

CONTENTS

Preface		vii
Expert Commentary:		
	Linear vs. Crosslinked Macromolecules as Supports for Biocatalyzed Transformations: Recent Developments <i>Dario Pasini</i>	1
Chapter 1	Chimeric Metallonucleases - Design, Realization and Applications <i>Bela Gyurcsik</i>	11
Chapter 2	Role of Metal ion in Inorganic Biochemistry <i>Xue-Fang Shang and Hua-Kuan Lin</i>	27
Chapter 3	Catalytic Activity of Iron and Manganese Porphyrins Modulated by Different Microenvironments: Interesting Devices for Nanotechnology <i>Katia C. U. Mugnol, Tatiana Prieto, Clemerson F. B. Dias, Marcela S. C. Silva, Juliana C. Araújo, Francisco L. Souza, Ana Maria Carmona-Ribeiro, Yassuko Iamamoto, Otaciro R. Nascimento and Iseli L. Nantes</i>	63
Chapter 4	Metal Based Drug Design <i>Namrata Dixit and Lallan Mishra</i>	105
Chapter 5	Electrochemical Behavior of Flavonoids in the Presence of Metal Ions <i>Carlos Kremer, Maria F. Cerdá, Julia Torres, Horacio Heinzen, Ana Bertucci and Sixto Domínguez</i>	161

Chapter 6	Theoretical Study on FeOOH Formation and Role of H ₂ O on Cu _B Site at Early Stage of O ₂ Reduction in Cytochrome C Oxidase <i>Yasunori Yoshioka</i>	185
Chapter 7	The Axial Ligand Effect on Substrate Monooxygenation by the Oxo-iron Active Species of Heme Enzymes. How does Cytochrome C Peroxidase Compare to Cytochrome P450? <i>Sam P. de Visser</i>	197
Chapter 8	The Mechanism of Action of Di-heme Peroxidases: A Theoretical Study <i>Thomas Brittain, Peter. D. W. Boyd, Vilmos Fulop and Aude Echali�r</i>	225
Chapter 9	Catalase activity of diMn ^{III} Complexes with the [Mn ₂ (μ-O ₂ C ₂ H ₃)(μ-OL)(μ-OX)] ³⁺ Core (L = Polydentate Ligand; X = CH ₃ or OC ₂ H ₃). Structural Features that Control Catalysis <i>Sandra Signorella, Jean-Pierre Tuchagues, Diego Moreno and Claudia Palopoli</i>	243
Chapter 10	Functional and Structural Mimics of Superoxide Dismutase Enzymes <i>Ist�v�n P�link�</i>	281
Chapter 11	From Synthesis to Antitumoral Activity of Platinum(II) and Platinum(IV) Complexes with Bis(carboxyalkylamino)ethane and -propane Ligands <i>Goran N. Kaluderovi�, Harry Schmidt, Dirk Steinborn and Tibor J. Sabo</i>	305
Index		327
