Preface	xiii
Acknowledgments	xv
Authors	xvii
1. Basic Probability Theory	1
1.1 Concepts and Notation	1
1.1.1 Counting Formulas	1
1.1.1.1 N-tuples	1
1.1.1.2 Permutations	1
1.1.1.3 Combinations	1
1.1.1.4 Pascal's Identity	2
1.1.1.5 Vandermonde's Identity	3
1.1.2 Probability Formulas	3
1.1.2.1 Definitions	3
1.1.2.2 Mutually Exclusive Events	4
1.1.2.3 Conditional Probability	4
1.1.2.4 Independence	5
1.1.2.5 Partitions and Bayes' Theorem	5
Exercises	7
Solutions	17
2. Univariate Distribution Theory	45
2.1 Concepts and Notation	45
2.1.1 Discrete and Continuous Random Variables	45
2.1.2 Cumulative Distribution Functions	45
2.1.3 Median and Mode	46
2.1.4 Expectation Theory	46
2.1.5 Some Important Expectations	47
2.1.5.1 Mean	47
2.1.5.2 Variance	47
2.1.5.3 Moments	47
2.1.5.4 Moment Generating Function	48
2.1.5.5 Probability Generating Function	48
2.1.6 Inequalities Involving Expectations	49
2.1.6.1 Markov's Inequality	49
2.1.6.2 Jensen's Inequality	49

2.1.6.3	Hölder's Inequality	49
2.1.7	Some Important Probability Distributions for Discrete Random Variables	49
2.1.7.1	Binomial Distribution	49
2.1.7.2	Negative Binomial Distribution	50
2.1.7.3	Poisson Distribution	50
2.1.7.4	Hypergeometric Distribution	50
2.1.8	Some Important Distributions (i.e., Density Functions) for Continuous Random Variables	51
2.1.8.1	Normal Distribution	51
2.1.8.2	Lognormal Distribution	51
2.1.8.3	Gamma Distribution	51
2.1.8.4	Beta Distribution	52
2.1.8.5	Uniform Distribution	52
	Exercises	52
	Solutions	66
3.	Multivariate Distribution Theory	107
3.1	Concepts and Notation	107
3.1.1	Discrete and Continuous Multivariate Distributions	107
3.1.2	Multivariate Cumulative Distribution Functions	108
3.1.3	Expectation Theory	108
3.1.3.1	Covariance	108
3.1.3.2	Correlation	109
3.1.3.3	Moment Generating Function	109
3.1.4	Marginal Distributions	109
3.1.5	Conditional Distributions and Expectations	110
3.1.6	Mutual Independence among a Set of Random Variables	111
3.1.7	Random Sample	112
3.1.8	Some Important Multivariate Discrete and Continuous Probability Distributions	112
3.1.8.1	Multinomial	112
3.1.8.2	Multivariate Normal	112
3.1.9	Special Topics of Interest	114
3.1.9.1	Mean and Variance of a Linear Function of Random Variables	114
3.1.9.2	Convergence in Distribution	114
3.1.9.3	Order Statistics	114
3.1.9.4	Method of Transformations	115
	Exercises	116
	Solutions	132

4. Estimation Theory	183
4.1 Concepts and Notation	183
4.1.1 Point Estimation of Population Parameters	183
4.1.1.1 Method of Moments (MM)	183
4.1.1.2 Unweighted Least Squares (ULS)	184
4.1.1.3 Weighted Least Squares (WLS)	184
4.1.1.4 Maximum Likelihood (ML)	184
4.1.2 Data Reduction and Joint Sufficiency	184
4.1.2.1 Joint Sufficiency	184
4.1.2.2 Factorization Theorem	185
4.1.3 Methods for Evaluating the Properties of a Point Estimator	185
4.1.3.1 Mean-Squared Error (MSE)	185
4.1.3.2 Cramér–Rao Lower Bound (CRLB)	186
4.1.3.3 Efficiency	186
4.1.3.4 Completeness	187
4.1.3.5 Rao–Blackwell Theorem	187
4.1.4 Interval Estimation of Population Parameters	187
4.1.4.1 Exact Confidence Intervals	187
4.1.4.2 Exact CI for the Mean of a Normal Distribution	187
4.1.4.3 Exact CI for a Linear Combination of Means of Normal Distributions	188
4.1.4.4 Exact CI for the Variance of a Normal Distribution	189
4.1.4.5 Exact CI for the Ratio of Variances of Two Normal Distributions	190
4.1.4.6 Large-Sample Approximate CIs	190
4.1.4.7 Consistency	191
4.1.4.8 Slutsky’s Theorem	191
4.1.4.9 Construction of ML-Based CIs	192
4.1.4.10 ML-Based CI for a Bernoulli Distribution Probability	193
4.1.4.11 Delta Method	194
4.1.4.12 Delta Method CI for a Function of a Bernoulli Distribution Probability	195
Exercises	196
Solutions	224
5. Hypothesis Testing Theory	307
5.1 Concepts and Notation	307
5.1.1 Basic Principles	307
5.1.1.1 Simple and Composite Hypotheses	307
5.1.1.2 Null and Alternative Hypotheses	307
5.1.1.3 Statistical Tests	307

5.1.1.4	Type I and Type II Errors	307
5.1.1.5	Power	308
5.1.1.6	Test Statistics and Rejection Regions	308
5.1.1.7	P-Values	309
5.1.2	Most Powerful (MP) and Uniformly Most Powerful (UMP) Tests	309
5.1.2.1	Review of Notation	310
5.1.3	Large-Sample ML-Based Methods for Testing the Simple Null Hypothesis $H_0 : \theta = \theta_0$ (i.e., $\theta \in \omega$) versus the Composite Alternative Hypothesis $H_1 : \theta \in \bar{\omega}$	310
5.1.3.1	Likelihood Ratio Test	310
5.1.3.2	Wald Test	311
5.1.3.3	Score Test	311
5.1.4	Large Sample ML-Based Methods for Testing the Composite Null Hypothesis $H_0 : \theta \in \omega$ versus the Composite Alternative Hypothesis $H_1 : \theta \in \bar{\omega}$	312
5.1.4.1	Likelihood Ratio Test	313
5.1.4.2	Wald Test	313
5.1.4.3	Score Test	314
Exercises		315
Solutions		329
Appendix	Useful Mathematical Results	389
A.1	Summations	389
A.2	Limits	389
A.3	Important Calculus-Based Results	390
A.4	Special Functions	391
A.5	Approximations	391
A.6	Lagrange Multipliers	393
References		395
Index		399
