythrocyte	325
Haemoproteus	327
Plasmodium	338
Leucocytozoon	348
Babesia	357
Aegyptianella	364
47. Erythroleukemia	373
48. Erythrocytes and pathologic conditions/agents	380
Folic acid deficiency and megaloblasts	381
Rapeseed and dimethyl disulphide	382
Aflatoxin	384
Prudhoe Bay crude and other oil	385

Bacterial disease	389
Viral disease	390
Organophosphates	393
Ascites syndrome	396
Fenbendazole	397
Antibiotics and chicks	397
Immune-mediated hemolytic anemia	398
Ethanol	400
49. Hormones and erythropoiesis	403
50. Avian erythrocyte: a generator of cytokines	412
51. Anticoagulants: impact upon erythrocytes	414
Table 1: Erythrocyte Counts and Related Values in Avians	421
Glossary: Common Names of Species Cited in the Text and Tables	541
References	565
Appendix: Genus, Species and Other Taxa of Cited Avians and Non-Avians	617
Subject Index	629
