

CONTENTS

Preface		ix
Chapter 1	Learning about Astrobiology: A Challenge for the Public Understanding of Science	1
	<i>Keith S. Taber</i>	
Chapter 2	Water Interfacial Processes in Prebiotic Chemistry	27
	<i>Marta Ruiz-Bermejo, César Menor-Salván, María-Paz Zorzano, Zoubir El-Hachemi, Susana Osuna-Esteban and Sabino Veintemillas-Verdaguer</i>	
Chapter 3	Integration of Primitive Metabolic, Information and Structural Protocell Components under Simulated Early Earth Conditions	59
	<i>S. E. Maurer and P. A. Monnard</i>	
Chapter 4	Microbial Evolution and Adaptation in Icy Worlds	81
	<i>Alberto Alcazar, Laura Garcia-Descalzo and Cristina Cid</i>	
Chapter 5	Seepages and the Astrobiological Potential of Polar Dunes on Mars	97
	<i>A. Kereszturi, D. Möhlmann, Sz Berczi, T. Ganti, A. Horvath, A. Kuti and A. Sik</i>	
Chapter 6	Prehistory of the Initial Microbial Communities: The Way from Abiotic Organic Microsystems to Prokaryotic Cells	115
	<i>Vladimir Kompanichenko</i>	
Chapter 7	Visualization in the Education of Astrobiology	131
	<i>Akos Kereszturi</i>	
Chapter 8	The Search for Life on Mars: Raman Spectroscopy and Analytical Astrobiology	143
	<i>Howell G. M. Edwards and Michael D. Hargreaves</i>	

Chapter 9	Europa: New Horizons for Astrobiology	193
	<i>Esther Velasco, Guillermo Caravantes, Beatriz Gómez-Izquierdo, Alberto Rodriguez and Javier Ruiz</i>	

Index	205
