

CONTENTS

Foreword	v
Preface	vii
Contributors	xi
Color Plates	xv

PART I GPCRS: STRUCTURE AND FUNCTION

1	Structure-Function Relationships in G Protein-Coupled Receptors: <i>Ligand Binding and Receptor Activation</i>	3
	<i>Dominique Massotte and Brigitte L. Kieffer</i>	
2	Molecular Mechanisms Involved in the Activation of Rhodopsin-Like Seven-Transmembrane Receptors	33
	<i>Peng Huang and Lee-Yuan Liu-Chen</i>	
3	GPCR Folding and Maturation: <i>The Effect of Pharmacological Chaperones</i>	71
	<i>Ulla E. Petäjä-Repo and Michel Bouvier</i>	
4	Regulated Membrane Trafficking and Proteolysis of GPCRs	95
	<i>James N. Hislop and Mark von Zastrow</i>	

PART II GPCR ACTIVITY AND ITS REGULATORS

5	Heterotrimeric G Proteins and Their Effector Pathways	109
	<i>Tracy Nguyen Hwangpo and Ravi Iyengar</i>	
6	RGS Proteins: <i>Orchestration of Multiple Signaling Pathways</i>	135
	<i>Ryan W. Richman and Mariá A. Diversé-Pierluissi</i>	
7	G Protein-Coupled Receptor Kinases	149
	<i>Lan Ma, Jingxia Gao, and Xiaoqing Chen</i>	
8	Regulators of GPCR Activity: <i>The Arrestins</i>	159
	<i>Louis M. Luttrell</i>	
9	GPCR Interacting Proteins: <i>Classes, Assembly, and Functions</i>	199
	<i>Hongyan Wang, Catherine B. Willmore, and Jia Bei Wang</i>	

PART III GPCR DIMERIZATION/OLIGOMERIZATION

10	Biophysical and Biochemical Methods to Study GPCR Oligomerization	217
	<i>Karen M. Kroeger, Kevin D. G. Pflieger, and Karin A. Eidne</i>	

11	Oligomerization Domains of G Protein-Coupled Receptors: <i>Insights Into the Structural Basis of GPCR Association</i>	243
	<i>Marta Filizola, Wen Guo, Jonathan A. Javitch, and Harel Weinstein</i>	
12	Functional Complementation and the Analysis of GPCR Dimerization	267
	<i>Graeme Milligan, Juan J. Carrillo, and Geraldine Pascal</i>	
13	The Role of Oligomerization in G Protein-Coupled Receptor Maturation	287
	<i>Michael M. C. Kong, Christopher H. So, Brian F. O'Dowd, and Susan R. George</i>	
14	Receptor Oligomerization and Trafficking	309
	<i>Selena E. Barlett and Jennifer L. Whistler</i>	
15	Modulation of Receptor Pharmacology by G Protein-Coupled Receptor Dimerization	323
	<i>Noura S. Abul-Husn, Achla Gupta, Lakshmi A. Devi, and Ivone Gomes</i>	
PART IV RECENT DEVELOPMENTS IN DRUG DISCOVERY		
16	Role of Heteromeric GPCR Interactions in Pain/Analgesia	349
	<i>Andrew P. Smith and Nancy M. Lee</i>	
17	Conformational Plasticity of GPCR Binding Sites: <i>Structural Basis for Evolutionary Diversity in Ligand Recognition</i>	363
	<i>Xavier Deupi, Cedric Govaerts, Lei Shi, Jonathan A. Javitch, Leonardo Pardo, and Juan Ballesteros</i>	
18	De-Orphanizing GPCRs and Drug Development	389
	<i>Rainer K. Reinscheid and Olivier Civelli</i>	
	Index	403
