PART I IMAGING OF FIXED CELLS AND TISSUES	
1 Immunofluorescent Labeling of Proteins in Cultured Cells With Quantum Dot Secondary Antibody Conjugates <i>Richard L. Ornberg and Hongjian Liu</i>	3
2 Immunohistochemical Detection With Quantum Dots <i>Rizwan S. Akhtar, Cecelia B. Latham, Dario Siniscalco, Carlo Fuccio, and Kevin A. Roth</i>	11
3 Quantum Dots for Multicolor Tumor Pathology and Multispectral Imaging <i>Johbu Itoh and Robert Yoshiyuki Osamura</i>	29
4 Light and Electron Microscopic Localization of Multiple Proteins Using Quantum Dots <i>Thomas J. Deerinck, Ben N. G. Giepmans, Benjamin L. Smarr, Maryann E. Martone, and Mark H. Ellisman</i>	43
5 Human Metaphase Chromosome FISH Using Quantum Dot Conjugates <i>Joan H. M. Knoll</i>	55
PART II IMAGING OF LIVE CELLS	
6 Biotin-Ligand Complexes With Streptavidin Quantum Dots for In Vivo Cell-Labeling of Membrane Receptors <i>Diane S. Lidke, Peter Nagy, Thomas M. Jovin, and Donna J. Arndt-Jovin</i>	69
7 Single Quantum Dot Tracking of Membrane Receptors <i>Cédric Bouzigues, Sabine Lévi, Antoine Triller, and Maxime Dahan</i>	81
8 Optical Monitoring of Single Cells Using Quantum Dots <i>Jyoti K. Jaiswal and Sanford M. Simon</i>	93
9 Peptide-Mediated Intracellular Delivery of Quantum Dots <i>B. Christoffer Lagerholm</i>	105
10 Multiple Cell Lines Using Quantum Dots <i>Paul G. Wylie</i>	113

11	Measuring Cell Motility Using Quantum Dot Probes <i>Weiwei Gu, Teresa Pellegrino, Wolfgang J. Parak, Rosanne Boudreau, Mark A. Le Gros, A. Paul Alivisatos, and Carolyn A. Larabell</i>	125
PART III IMAGING OF LIVE ANIMALS		
12	Quantum Dots for In Vivo Molecular and Cellular Imaging <i>Xiaohu Gao, Leland W. K. Chung, and Shuming Nie</i>	135
13	Sentinel Lymph Node Mapping With Type-II Quantum Dots <i>John V. Frangioni, Sang-Wook Kim, Shunsuke Ohnishi, Sungjee Kim, and Mounqi G. Bawendi</i>	147
14	Macrophage-Mediated Colocalization of Quantum Dots in Experimental Glioma <i>Osman Muhammad, Alexandra Popescu, and Steven A. Toms</i>	161
PART IV FLOW CYTOMETRY APPLICATIONS		
15	Application of Quantum Dots to Multicolor Flow Cytometry <i>Pratip K. Chattopadhyay, Joanne Yu, and Mario Roederer</i>	175
16	Quantum Dots in Flow Cytometry <i>Barnaby Abrams and Tim Dubrovsky</i>	185
PART V BIOCHEMICAL APPLICATIONS		
17	Luminescent Biocompatible Quantum Dots: A Tool for Immunosorbent Assay Design <i>Ellen R. Goldman, H. Tetsuo Uyeda, Andrew Hayhurst, and Hedi Mattoussi</i>	207
18	Fluorescence-Based Analysis of Cellular Protein Lysate Arrays Using Quantum Dots <i>David H. Geho, J. Keith Killian, Animesh Nandi, Johanne Pastor, Prem Gurnani, and Kevin P. Rosenblatt</i>	229
19	Application of Quantum Dots to Multicolor Microarray Experiments: Four-Color Genotyping <i>George Karlin-Neumann, Marina Sedova, Mat Falkowski, Zhiyong Wang, Steven Lin, and Maneesh Jain</i>	239
