Preface	vii
Acknowledgments	ix
Contributors	xv
Color Plates	xix
PART I. INTRODUCTION	
1 Gene Transfer: Who Benefits? <i>Lorraine Olendzenski and Johann Peter Gogarten</i>	3
PART II. DEFINITIONS, PHILOSOPHY, AND IMPLICATIONS OF HGT	
2 Defining the Mobilome <i>Janet L. Siefert</i>	13
3 The Interplay of Homologous Recombination and Horizontal Gene Transfer in Bacterial Speciation <i>Jeffrey G. Lawrence and Adam C. Retchless</i>	29
4 Epistemological Impacts of Horizontal Gene Transfer on Classification in Microbiology <i>Eric Baptiste and Yan Boucher</i>	55
5 Persistence Mechanisms of Conjugative Plasmids <i>Martin Iain Bahl, Lars Hestbjerg Hansen, and Søren J. Sørensen</i>	73
6 The Integron/Gene Cassette System: An Active Player in Bacterial Adaptation <i>Maurizio Labbate, Rebecca Josephine Case, and Hatch W. Stokes</i>	103
7 Ancient Gene Transfer as a Tool in Phylogenetic Reconstruction <i>Jinling Huang and Johann Peter Gogarten</i>	127
8 The Tree of Life Viewed Through the Contents of Genomes <i>Christopher H. House</i>	141
9 Horizontal Gene Transfer and the Evolution of Methanogenic Pathways <i>Greg Fournier</i>	163
10 Genome Acquisition in Horizontal Gene Transfer: Symbiogenesis and Macromolecular Sequence Analysis <i>Lynn Margulis</i>	181
PART III. METHODS	
11 Detection and Quantitative Assessment of Horizontal Gene Transfer <i>Olga Zhaxybayeva</i>	195
12 Composition-Based Methods to Identify Horizontal Gene Transfer <i>Diego Cortez, Luis Delaye, Antonio Lazcano, and Arturo Becerra</i>	215

13	Testing Phylogenetic Methods to Identify Horizontal Gene Transfer <i>Maria Poptsova</i>	227
14	Untangling Hybrid Phylogenetic Signals: Horizontal Gene Transfer and Artifacts of Phylogenetic Reconstruction <i>Robert G. Beiko and Mark A. Ragan</i>	241
15	Construction and Use of Flow Cytometry Optimized Plasmid-Sensor Strains <i>Martin Iain Bahl, Gunnar Oregaard, Søren J. Sørensen, and Lars Hestbjerg Hansen</i>	257
16	Experimental Evolution of an Essential <i>Bacillus</i> Gene in an <i>E. coli</i> Host <i>Maia Larios-Sanz and Michael Travisano</i>	269
17	Mass Action Models Describing Extant Horizontal Transfer of Plasmids: Inferences and Parameter Sensitivities <i>Barth F. Smets and Laurent Lardon</i>	289
 PART IV. CASE STUDIES		
18	Interdomain Transfers of Sugar Transporters Overcome Barriers to Gene Expression <i>Kenneth M. Noll and Kamolwan Thirangoon</i>	309
19	The Role of Horizontal Gene Transfer in Photosynthesis, Oxygen Production, and Oxygen Tolerance <i>Jason Raymond</i>	323
20	Horizontal Gene Transfer in Cyanobacterial Signature Genes <i>Shailaja Yerrapragada, Janet L. Siefert, and George E. Fox</i>	339
21	Population Genomics and the Bacterial Species Concept <i>Margaret A. Riley and Michelle Lizotte-Waniewski</i>	367
22	A Critique of Prokaryotic Species Concepts <i>R. Thane Papke</i>	379
23	What Antimicrobial Resistance Has Taught Us About Horizontal Gene Transfer <i>Miriam Barlow</i>	397
24	Potential for Horizontal Gene Transfer in Microbial Communities of the Terrestrial Subsurface <i>Jonna M. Coombs</i>	413
25	Horizontal Gene Transfer and Mobile Genetic Elements in Marine Systems <i>Patricia A. Sobecky and Tracy H. Hazen</i>	435
26	Horizontal Gene Transfer in Metal and Radionuclide Contaminated Soils <i>Patricia A. Sobecky and Jonna M. Coombs</i>	455

27	Horizontal Gene Transfer Between Microbial Eukaryotes <i>Jan O. Andersson</i>	473
28	Horizontal Gene Transfer in Eukaryotic Parasites: A Case Study of <i>Entamoeba histolytica</i> and <i>Trichomonas vaginalis</i> <i>U. Cecilia Alsmark, Thomas Sicheritz-Ponten, Peter G. Foster, Robert P. Hirt, and T. Martin Embley</i>	489
29	Role of Horizontal Gene Transfer in the Evolution of Photosynthetic Eukaryotes and Their Plastids <i>Patrick J. Keeling</i>	501
30	Role of Horizontal Gene Transfer in the Evolution of Plant Parasitism Among Nematodes <i>Makedonka Mitreva, Geert Smant, and Johannes Helder</i>	517
	<i>Index</i>	537

NS, Canada

IAN BOUTCHER • Department of Civil and Environmental Engineering, Massachusetts Institute of Technology, Cambridge, MA, USA

RENEE CAJTHAMINE-LAKE • Harvard Center for the Environment (HUCE) and Microbiology and Molecular Genetics, Harvard Medical School, Harvard University, Boston, MA, USA

JONNA M. COOMES • Department of Biology, Adelphi University, Garden City, NY, USA

DIEGO CORTES • Unité de Biologie Moléculaire du Centre des Extrêmophiles Institut Pasteur, Paris, France

LUIS DELAYE • Facultad de Ciencias, Universidad Nacional Autónoma de México, México D.F., México

MARTIN EMBLEY • Institute for Cell and Molecular Bioscience, Newcastle University, Newcastle upon Tyne, UK

PETER FOSTER • Department of Zoology, The Natural History Museum, London, UK

GREG FOURNIER • Department of Molecular and Cell Biology, University of Connecticut, Storrs, CT, USA

GEORGE E. FOX • Department of Biology and Biochemistry, University of Houston, Houston, TX, USA

JOHANN PETER GOGARTEN • Department of Molecular and Cell Biology, University of Connecticut, Storrs, CT, USA

LARS HENRIK HANSEN • Department of Microbiology, University of Copenhagen, Copenhagen, Denmark

TRACY H. HAZEN • Georgia Institute of Technology, School of Biology, Atlanta, GA, USA

JOHANNES HELDER • Department of Plant Sciences, Laboratory of Nematology, Wageningen University, Wageningen, Netherlands

ROBERT HIRT • Institute for Cell and Molecular Bioscience, Newcastle University, Newcastle upon Tyne, UK

CHRISTOPHER H. HOUSE • Department of Genomics and Proteomics in Plant Arabidopsis Research Center, Pennsylvania State University, University Park, PA, USA
