

Contents

Preface <i>Edgar Wingender</i>	vii
Petri Nets and the Simulation of Metabolic Networks <i>Ralf Hofestädt</i>	1
Quantitative Modeling of Biochemical Networks <i>R. Hofestädt and S. Thelen</i>	3
Topological Analysis of Metabolic Networks Based on Petri Net Theory <i>Ionela Zevedei-Oancea and Stefan Schuster</i>	17
Quantitative Petri Net Model of Gene Regulated Metabolic Networks in the Cell <i>Ming Chen and Ralf Hofestädt</i>	38
Petri Nets for Steady State Analysis of Metabolic Systems <i>Klaus Voss, Monika Heiner and Ina Koch</i>	56
Biopathways Representation and Simulation on Hybrid Functional Petri Net <i>Hiroshi Matsuno, Yukiko Tanaka, Hitoshi Aoshima, Atsushi Doi, Mika Matsui and Satoru Miyano</i>	77
Constructing Biological Pathway Models with Hybrid Functional Petri Nets <i>Atsushi Doi, Sachie Fujita, Hiroshi Matsuno, Masao Nagasaki and Satoru Miyano</i>	92
STEPP – Search Tool for Exploration of Petri Net Paths: A New Tool for Petri Net-Based Path Analysis in Biochemical Networks <i>Ina Koch, Markus Schüler and Monika Heiner</i>	113
Ontology Based Standardization of Petri Net Modeling for Signaling Pathways <i>Takako Takai-Igarashi</i>	122
Simulation-Based Validation of the p53 Transcriptional Activity with Hybrid Functional Petri Net <i>Atsushi Doi, Masao Nagasaki, Hiroshi Matsuno and Satoru Miyano</i>	130
Analyzing Stationary States of Gene Regulatory Network Using Petri Nets <i>Anna Gambin, Slawomir Lasota and Michal Rutkowski</i>	143
Cell Illustrator 4.0: A Computational Platform for Systems Biology <i>Masao Nagasaki, Ayumu Saito, Euna Jeong, Chen Li, Kaname Kojima, Emi Ikeda and Satoru Miyano</i>	160

Modeling of Cell-to-Cell Communication Processes with Petri Nets Using the Example of Quorum Sensing	182
<i>Sebastian Janowski, Benjamin Kormeier, Thoralf Töpel, Klaus Hippe, Ralf Hofestädt, Nils Willassen, Rafael Friesen, Sebastian Rubert, Daniela Borck, Peik Haugen and Ming Chen</i>	
On Determining Firing Delay Time of Transitions for Petri Net Based Signaling Pathways by Introducing Stochastic Decision Rules	204
<i>Yoshimasa Miwa, Chen Li, Qi-Wei Ge, Hiroshi Matsuno and Satoru Miyano</i>	
Impact of Delays and Noise on Dopamine Signal Transduction	222
<i>Jialiang Wu, Zhen Qi and Eberhard O. Voit</i>	
Role of mRNA Gestation and Senescence in Noise Reduction During the Cell Cycle	236
<i>Attila Csikász-Nagy and Ivan Mura</i>	
Exhaustive Analysis of the Modular Structure of the Spliceosomal Assembly Network: A Petri Net Approach	244
<i>Ralf H. Bortfeldt, Stefan Schuster and Ina Koch</i>	
Modelling the Molecular Interactions in the Flower Developmental Network of <i>Arabidopsis thaliana</i>	279
<i>Kerstin Kaufmann, Masao Nagasaki and Ruy Jáuregui</i>	
Subject Index	299
Author Index	301
