

Advanced Data Mining Technologies in Bioinformatics

Table of Contents

Preface	vi
 Chapter I	
Introduction to Data Mining in Bioinformatics	1
<i>Hui-Huang Hsu, Tamkang University, Taipei, Taiwan</i>	
 Chapter II	
Hierarchical Profiling, Scoring and Applications in Bioinformatics	13
<i>Li Liao, University of Delaware, USA</i>	
 Chapter III	
Combinatorial Fusion Analysis: Methods and Practices of Combining Multiple Scoring Systems	32
<i>D. Frank Hsu, Fordham University, USA</i>	
<i>Yun-Sheng Chung, National Tsing Hua University, Taiwan</i>	
<i>Bruce S. Kristal, Burke Medical Research Institute and weill Medical College of Cornell University, USA</i>	
 Chapter IV	
DNA Sequence Visualization	63
<i>Hsuan T. Chang, National Yunlin University of Science and Technology, Taiwan</i>	

Chapter V	
Proteomics with Mass Spectrometry	85
<i>Simon Lin, Northwestern University, USA</i>	
<i>Salvatore Mungai, Duke University Medical Center, USA</i>	
<i>Richard Haney, Duke University Medical Center, USA</i>	
<i>Edward F. Patz, Jr., Duke University Medical Center, USA</i>	
<i>Patrick McConnell, Duke University Medical Center, USA</i>	
Chapter VI	
Efficient and Robust Analysis of Large Phylogenetic Datasets	104
<i>Sven Rahmann, Bielefeld University, Germany</i>	
<i>Tobias Müller, University of Würzburg, Germany</i>	
<i>Thomas Dandekar, University of Würzburg, Germany</i>	
<i>Matthias Wolf, University of Würzburg, Germany</i>	
Chapter VII	
Algorithmic Aspects of Protein Threading	118
<i>Tatsuya Akutsu, Kyoto University, Japan</i>	
Chapter VIII	
Pattern Differentiations and Formulations for Heterogeneous Genomic Data through Hybrid Approaches	136
<i>Arpad Kelemen, The State University of New York at Buffalo, USA & Niagra University, USA</i>	
<i>Yulan Liang, The State University of New York at Buffalo, USA</i>	
Chapter IX	
Parameterless Clustering Techniques for Gene Expression Analysis	155
<i>Vincent S. Tseng, National Cheng Kung University, Taiwan</i>	
<i>Ching-Pin Kao, National Cheng Kung University, Taiwan</i>	
Chapter X	
Joint Discriminatory Gene Selection for Molecular Classification of Cancer	174
<i>Junyong Zhang, Xidian University, China</i>	
Chapter XI	
A Haplotype Analysis System for Genes Discovery of Common Diseases	214
<i>Takashi Kido, HuBit Genomix, Inc., Japan</i>	
Chapter XII	
A Bayesian Framework for Improving Clustering Accuracy of Protein Sequences Based on Association Rules	231
<i>Peng-Yeng Yin, National Chi Nan University, Taiwan</i>	
<i>Shyong-Jian Shyu, Ming Chuan University, Taiwan</i>	
<i>Guan-Shiang Huang, National Chi Nan University, Taiwan</i>	
<i>Shuang-Te Liao, Ming Chuan University, Taiwan</i>	

Chapter XIII

In Silico Recognition of Protein-Protein Interactions: Theory and Applications 248

Byung-Hoon Park, Oak Ridge National Laboratory, USA

Puongan Dam, University of Georgia, USA

Chongle Pan, University of Tennessee, USA

Ying Xu, University of Georgia, USA

Al Geist, Oak Ridge National Laboratory, USA

Grant Heffelfinger, Sandia National Laboratories, USA

Nagiza F. Samatova, Oak Ridge National Laboratory, USA

Chapter XIV

Differential Association Rules: Understanding Annotations in Protein Interaction

Networks 269

Christopher Besemann, North Dakota State University, USA

Anne Denton, North Dakota State University, USA

Ajay Yekkiral, North Dakota State University, USA

Ron Hutchison, The Richard Stockton College of New Jersey, USA

Marc Anderson, North Dakota State University, USA

Chapter XV

Mining BioLiterature: Toward Automatic Annotation of Genes and Proteins 283

Francisco M. Couto, Universidade de Lisboa, Portugal

Mário J. Silva, Universidade de Lisboa, Portugal

Chapter XVI

Comparative Genome Annotation Systems 296

Kwangmin Choi, Indiana University, USA

Sun Kim, Indiana University, USA

About the Authors 314
