
Contents

Preface		vii
Chapter 1	The Intertwining of DNA Damage Response Pathway Components and Homologous Recombination Repair <i>Adam D. Brown, Bijal Karia, Amy M. Wiles and Alexander J.R. Bishop</i>	1
Chapter 2	Ecdysone-Based-Tet-on Expression System <i>Leonardo D'Alto, Luigi Viggiano, Daniel Suter, and J. Richard Chaillet</i>	69
Chapter 3	A Somewhat Subjective Introduction to Gene Mapping through Nonparametric Linkage Analysis <i>Lars Ångquist</i>	85
Chapter 4	The Fate of Phylogenetics in the Face of Lateral Gene Transfers <i>E. Baptiste, Yan Boucher and W.F. Doolittle</i>	139
Chapter 5	Intricacies of Integration <i>René Daniel and Johanna A. Smith</i>	163
Chapter 6	Phage Integrases for Mediating Genomic Integration and DNA Recombination <i>Christof Maucksch, Manish K. Aneja and Carsten Rudolph</i>	189
Chapter 7	The Role of Recombination in the Post-genomic Era: Challenges and Perspectives <i>Antonio Carvajal-Rodríguez</i>	205
Chapter 8	A Model for the Chiasma Process Allowing Detection of Differing Location Distributions for Single and Multiple Chiasmata <i>Friedrich Teuscher, Gerd Nürnberg and Volker Guiard</i>	229

Chapter 9	The Fanconi Anemia Pathway: Directing DNA Replication-Associated Repair <i>John M. Hinz</i>	247
Chapter 10	Extent and Limits of Genetic Recombination since the Origin of Life <i>Jean-Pierre Gratia</i>	265
Chapter 11	In Silico Genetic Recombination an Advanced Biotechnology Tool in Molecular Biology <i>Viroj Wiwanitkit</i>	279
Chapter 12	Gene Transfer in Human Skin with Different Pseudotyped HIV-Based Vectors <i>A. Hachiya, P. Sriwiranont, A. Patel, N. Saito, A. Ohuchi, T. Kitahara, Y. Takema, R. Tsuboi, E. Boissy, M.O. Visscher, J.M. Wilson and G.P. Kobinger</i>	291
Chapter 13	Genomic DNA Rearrangement in Brain <i>Toyoki Maeda</i>	307
Chapter 14	Homologous Recombination and Innocuous Intron Elimination <i>Kejin Hu</i>	323
Chapter 15	Natural Genetic Recombination of Pathogens <i>Viroj Wiwanitkit</i>	335
Chapter 16	Existence and Uniqueness of Positive Solutions of a Randomized Spruce Budworm Model <i>Yanqiu Li and Hailong Gao</i>	345
Index		359
