

Contents

Series Editor's Preface <i>Parvez I. Haris</i>	v
Preface <i>Andrew J. Dingley and Steven M. Pascal</i>	vii
Sample Preparation	
Advances in Cell-Free Protein Synthesis for NMR Sample Preparation <i>Andrew V. Kralicek and Kiyoshi Ozawa</i>	3
RNA for NMR <i>Michèle C. Erat</i>	20
Isotope Labeling of Larger DNAs for NMR Structural Studies <i>Sybren S. Wijmenga, Frank H.T. Nelissen, Hans A. Heus and Marco Tessari</i>	36
Structure and Dynamics of Proteins	
NMR Studies of Large Protein Systems <i>Ming-Tao Pai, Shiou-Ru Tzeng and Charalampos G. Kalodimos</i>	61
Experimental and Computational Characterization of Disordered States of Proteins <i>Joseph A. Marsh and Julie D. Forman-Kay</i>	77
New Approaches for the Study of Paramagnetic Metalloproteins <i>Luciano A. Abriata, Maria-Eugenia Zaballa and Alejandro J. Vila</i>	97
Solid-State NMR on Membrane Proteins: Methods and Applications <i>Christian Ader, Deepak Nand, Marie Renault, Abhishek A. Cukkemane and Marc Baldus</i>	115
Solid-State NMR of Membrane-Acting Antimicrobial Peptides <i>John D. Gehman, Marc-Antoine Sani and Frances Separovic</i>	137
NMR Spectroscopy Inside Prokaryotic and Eukaryotic Cells <i>Karl Bertrand, David S. Burz, Alexander Shekhtman and Kaushik Dutta</i>	162
Relaxation Dispersion Studies of Enzyme Motions <i>Nicolas Doucet and J. Patrick Loria</i>	185

Structure and Dynamics of Nucleic Acids and Protein-Nucleic Acid Complexes

RNA Structure Determination by NMR: Combining Labeling and Pulse Techniques	205
<i>Braden M. Roth and Mirko Hennig</i>	
NMR Spectroscopy for Investigating Larger Nucleic Acids	229
<i>Lawrence J. Clos II, Samuel E. Butcher and Yun-Xing Wang</i>	
How to Study the Structure and Dynamics of Protein-RNA Complexes by NMR Spectroscopy	249
<i>Mario Schubert, Cyril Dominguez, Olivier Duss, Sapna Ravindranathan and Frédéric H.-T. Allain</i>	
Investigating RNA and DNA Dynamics through Nuclear Magnetic Resonance	279
<i>Michael F. Bardaro Jr., Kari Pederson, Gary Drobny and Gabriele Varani</i>	

Rapid and Hybrid Techniques

Fast Acquisition Methods in Multidimensional NMR	305
<i>Mehdi Mobli, Jeffrey C. Hoch and Glenn F. King</i>	
Automated Protein Structure Determination from NMR Data	338
<i>Peter Güntert</i>	
Advances in NMR-Based Structural Genomics	366
<i>Thomas Szyperski and Gaetano T. Montelione</i>	
NMR Screening Methods for Drug Discovery	381
<i>Matthew D. Shortridge and Robert Powers</i>	
Hyphenated NMR Techniques	413
<i>Julie R. Kesting, Kenneth T. Johansen and Jerzy W. Jaroszewski</i>	
NMR and Calorimetry of Biological Systems	435
<i>Anthony Mittermaier and Patrick Farber</i>	
NMR and SAXS: A Perfect Marriage and New Approach for RNA Structure Determination	457
<i>Xiaobing Zuo, Jinbu Wang and Yun-Xing Wang</i>	
Subject Index	469
Author Index	471
