

CONTENTS

PREFACE		XIII
SECTION 1.	INTRODUCTION	1
CHAPTER 1	AN ESSAY ON D-AMINO ACIDS: RETROSPECTION AND PERSPECTIVE <i>Kenji Soda</i>	3
SECTION 2.	ANALYTICAL METHODS OF THE DETECTION OF D-AMINO ACIDS	15
CHAPTER 2.1	CHROMATOGRAPHIC DETERMINATION OF FREE D- AND L-AMINO ACIDS IN MARINE ALGAE <i>Eizo Nagahisa and Takehiko Yokoyama</i>	17
CHAPTER 2.2	DETERMINATION OF ACIDIC D-AMINO ACIDS AND THEIR <i>N</i> -METHYL DERIVATIVES IN BIVALVES AND OTHER MOLLUSKS <i>Ryo-hei Yamada, Yoshio Kera, Shouji Takahashi, Takashi Watanabe and Kimihiko Shibata</i>	25
CHAPTER 2.3	PURIFICATION AND DETERMINATION OF <i>N</i> -METHYL-D-ASPARTIC ACID (NMDA) IN BIOLOGICAL TISSUES <i>Antimo D'Aniello</i>	33
CHAPTER 2.4	A SENSITIVE DIRECT HPLC METHOD FOR SIMULTANEOUS DETERMINATION OF <i>N</i> -METHYL-(D AND L)-ASPARTATE, <i>N</i> -METHYL- (D AND L)-GLUTAMATE AND (D AND L)- ASPARTATE IN BIOLOGICAL TISSUES <i>Mara Tsesarskaia, Erika Galindo, Gyula Szókán and George Fisher</i>	41
CHAPTER 2.5	METHODS FOR TOTAL DETERMINATION OF D-ASPARTIC ACID, D-GLUTAMIC ACID AND <i>N</i> -METHYL-D-ASPARTIC ACID AND FOR THE SPECIFIC DETERMINATION OF D-ASPARTIC ACID <i>Patrizia Spinelli, Enrico D'Aniello, Gabriele Farrandino, Enza Topo, Paola Pulzella, Tiziana Pollio, Angela DiMaio, George Fisher and Antimo D'Aniello</i>	49
CHAPTER 2.6	AN IMPROVED HPLC METHOD FOR DETERMINATION AND QUANTIFICATION OF D- AND L-ASPARTIC ACID <i>Erika Galindo, Mara Tsesarskaia, Susana Lopez, Collins Boston, Antimo D'Aniello, and George Fisher</i>	59

CHAPTER 2.7	DETERMINATION OF FREE D-ASPARTATE AND D-SERINE IN RAT BRAIN AND PERIPHERY BY GAS CHROMATOGRAPHY AND HIGH-PERFORMANCE LIQUID CHROMATOGRAPHY <i>Atsushi Hashimoto and Masanobu Yoshikawa</i>	65
CHAPTER 2.8	AN LC METHOD FOR THE ANALYSIS OF D-AMINO ACIDS <i>Marianne Stenberg</i>	75
CHAPTER 2.9	SENSITIVE DETERMINATION OF D-AMINO ACIDS IN RAT BRAIN BY HPLC WITH A PIRKLE-TYPE CHIRAL COLUMN, FOLLOWING PRECOLUMN FLUORESCENCE DERIVATIZATION WITH NBD-F <i>Takeshi Fukushima, Junko Kawai, Kazuhiro Imai, and Toshimasa Toyo'oka</i>	85
CHAPTER 2.10	DETERMINATION OF SMALL AMOUNTS OF D-AMINO ACIDS IN MAMMALS USING COLUMN-SWITCHING HPLC <i>Kenji Hamase and Kiyoshi Zaitu</i>	93
CHAPTER 2.11	SENSITIVE DETERMINATION OF AMINO ACID ENANTIOMERS BY CE/LIF <i>Yi-Ming Liu and Shulin Zhao</i>	103
CHAPTER 2.12	METHODS OF DETECTION FOR AMINO ACID ENANTIOMERS IN THE VERTEBRATE RETINA <i>Robert F. Miller, Michael T. Bowser and Kylie B. O'Brien</i>	107
CHAPTER 2.13	DETERMINATION OF N^G -NITRO-ARGININE ENANTIOMERS IN RAT PLASMA BY CAPILLARY ELECTROCHROMATOGRAPHY WITH A CHIRAL MOBILE PHASE <i>Yan-fei Xin, Xiang-jun Zhou and Yong-xiang Wang</i>	111
CHAPTER 2.14	ANALYSIS OF D-AMINO ACIDS IN PROTEIN HYDROLYSATES AND PEPTIDES SUBJECTED TO EDMAN DEGRADATION <i>Anna Maria Salzano and Andrea Scaloni</i>	115
CHAPTER 2.15	QUANTITATIVE DETERMINATION OF THE PROTEIN OF BACTERIAL ORIGIN BASED ON D-AMINO ACID CONTENTS <i>János Csapó, Csilla Albert, Katalin Lóki, Zsuzsanna Csapó-Kiss and Éva Varga-Visi</i>	123
CHAPTER 2.16	DETECTION OF D-AMINO ACIDS BY D-AMINO ACID OXIDASE <i>Laura Caldinelli, Laura Motteran, Silvia Sacchi, Luciano Piubelli, Angelo Boselli, Jean-Pierre Mothet, Loredano Pollegioni and Mirella S. Pilone</i>	135
SECTION 3.	FREE D-AMINO ACIDS IN ANIMAL TISSUES AND THEIR PHYSIOLOGICAL ROLE	149
CHAPTER 3.1	A SYSTEMATIC APPROACH TO THE BRAIN D-SERINE SYSTEM <i>Toru Nishikawa</i>	151
CHAPTER 3.2	IMMUNOHISTOCHEMICAL STUDY OF D-SERINE <i>Reiji Semba</i>	169
CHAPTER 3.3	IMMUNOHISTOCHEMISTRY FOR D-SERINE IN BRAIN <i>Michael J. Schell</i>	173
CHAPTER 3.4	BRAIN SLICE PREPARATION FOR EVALUATION OF THE PATHOPHYSIOLOGICAL FUNCTIONS OF D-SERINE <i>Hiroshi Katsuki and Akinori Akaike</i>	181

CHAPTER 3.5	NEPHROTOXICITY OF D-SERINE IN RATS <i>Ryuichi Konno</i>	187
CHAPTER 3.6	PREPARATION OF A POLYCLONAL ANTISERUM AGAINST D-ASPARTATE <i>Jen-Ai Lee and Hiroshi Homma</i>	191
CHAPTER 3.7	VESICULAR STORAGE IN AND SECRETION OF D-ASPARTATE FROM NEUROENDOCRINE CELLS <i>Shunsuke Uehara and Yoshinori Moriyama</i>	203
CHAPTER 3.8	D-ASPARTATE IN FROG HARDERIAN GLAND <i>Rossella Monteforte, Alessandra Santillo, Paolo Chieffi and Gabriella Chieffi Baccari</i>	215
CHAPTER 3.9	THE ROLE OF D-ASPARTIC ACID IN THE ENDOCRINE REGULATION OF THE TESTIS: A STUDY IN THE LIZARD <i>PODARCIS S. SICULA</i> <i>Maria Maddalena Di Fiore and Franca Raucci</i>	221
CHAPTER 3.10	D-ASPARTIC ACID IN THE NERVOUS SYSTEM OF A MOLLUSC: AN IMMUNOHISTOCHEMICAL PROTOCOL <i>Biagio D'Aniello, Luciano Luongo, Antimo D'Aniello, Claudia Pinelli, and Rakesh K. Rastogi</i>	231
CHAPTER 3.11	ANALYSIS, DISTRIBUTION, AND PHYSIOLOGICAL FUNCTIONS OF FREE D-ALANINE IN AQUATIC INVERTEBRATES <i>Hiroki Abe</i>	235
CHAPTER 3.12	D-GLUTAMIC ACID INDUCED MUSCLE CONTRACTION IN SILKWORM LARVA <i>Hiroshi Hamamoto, Jorge Larranaga, Masae Sekine, Takemitsu Furuchi, Masumi Katane, Hiroshi Homma, Norio Matsuki and Kazuhisa Sekimizu</i>	249
CHAPTER 3.13	PRIMARY STUDY OF D-AMINO ACID ACCUMULATION SYSTEM <i>Wataru Masuda</i>	255
CHAPTER 3.14	D-AMINO ACIDS AND IMMUNE RESPONSE <i>Einat Zisman and Michael Sela</i>	259
CHAPTER 3.15	CONSIDERATIONS FOR THE USE OF 'RAPID' CELL SUPERFUSION AND VOLTAGE CLAMP TO INVESTIGATE THE ROLE OF RARE AMINO ACIDS IN SYNAPTIC TRANSMISSION <i>Euan R Brown and Stefania Piscopo</i>	271
CHAPTER 3.16	ARE D-AMINO ACIDS PREVALENT AMONG EUKARYOTES? <i>Yoko Nagata</i>	277
SECTION 4.	FREE D-AMINO ACID IN FOOD STUFFS AND THEIR NUTRITIONAL ASPECTS	283
CHAPTER 4.1	NUTRITIONAL EVALUATION OF D-AMINO ACIDS <i>Mendel Friedman</i>	285
CHAPTER 4.2	D-AMINO ACIDS IN FOOD <i>Rosangela Marchelli, Gianni Galaverna, Arnaldo Dossena, Gerardo Palla, Anna Bobbio, Salvatore Santaguida, Kalina Grozeva, Roberto Corradini, and Stefano Sforza</i>	299

CHAPTER 4.3	D-AMINO ACID DETERMINATION IN FOODS, BEVERAGES, AND BIOLOGICAL SAMPLES <i>Molly Warnke and Daniel W. Armstrong</i>	317
CHAPTER 4.4	GAS CHROMATOGRAPHIC DETERMINATION OF D-AMINO ACIDS IN FOOD AND BEVERAGES <i>Ralf Pätzold and Hans Brückner</i>	337
SECTION 5.	PROTEIN-BOUND D-AMINO ACIDS	353
CHAPTER 5.1	DETECTION OF THE SPECIFIC D-ASPARTIC ACID RESIDUES IN PROTEIN <i>Noriko Fujii and Takumi Takata</i>	355
CHAPTER 5.2	DETECTION OF AMYLOID β PEPTIDES WITH L-ISOASPARTATE IN ALZHEIMER'S DISEASE <i>Takahiko Shimizu and Takuji Shirasawa</i>	369
CHAPTER 5.3	DETECTION OF D-AMINO ACID IN PEPTIDES BY RP-HPLC AND MASS SPECTROMETRY <i>Céline Ollivaux and Daniel Soyez</i>	375
CHAPTER 5.4	DETERMINATION OF D-AMINO-ACID RESIDUES IN PEPTIDES FROM ANIMAL VENOM BY NMR: APPLICATION TO PLATYPUS VENOM PEPTIDE OVCNPs <i>Allan M. Torres, Paramjit S. Bansal, Paul F. Alewood, Dominic P. Geraghty and Philip W. Kuchel</i>	379
CHAPTER 5.5	PROTEIN L-ISOASPARTYL-O-METHYLTRANSFERASE CATALYZES <i>IN SITU</i> FORMATION OF D-ASPARTATE AND D-ISOASPARTATE IN PROTEINS <i>Dana W. Aswad</i>	389
CHAPTER 5.6	PURIFICATION OF A NOVEL MAMMALIAN PROTEINASE FOR D-ASPARTATE- CONTAINING PROTEIN, D-ASPARTYL ENDOPEPTIDASE (DAEP) <i>Tadatoshi Kinouchi</i>	399
CHAPTER 5.7	MICRO-PURIFICATION AND STRUCTURAL ASSAY OF POLY-γ-GLUTAMATE, A D-AMINO ACID-CONTAINING BIOPOLYMER <i>Makoto Ashiuchi and Haruo Misono</i>	403
CHAPTER 5.8	ESTIMATION OF CHRONOLOGICAL AGE USING THE ASPARTIC ACID RACEMIZATION METHOD ON DENTIN SAMPLES <i>Susumu Ohtani</i>	409
CHAPTER 5.9	THE USE OF D-AMINO ACIDS IN PEPTIDE DESIGN <i>Radhakrishnan Mahalakshmi and Padmanabhan Balaram</i>	415
CHAPTER 5.10	CELLULAR APPROACH OF THE BIOGENESIS OF D-AMINO-ACID CONTAINING PEPTIDES IN EUKARYOTES: THE CRUSTACEAN MODEL <i>Daniel Soyez</i>	431
SECTION 6.	ENZYMES INVOLVED IN SYNTHESIS AND METABOLISM OF D-AMINO ACIDS	441
CHAPTER 6.1	PURIFICATION OF ALANINE RACEMASE FROM <i>HELICOBACTER PYLORI</i> <i>Katsushi Nishimura and Yoko Nagata</i>	443

CHAPTER 6.2	DISRUPTION OF ALANINE RACEMASE GENE OF <i>SCHIZOSACCHAROMYCES POMBE</i> <i>Takayuki Kazuoka, Takuma Uo and Nobuyoshi Esaki</i>	447
CHAPTER 6.3	ASSAY METHOD FOR ASPARTATE RACEMASE ACTIVITY BY HPLC <i>Noriyuki Nimura and Hiroshi Homma</i>	453
CHAPTER 6.4	SERINE RACEMASE OF SILKWORM, <i>BOMBYX MORI</i> <i>Tohru Yoshimura</i>	459
CHAPTER 6.5	RECOMBINANT SERINE RACEMASE PREPARATION <i>Veronika N. Foltyn and Herman Wolosker</i>	463
CHAPTER 6.6	D-AMINO ACID OXIDASE ACTIVITY ASSAYS <i>Maria A. Vanoni and Bruno Curti</i>	467
CHAPTER 6.7	HISTOCHEMICAL DETECTION OF D-AMINO-ACID OXIDASE ACTIVITY IN RAT BRAIN <i>Hiroyuki Tanaka, Atsushi Yamamoto, Tetsuo Ishida and Kihachiro Horiike</i>	477
CHAPTER 6.8	EVALUATION OF CHIRAL INVERSION OF D-AMINO ACID BY STABLE ISOTOPE METHODOLOGY <i>Hiroshi Hasegawa, Yoshihiko Shinohara and Takao Hashimoto</i>	481
CHAPTER 6.9	TECHNIQUES FOR THE ENGINEERING OF D-AMINO ACID OXIDASE SUBSTRATE SPECIFICITY <i>Gianluca Molla, Elena Rosini, Giorgia Letizia Marcone, Simona Lorenzi, Mirella S. Pilone and Loredano Pollegioni</i>	491
CHAPTER 6.10	TRANSFORMATION OF PLANTS WITH D-AMINO ACID RESISTANCE SELECTABLE MARKERS <i>Oskar Forsum and Torgny N��sholm</i>	503
CHAPTER 6.11	SCREENING FOR MUTANT MICE LACKING D-AMINO-ACID OXIDASE ACTIVITY <i>Ryuichi Konno</i>	509
CHAPTER 6.12	ASTROGLIAL EXPRESSION OF D-AMINO ACID OXIDASE: REGIONAL AND CELL-TYPE SPECIFIC EXPRESSION <i>Hwan Ki Park, Yoshiteru Urai, Osamu Jinnouchi, Atsuhiko Suzue, Tokujiro Kanamori, Kyung Tak Kwak, Oded Ben-Yoseph, Shinji Nagahiro, and Kiyoshi Fukui</i>	513
CHAPTER 6.13	D-AMINO ACID OXIDASE: A VERSATILE TOOL TO STUDY THE FUNCTION OF THE GLIAL-DERIVED NEUROMODULATOR D-SERINE AT GLUTAMATERGIC SYNAPSES <i>Jean-Pierre Mothet</i>	523
CHAPTER 6.14	RESONANCE RAMAN STUDY ON CHARGE-TRANSFER COMPLEXES OF PORCINE D-AMINO ACID OXIDASE <i>Yasuzo Nishina, Kyosuke Sato and Kiyoshi Shiga</i>	535
CHAPTER 6.15	IMMUNODETECTION OF D-ASPARTATE OXIDASE <i>Gabriella Tedeschi, Severino Ronchi and Armando Negri</i>	545
CHAPTER 6.16	HIGH-PERFORMANCE LIQUID CHROMATOGRAPHIC DETERMINATION OF D- ASPARTATE OXIDASE ACTIVITY IN RAT TISSUES <i>Atsushi Yamamoto, Hiroyuki Tanaka, Tetsuo Ishida and Kihachiro Horiike</i>	549

CHAPTER 6.17	CLONING OF THE HUMAN BRAIN D-ASPARTATE OXIDASE cDNA AND ITS EXPRESSION IN <i>ESCHERICHIA COLI</i>	555
	<i>Chiaki Setoyama and Retsu Miura</i>	
CHAPTER 6.18	METHODS FOR <i>N</i>-ACYL-D-AMINO ACID AMIDOHYDROLASE RESEARCH	561
	<i>Mamoru Wakayama, Kazuaki Yoshimune and Mitsuaki Moriguchi</i>	
CHAPTER 6.19	ACTIVITY MEASUREMENT OF HYDANTOIN RACEMASE ENZYME: A KEY FOR THE PRODUCTION OF OPTICALLY PURE D-AMINO ACIDS	573
	<i>Sergio Martínez-Rodríguez, Josefa María Clemente-Jiménez, Felipe Rodríguez-Vico and Francisco Javier Las Heras-Vázquez</i>	
CHAPTER 6.20	ENZYMES ACTING ON D-AMINO ACID AMIDES	579
	<i>Yasuhisa Asano</i>	
CHAPTER 6.21	ROLE OF AMMONIUM PHOSPHATES IN TRYPTOPHANASE ACTIVITY TOWARD D-TRYPTOPHAN	591
	<i>Akihiko Shimada</i>	
INDEX		609
